Kde se vzala teorie úniku v laboratoři? Kdo jako první propagoval myšlenku a proč? Odpověď na tuto otázku je překvapivá – a může být klíčem k odhalení tajemství původu COVID-19.

První známá zmínka o myšlence, že koronavirus mohl pocházet z čínské laboratoře, se objevila 9. ledna 2020 ve zprávě Rádia Svobodná Asie (RFA). Bylo to jen několik dní poté, co se virus poprvé dostal do povědomí veřejnosti, a v té době ještě nebyla hlášena žádná úmrtí a jen málo lidí se viru obávalo – včetně, jak se zdá, Číňanů, kteří tvrdili, že to nebylo ani jasné. zda se to šířilo mezi lidmi. Zdánlivě nešťastná z nedostatku poplachu, RFA vydala komentář od Ren Ruihong, bývalé vedoucí oddělení lékařské pomoci v čínském Červeném kříži, která řekla, že je přesvědčena, že se šíří mezi lidmi. Tvrdila také, že jde o „nový typ mutantního koronaviru“, a okamžitě, aniž by se zastavila nadechnutí, nadnesla možnost, že jde o důsledek

čínského biologického útoku na Hongkong pomocí viru vyvinutého ve Wuhanském virologickém institutu (WIV). . Mějte na paměti, že to bylo předtím, než byla hlášena jediná osoba, která zemřela na virus, a nebyly předloženy žádné spolehlivé důkazy pro toto tvrzení. Je to poprvé, co se v médiích objevuje WIV a myšlenka laboratorního původu viru. Zpráva pak naznačuje, že WIV svou účast skrývá – ačkoli základ pro tuto nářku je přinejmenším slabý.

řekl Ren. "Nezveřejnili genetickou sekvenci, protože je vysoce nakažlivá." Co mohu říci, pacienti to chytili od jiných lidí. Celou dobu jsem si to myslel."

Řekla, že nedostatek úmrtí nenaznačuje, že virus je méně smrtelný než SARS, ale pouze to, že antivirové léky se za posledních 10 let zlepšily.

Ren řekla, že také považuje relativně vysoký počet infekcí v Hongkongu s podezřením, vzhledem k tomu, že nikde mezi těmito dvěma městy, například v jižní provincii Guangdong, nebyly hlášeny žádné případy.

"Technologie genetického inženýrství se nyní dostala do takového bodu a Wuhan je domovem virového výzkumného centra, které je pod záštitou Čínské akademie věd, což je nejvyšší úroveň výzkumného zařízení v Číně," řekla.

Opakované hovory na různá čísla uvedená na Wuhanský virologický institut pod Čínskou akademií věd zůstaly bez odezvy.

Zaměstnanec, který se představil jako vedoucí inženýr, však řekl, že o viru nic neví.

"Promiň, já... nevím o tom," řekl zaměstnanec.

Během následujících dvou týdnů RFA tvrdě prosazovala myšlenku původu čínské biologické laboratoře a její zprávy byly 24. ledna převzaty deníkem Washington Times, který citoval Danyho Shohama, „izraelského odborníka na biologickou válku“.

Smrtící epidemie zvířecího viru, která se šíří po celém světě, mohla podle izraelského odborníka na biologickou válku pocházet z laboratoře ve Wu-chanu spojené s čínským programem skrytých biologických zbraní.

Radio Free Asia tento týden znovu odvysílalo místní Wuhanskou televizní zprávu z roku 2015 ukazující nejpokročilejší čínskou laboratoř pro výzkum virů známou [jako] Wuhanský virologický institut, oznámilo Radio Free Asia.

Laboratoř je jediným deklarovaným místem v Číně, které je schopné pracovat se smrtícími viry.

Dany Shoham, bývalý důstojník izraelské vojenské rozvědky, který studoval čínskou biologickou válku, uvedl, že institut je napojen na pekingský tajný program biologických zbraní.

„Některé laboratoře v institutu se pravděpodobně zabývaly, pokud jde o výzkum a vývoj, čínskými [biologickými zbraněmi], alespoň souběžně, ale ne jako hlavní zařízení čínského uspořádání [biologických zbraní],“ řekl pan Shoham *Washington Times* .

Proč *Radio Free Asia* a *Washington Times* představily a propagovaly myšlenku Covidu jako čínské biologické zbraně? Zdá se, že RFA tak učinila, aby čelila nedostatku čínského znepokojení ohledně viru, proto nadpis: „Odborníci zpochybňují čínská oficiální tvrzení ohledně ‚nového‘ Wuhanského koronaviru.“ Zpráva *Washington Times* v jednu chvíli uvádí, že jde o reakci na fámy „šířící se po čínském internetu, které tvrdí, že virus je součástí amerického spiknutí k šíření zárodečných zbraní“, s odkazem na nejmenovaného „amerického úředníka“.

Jedním z neblahých příznaků, řekl americký úředník, je, že od vypuknutí epidemie před několika týdny začaly na čínském internetu kolovat falešné fámy, které tvrdí, že virus je součástí amerického spiknutí za šíření zárodečných zbraní.

To by mohlo naznačovat, že Čína připravuje propagandistické výstupy, aby čelila budoucím obviněním, že nový virus unikl z jedné z wuhanských civilních nebo obranných výzkumných laboratoří.

Proč zpráva předpokládá „budoucí obvinění“ z úniku z laboratoře – zvláště když je v procesu vytváření takových obvinění?

Zdá se, že slova anonymního amerického úředníka uvádějí, že čínské fámy začaly „před několika týdny“, hned na začátku ledna nebo na konci prosince; nicméně kupodivu byl článek brzy aktualizován, aby z nejasných důvodů vypustil slova „protože epidemie začala před několika týdny“.

V každém případě je na těchto „fámách kolujících po čínském internetu“ opravdu zvláštní to, že o nich nebyly nikdy vyrobeny ani nalezeny žádné důkazy. Ve skutečnosti všechna místa, kde byste mohli očekávat, že je zmíníte, ne. Například v únoru 2021 DFRLab z Atlantic Council zveřejnil ve spojení s *Associated Press* obsáhlý dokument shrnující všechny „falešné fámy“ a „hoaxy“ týkající se původu Covidu. Jeho velký výzkumný tým hledal na internetu všechny fámy spojené s původem Covid – přesto se v části o Číně nic o těchto údajných lednových fámách o amerických biologických zbraních nezmiňuje.

Dalším příkladem je Larry Romanoff, aktivista, který píše o různých ‚kospiračních teoriích‘ a který v Číně žije mnoho let. Jeho sloupky z počátku roku 2020 na webu *Global Research* útočící na americkou pozici byly tweetovány vysokými čínskými představiteli, ale nikdy se nezmínil o těchto údajných raných fámách na „čínském internetu“, což by jistě udělal.

Navíc, pověsti tvrdí, že nikdy nebyly opakovány žádnými zpravodajskými zdroji; to bylo jedinkrát, co to bylo vyrobeno. Proč tedy RFA představila příběh o viru vytvořeném v laboratoři, ještě před první smrtí? Proč se to snažilo spustit alarm? A proč nejmenovaný americký úředník tvrdil, že reaguje na čínské fámy, které se ukázaly jako neexistující?

Děj houstne, když si uvědomíte, že *Radio Free Asia* je americkou vládou financované médium, které je v podstatě frontou CIA, kdysi pojmenované *New York Times* jako klíčová součást „celosvětové propagandistické sítě“ agentury. Jak Whitney Webb zdůraznila již v lednu 2020, ačkoli RFA již není řízena přímo CIA, je řízena vládou financovanou Broadcasting Board of Governors (BBG), která odpovídá přímo ministru zahraničí – který počátkem pandemie byl Mike Pompeo, jehož předchozím zaměstnáním byl ředitel CIA. To znamená, že můžeme vidět, že vyprávění o původu laboratoře Covid pochází od bezpečnostních služeb vlády USA a učinilo tak velmi brzy, před první smrtí, jako součást záměrného úsilí o zvýšení poplachu v Číně i jinde. Byl také navržen tak, aby čelil očekávaným tvrzením, která ještě nebyla vznesena (ačkoli anonymní americký úředník nepravdivě tvrdil, že ano), že virus byl biologickým útokem USA.

To, že americká vláda by byla zdrojem teorie laboratorního původu, je nepochybně překvapivé pro mnoho lidí, vzhledem k tomu, že během několika týdnů by stejná teorie byla vládními úředníky zamítnuta jako „kospirační teorie“ a násilně potlačena. Na jejím místě by oficiální americké kanály podpořily teorii přirozeného původu na mokrém trhu a snažily se uzavřít další debatu a vyšetřování. Tak o co jde?

Zde je jedno možné vysvětlení, které dává smysl všem známým faktům – i když je jistě velmi znepokojivé. Možná to není správné, ale přiznám se, že mě momentálně nenapadá lepší. Možná někdo jiný může.

Vysvětlením je, že příběh o původu v čínské laboratoři zveřejnila americká rozvědka na začátku ledna jako krycí příběh. Krycí příběh k čemu? Za biologický útok USA na Čínu. Jako krycí příběh pro útok slouží čtyřem klíčovým účelům. Za prvé, předchází obvinění z amerického útoku (a skutečně anonymní americký úředník nepravdivě tvrdil, že již byla vznesena). Za druhé, předpokládá potřebu vysvětlit nepřírozený původ viru, u něhož by se očekávalo, že bude objeven, protože přirozený původ se projevuje jinak než nepřírozený původ – přírodní původ by měl mít živočišné rezervoáry, ranou genetickou rozmanitost a důkazy o adaptaci na člověka, které u SARS-CoV-2 chybí. Za třetí, šíří poplach v Číně – jeden z účelů útoku. A za čtvrté, ospravedlňuje USA přesně to, co udělali, a že to považovali za záležitost národní bezpečnosti, nikoli veřejného zdraví. Představa, že by USA mohly záměrně vypustit virus v Číně, se někomu může zdát přitažená za vlasy. Je však dobře známo, že Pentagon v letech blížících se pandemii zintenzivnil svůj výzkum virů přenášených netopýry. Ačkoli to bylo uvedeno pouze pro obranné účely vzhledem k předpokládanému riziku použití netopýrů jako „biologických zbraní“, vědci již dříve v časopise *Science* varovali, že další údajně obranný program Pentagonu, program DARPA „Insect Allies“, se zdálo být skutečně zaměřeno na vytvoření a dodání „nové třídy biologických zbraní“ a že odhalilo „záměr vyvinout prostředek pro dodávání HEGAA pro útočné účely“. Kromě toho byla íránská vláda natolik přesvědčena, že její rané propuknutí COVID-19 v únoru 2020, které zabilo značný počet jejích vysokých vůdců, bylo způsobeno biologickým útokem USA, že podala formální stížnost OSN. Taková obvinění samozřejmě nic nedokazují. Ale společně tyto obavy naznačují, že takový útok není mimo oblast možností a měl by být považován alespoň za vysvětlení původu viru.

Ale pokud byl únik z laboratoře zamýšleným krycím příběhem, proč byl krátce poté potlačen jako „konspirační teorie“? Je veřejně známo, že k tomu došlo z velké části díky úsilí Anthonyho Fauciho, Jeremyho Farrara a dalších západních vědců, kteří zorganizovali vědecké zakrývání důkazů, které by mohly implikovat jejich spoluúčast na výzkumu zisku z funkce podezření, že mohl vytvořit virus. Věděli o útoku? Neexistuje žádný důkaz, že to udělali. Což znamená, že by také nevěděli o zamýšleném krycím příběhu. Jeden ze spiklenců, Christian Drosten, se v jednom ze zveřejněných e-mailů skupiny přímo ptá odkud pochází „konspirační teorie“ laboratorního původu. Zdá se, že Farrar a Fauci ve svých e-mailech skutečně zkoumají otázky původu (přičemž jasně usilují o konkrétní odpověď). Obavy této skupiny vědců z účasti na vytvoření viru je vedly k tomu, aby zorganizovali vysoce efektivní úsilí o zamítnutí a potlačení teorie laboratorního původu. Tento zásah značně zkomplikoval krycí příběh, což vedlo k tomu, že výstupy americké zpravodajské komunity (IC) byly zmatené a nekonzistentní. V následujícím uvádím šest hlavních zásahů americké zpravodajské komunity během pandemie a navrhuji, co se za nimi pravděpodobně skrývá. Oni jsou:

1. Tajná zpravodajská zpráva z listopadu 2019, která tvrdí, že ve Wu-chanu propukla velká respirační epidemie, která byla použita k informování vlády USA, NATO a Izraele. Důležité je, že údajné důkazy pro toto ohnisko nebyly nikdy předloženy a jaké důkazy existují, naznačují, že ve skutečnosti v listopadu 2019 nedošlo ve Wu-chanu k žádnému propuknutí, což znamená, že zpráva se zdá být do značné míry fikcí.
2. Představení a propagace příběhu o původu čínské laboratoře v lednu 2020, jak je uvedeno výše.

3. Mediální brífinky z počátku dubna 2020 od nejmenovaných zpravodajských zdrojů o listopadových zpravodajských zprávách uvedených v (1) výše. Tyto brífinky byly obzvláště podivné, protože v té době byla hlavním příběhem o původu, který prosazovaly oficiální kanály USA, teorie mokrého trhu, kterou tato informace popírala, protože naznačovala velké propuknutí (epidemie „nekontrolovatelné“ a „kataklyzmatická událost“). před vypuknutím mokrého trhu v prosinci.
4. Koncem dubna a začátkem května 2020 veřejné schválení americké zpravodajské komunity pro teorii přirozeného původu na mokrému trhu . To bylo v rozporu jak s brífinky anonymních médií z počátku dubna zmíněnými v (3) výše, tak s příběhem o původu v laboratoři v (2), a zároveň to uvedlo do rozpaků Mikea Pompea a prezidenta Trumpa, kteří v té době silně prosazovali teorii úniku z laboratoře .
5. V srpnu 2021 byla odtajněna zpravodajská zpráva o původu Covid, která poskytla poněkud smíšený obrázek o tom, jak zpravodajská komunita vyhodnotila teorii úniku z laboratoře. Co však zpráva na první stránce jistě objasnila, je, že virus „nebyl vyvinut jako biologická zbraň“ a „nebyl geneticky upraven“. Zpráva říká, že malý počet prvků IC si myslel, že virus mohl uniknout z laboratoře (ačkoli jako přirozený, nikoli umělý virus); zejména Národní centrum pro lékařské zpravodajství (NCMI), které bylo odpovědné za tajnou zpravodajskou zprávu z listopadu 2019 a (pravděpodobně) anonymní mediální brífinky z dubna 2020, podpořilo tuto teorii s „umírněnou důvěrou“. Všimněte si, že v tomto okamžiku byla teorie úniku z laboratoře zpět ve hřepo vyšetřování původu WHO v únoru 2021.

6. Menšinová zpráva Senátu z října 2022 , která poprvé uvádí důkazy ve prospěch umělého viru a úniku z laboratoře. Za touto zprávou stál americký odborník na biologickou obranu Robert Kadlec , který zejména nezmínil zprávu amerických tajných služeb z listopadu 2019, která se zdá být zcela „zapomenuta“ (ve skutečnosti nebyla nikdy oficiálně uznána). Rovněž se nezmiňovala o značném zapojení Spojených státůve výzkumu netopýřího koronaviru v letech před pandemií. Měli bychom také poznamenat, že důkazy uvedené ve zprávě o údajném porušení bezpečnosti na WIV v listopadu 2019 byly všechny shromážděny zpětně – nic nenasvědčuje tomu, že by takové důkazy byly v té době známy, a zpráva jasně uvádí, že všechny její informace pocházejí z veřejně dostupných zdrojů, kde se uvádí: „Tato zpráva zhodnotila open source, veřejně dostupné informace týkající se původu viru.“

Zde je to, co navrhuji, skutečně probíhalo s těmito často kuriózními a protichůdnými intervencemi IC.

Tajná zpravodajská zpráva z listopadu 2019 (1) měla předem varovat vládu USA a její spojence před možnou potřebou protipatření proti epidemii vzhledem k riziku zpětného úderu z útoku. Zatímco blowback se pravděpodobně nečekal (koneckonců SARS a MERS nikdy netrápily Evropu a Ameriku), bylo to zjevně riziko. Všimněte si, že ti, kdo jsou zodpovědní za zprávu z listopadu 2019, museli vědět, že v té době ve Wu-chanu skutečně neexistovaly žádné důkazy o vypuknutí epidemie, a proto byla jejich zpráva založena na výmyslu. Zdá se, že to do útoku zapletlo NCMI, která zprávu vydala. Anonymní mediální brífinky (3) ze začátku dubna 2020 o zpravodajských zprávách z listopadu 2019 byly s největší pravděpodobností pokusem zpravodajské komunity (nebo spíše NCMI) poukázat na to, že se pokusili všechny varovat před virem a nutností připravit. To by vysvětlovalo, proč pokračovali v anonymních brífincích navzdory tomu, že v té době tyto brífinky odporovaly novému „oficiálnímu příběhu“, že virus pochází z mokrého trhu.

K oficiálnímu schválení teorie mokrého trhu (4) zpravodajskou komunitou koncem dubna a začátkem května 2020 by pak došlo v důsledku přechodu mezi většinou zpravodajské komunity na příběh vytvořený a schválený Anthonym Faucim, Jeremym Farrarem atd. Ti v IC, kteří nebyli zapojeni do útoku (pravděpodobně naprostá většina), pravděpodobně přišli na to, co se děje, tj. teorie úniku z laboratoře byla krycí historka vydaná bezohlednými kolegy a byli by si velmi dobře vědomi strašného dopadu, který by měl pravda vyjde najevo. Proto také v této době vláda USA potlačila všechna vyšetřování původu Covid, o kterých vysoký vládní úředník řekl, že pouze „otevře plechovku s červy“.

Toto napětí mezi prvky IC pak pokračovalo odtajněnou zpravodajskou zprávou z roku 2021 (5), přičemž většina IC tvrdila, že nic neví, ale NCMI stále věřilo, že únik z laboratoře je nejlepší krycí historkou, a chce, aby se vrátil do hry.

V době zprávy Senátu z října 2022 (6) se teorie přirozeného původu jasně hroutila. Tato zpráva pak představuje snahu některých členů zpravodajské komunity přivést zpět únik z laboratoře jako krycí příběh a zároveň zaměřit veškerou pozornost na Čínu a WIV a pryč od USA.

Jak moc je to všechno možné? Rozhodně to odpovídá důkazům, i když možná existuje jiný, nevinnější způsob, jak to všechno vysvětlit. Avšak ti, kteří by chtěli vyloučit možnost biologického útoku USA – a to bych skutečně *rád* vyloučil – si musí odpovědět alespoň na dvě klíčové otázky:

1. Proč byly USA znepokojeny a po vypuknutí epidemie ve Wu-chanu v listopadu 2019, které podle všech dostupných důkazů nebylo v té době zjištěitelné ? Proč USA nepravdivě tvrdily, že došlo k velkému, znepokojivému propuknutí a krátce na to spojenci?
2. Proč americké bezpečnostní služby začaly na začátku ledna šířit fámy o tom, že virus byl vytvořen v Číně, ještě předtím, než byla hlášena první smrt, když o tom neměly žádný důkaz (alespoň nikdy

nevysvětlily, jak to věděly to) a nikdo jiný se tím netrápil a na základě nepravdivého tvrzení, že už se v Číně šíří fámy o americké biologické zbrani?

Budme upřímní: nevypadá to dobře.

It's pretty clear by now what took place, a biowarfare attack against China and Iran which proliferated throughout the world. The US is responsible for the death of millions, not something it wants to take ownership of. The coverups and disinformation will go on for years, just like 9/11. There'll be no justice brought to the perpetrators.

There's a 1.8 in your timeline. It's not a CIA intervention but an international countermeasure that panicked CIA.

Right off the bat the BWTC treaty parties called germ warfare. They immediately produced the documents showing Baric's synthesis of the biological weapon, and development contracted by DTRA and NIAID. That alerted the whole world outside the US iron curtain, and even in the US domain experts like Francis Boyle sounded the alarm.

Obscured attribution was the linchpin of this crime of aggression so CIA was in deep shit. They pivoted wildly from easily rebutted porkies blaming the Wuhan lab to their SHUT UP SHUT UP IT'S NATURE! line. But Russian and Chinese researchers immediately publicized the mad scientists' fingerprints in the germs.

Treaty parties had CIA's Article 1 violations under a microscope ever since the US delegation obstructed verification procedures. Remember the odd OS X malware Fruitfly? Some mook went to prison for hacking grandmas and randos and, uh, mumble mumble unspecified government agencies. As it happens the malware first compromised biological researchers in Battelle's backyard in Ohio.

So CIA hopes to get off the hook for killing a million Americans, but the postwar tribunal is a slam dunk. The CIA Mengeles are gonna swing for this.

Why did Radio Free Asia and the Washington Times introduce and promote the idea of Covid as a Chinese bioweapon? RFA appears to have done so in order to counter the Chinese lack of concern about the virus, hence the heading: “Experts Cast Doubts on Chinese Official Claims Around ‘New’ Wuhan Coronavirus.” The Washington Times report indicates at one point it is in response to rumours “circulating on the Chinese Internet claiming the virus is part of a U.S. conspiracy to spread germ weapons”, citing an unnamed “U.S. official”...

1. Why was the U.S. concerned about and following an outbreak in Wuhan in November 2019 which all the available evidence shows was not detectable at the time? Why did the U.S. falsely claim there was a signal of a large, worrying outbreak and brief allies about it?

2. Why did U.S. security services begin spreading rumours about the virus being engineered in China at the beginning of January, even before the first death had been reported, when they had no evidence of this (at least, they have never explained how they knew it) and no one else was worried about it, and based on the false claim that rumours were already being spread in China about a U.S. bioweapon?

Because they're Globalist psychopaths? A better question is, What was a US-Neocon/Globalist front bioweapons lab doing in Wuhan? Why was the Chinese Communist Government letting Satanists/sociopaths do experiments on their population? Why were the same Satanists allowed to do experiments on, say, civilian nuclear “Downwinders” around Hanford, WA in WW2 and the Cold War?

It all comes down to the usual suspects engaged in human experimentation and manifesting Satanism/collective sociopathy. It *always* comes down to the usual suspect manifesting Satanism/sociopathy. The Chinese dogs, like the WASP dogs, like so many dumb animals down through history before them think they can keep the Satanists on a leash. They can't.

That dog needs to be put down, along with it's “owners.”

USG was running the Chinese lab which leaked the virus, so what happened was: having done it first hand, they knew what happened. It's an American biowarfare lab, it's just *in* China, because doing it on imperial heartland is legally sticky.

It leaked due to Han incompetence, though. Fraud is endemic in the country, and some lab tech tried to defraud Nature. "If nobody's watching, I don't need to obey the biosafety protocols, right?" Nature is always watching. Trying to run a level-4 lab in China is a plain stupid thing to do.

It's fine, the virus was never dangerous. They tried to "gain" its function, but it hardly gained any function at all, because the USSA lives up to the high quality standards Communism is known for.

@Chris Moore

Why was the Chinese Communist Government letting Satanists/sociopaths do experiments on their population?

The "Chinese Communist Government", like all governments, will do anything for a buck, including questionable projects at the WIV. Having said that, I think there is little evidence that they "let(ting) Satanists/sociopaths do experiments on their population."

Hmm... I would believe almost anything of the western ruling elites, although this seems a bit over the top even for them. And at this point the issue has been so muddied with lies and propaganda that we will likely never know for sure what happened.

But my personal hunch is that the US was funding gain-of-function work in China, not as specific bioweapon research, but just because it is “sexy” and exciting and easy to get funded. ALL of these “high security” labs leak like sieves (China’s and America’s both, trust me). Surely Fauci and his colleagues would not want to get blamed for starting this, so of course they work hard to promote the natural origin theory.

I also point out, that we need to be very careful in our use of the term “bioweapon.” What’s the difference between a medical lab making more deadly human viruses to try to better understand pathogenetics and develop better vaccines, and a bioweapons lab making more deadly human viruses for use as a military weapon? Answer: the name.

I propose that ALL labs doing viral and bacterial gain-of-function work be reclassified as “bioweapons” labs, in order to focus our minds on just how risky these enterprises are.

in 2015 ralph baric (working for fauci's nih as well as darpa) received a patent for attaching bat spike proteins to an existing coronavirus but by the time they received the patent, the inherently dangerous gain of function research had been outlawed in the u.s., so fauci decided to move the project to wuhan and he ran the funding through several ngo's to disguise the paper trail.

in 2017 trump's pick for the head of hhs was forced to resign because of the plea deal he arranged for jeffery epstein (that he claimed was asked for by the fbi, as he was an asset). this was at the height of the me-too movement and that caused his resignation as the director of hhs. during the couple of months the agency was without a director, fauci was able to backdoor in gain of function research back into the u.s. and baric resumed his dark research at ft. detrick and unc chapel hill. later that year fauci tweeted that the trump administration would face a major pandemic in his term.

jan 2019 operation crimson contagion, late oct 2019 event 201, both table top exercises involving the outbreak of a novel coronavirus in china, that rapidly spreads around the world. two weeks later we have the wuhan military games, in which the u.s. was embarrassed by the miserable performance of the team, perhaps they weren't there to compete at all. this was just about the time of the first known outbreak (after a two week incubation period) in wuhan.

this was a set up from day one. they knew the wuhan lab was working with covid because they paid them to. attacking china and their economy was only part of their dark plan. after purposefully botching the first test rollout, dragging their feet, refuse to let state authorities to test without the official cdc tests, confusing, contradictory advice on masking, they insured the

spread of the disease as widely as possible. making ivermectin and hcq illegal insured many more fatalities that were necessary but more importantly, as an existing treatment, this would deny them the emergency use authorization (they never would received authorization if it had to go through full clinical trials) necessary to push their gain of function mrna genetic engineering experiment they passed off as a “vaccine”, although the cdc had to change the definition of vaccine to fit their frankenshot. the same people that created this bioweapon used the same technology to create this horrific ”inoculation”, and are profiting from all the mrna based poison.

No virus leaked. There is no covid. Some people got the flu. Like normal.

I love how the responders on here didn't even read the article.

The upshot of the article is, for the reading-challenged: “The fact that the US government itself first spread the rumor of Chinese lab leaks proves that the leak rumor is a lie.”

Sheesh.

I think there was genuine confusion in the scientific and intelligence communities about the origins of the virus in the early stages of the pandemic, because at the time it wasn't known yet that the virus could also infect other mammals other than just bats, that were more prevalent at the Wuhan market than bats:

Mammals **now** known to be infectable with the virus — **including red foxes, hog badgers and raccoon dogs** — were all sold live in the market, the team showed.

– <https://archive.ph/q1e77#selection-1379.0-1379.154>

Michael Worobey of the University of Arizona, who co-authored both papers, had **previously called on the scientific community in a letter to be more open to the idea that the virus was the result of a lab leak.**

**But the findings moved him “to the point where now I also think it’s just not plausible that this virus was introduced any other way than through the wildlife trade at the Wuhan market,”** he told reporters on a call.

– <https://archive.ph/q1e77#selection-1333.0-1349.215>

Two lineages, A and B, marked the early pandemic.

But while A was closer to the virus found in bats, suggesting the coronavirus in humans came from this source and that A gave rise to B, **it was B that was found to be far more present around the market.**

– <https://archive.ph/q1e77#selection-1429.0-1433.202>

The two following papers are what this natural, Wuhan animal market origin of the virus conclusion is based upon:

**The Huanan Seafood Wholesale Market in Wuhan was the early epicenter of the COVID-19 pandemic**

26 Jul 2022

<https://www.science.org/doi/10.1126/science.abp8715>

**The molecular epidemiology of multiple zoonotic origins of SARS-CoV-2**

26 Jul 2022

<https://www.science.org/doi/10.1126/science.abp8337>

As a reminder, even the Chinese government was aware of the dangers of the exotic animal trade and these “wet markets” and had banned most of it after SARS, but the exotic animal trade/industry lobby in China is/was extremely powerful and well-connected, so this practice and tradition was never completely shut down and bans were lifted, which ultimately very probably was the origin of the 2019 virus:

### **How wildlife trade is linked to coronavirus**

Mar 6, 2020 by Vox 23+ million views as of January 2023

*“The majority of the people in China do not eat wildlife animals. Those people who consume these wildlife animals are the rich and the powerful –a small minority.”*

“How plausible is all this? It certainly fits the evidence, though perhaps there is another, more innocent way of explaining it all.”

The six main interventions of the U.S. intelligence community, during the pandemic, that you listed, also well fits a deeper explanatory narrative:

These actions by the U.S. intelligence community could be seen as supportive of the success of the upcoming vaxxo-shite program, first before the vaxx roll-out, and then after the roll-out began. Different false narratives needed at the various junctures, in order to eventuate the success (as judged by # of arms jabbed) of the upcoming pre-planned vaxxo-shite coercion. The added bonus of this deeper explanatory narrative, is that, circa the summer of 2020, it was deemed rather nuts to harbor even limited (i.e. – deemed not likely) suspicions as to the reality of an upcoming pre-planned vaxxo-shite coercion, ..... yet that is precisely what ended up happening. The ample evidence of lying and misdirection => production of worse-case but unlikely conjectures among some people, like myself, by summer of 2020, that perhaps, as unlikely as it seems, this was all about officialdom finessing the success of the upcoming pre-planned vaxxo-shite coercion => that unlikely eventuality, did in fact occur .... so what about that?

When something otherwise unlikely, is predicted by way of a prior evidentiary thread, and then does indeed occur despite being otherwise very unlikely ..... the onus is on parties arguing against this stance, to show how it is flawed. It is not flawed, as far as I can tell. The American intelligence community (and all

the intelligence communities across the entire faux-west) orchestrated this fiasco in order to force the vaxxo-shite coercion.

It is beyond doubt that the USA's fingerprints are all over this pandemic, from the reports of teenagers with "glass lung" X-rays in February and March 2019, to the sudden closure of Fort Detrick in August 2019, along with the, now proven, American involvement in the early 1960 swine flu epidemic in China (ably assisted by their Japanese allies in fact). Added to this the discovery of between 19 and 42 bio labs in the Ukraine doing experiments on Russian tissue samples. I have read Senator Kennedy's book on the matter, and it is a real eye opener.

Pretend I'm Howard Beale here.

There is no China. There is no America. There's only money. SOME Chinese always get money. And SOME Americans always get some too. Losing a few hundred thousand Chinese OR Americans will not bring a tear to the people who get the money. No matter where.

In WWII there was a biological lab run by Japan called Unit 731. Were they war criminals? Yes. Did they hang for their crimes? No. America hired them and gave them a raise.

People who think in terms of “countries” and “nations” are so... behind the curve. Think: American biowar labs have branches in their own country, plus Ukraine, China, Japan, EVERYWHERE.

In a sane world these people would hide out in caves, or be stoned to death. In this one, they rule.

It is a truism that in order to prove one's guilt in a criminal trial it is necessary to show that the perpetrator had the "means, the motive, and the opportunity". A crime would not have occurred had the perpetrator not had the tools necessary to commit a crime (e.g., the weapon), the actionable idea to commit the crime, and an unencumbered chance at following through on intention.

Where do we find all three together?

– Motive: The 1996 neocon Bible, the "Project for a New American Century (PNAC)", unambiguously stated, "advanced forms of biological warfare that can 'target' specific genotypes may transform biological warfare from the realm of terror to a politically useful tool."

– Means: Fort Detrick was the center of the U.S. biological weapons program from 1943 to 1969. Since the discontinuation of that program, it has hosted most elements of the United States biological defense program. In August 2019, its deadly germ research operations were shut down following serious safety violations, in particular relating to the disposal of dangerous materials.

– Opportunity: The Chinese government publicly promoted the notion that the US military brought the virus to China. Maatje Benassi, a US Army reservist and mother of two, has become the target of conspiracy theorists who falsely place her at the beginning of the coronavirus pandemic, saying she brought the disease to China in October on the occasion of the Military World Games, hosted by Wuhan, the Chinese city where the coronavirus outbreak began last year.

Letting dumb communists do dumb communist things is definitely part of the strategy to contain China. Lockdowns were part of the Chinese struggle to hold down opposition and manage internal conflicts for many decades. So if China is seen as a threat why not weaponizing the Chinese willingness to self-destruct and blame it on the Chinese? China only needs to go back to the communist agenda from back in the day to strengthen the US position. And Europe that tries bond with China to limit American influence would be hit as well.

There are three events this century that stand above the rest: September 11th, Covid-19, and Russia crossing the Rubicon. All three have their origins in something beyond what the mainstream puts out, but they all share the same DNA: Jewish audacity. Art students had a presence on 9/11. Everyone knows the Nuland people have been agitating endlessly in Ukraine. Why not also consider tribal involvement when it comes to a biological attack? Mr. Unz has noted the curious early outbreak of Covid among Iran's leadership. There is another country in the Middle East with an intense hatred of Iran. Why not also consider the involvement of art students when it comes to Covid?

Not so sure it is clear by now that “a biowarfare attack against China and Iran” took place.. need some evidence Up until now the big concern has been gain of function research. i have not heard much about research trying to engineer microbes into weapons.

Comments on several websites said Russia filed with the UN several different complaints about several licenced or funded facilities operating in Ukraine. I recall the comments claimed the Russian UN filings contained considerable evidence but did not identify either evidence or the nature of the evidence. AFAIK no one has answered the Russian Complaints or looked into the evidence and claims Russia made, if Russia did in fact file complaints? I wonder if China has filed anything with the UN? where can what Iran filed be found?

I agree exposing global bio lab operations is in the public interest.

“This means we can see that the Covid lab origin narrative originated with the U.S. Government’s security services, and did so very early, prior to the first death, as part of a deliberate effort to increase alarm in China and elsewhere. It was also designed to counter the anticipated claims, which had not yet been made (though the anonymous U.S. official falsely claimed they had been), that the virus was a U.S. biological attack.” quote from WJ.

Obviously there is research going on.. Where and in what class of facility such research is being conducted and what the intentions of each facility or research project might be has yet to be revealed to the public. good article

The lockdowns despite initial and continued support have recently really been pissing off a large part of the population due to so many small business owners taking such a massive hit. This has fed into a brief and minor threat from the remnants of the Shanghai Clique that opposed the more hard-line policies of the past 5 years or so, but this was also recently addressed with a more relaxed lockdown policy and the current powers are now in a better position for the future. I reckon for the best too otherwise with the Clique in charge Blackrock would be blasting up property prices to make a quick buck and introducing all sorts of cultural enhancements.

Their government is run largely by PhD engineers, the West by lawyers... whose the dumb ones now?

jan 2019 operation crimson contagion, late oct 2019 event 201, both table top exercises involving the outbreak of a novel coronavirus in china [sic]

**Wrong. Crimson Contagion did not involve the simulated outbreak of a novel coronavirus.**

Crimson Contagion was a joint exercise conducted from January to August 2019, in which numerous national, state and local, private and public organizations in the US participated, in order to test the capacity of the federal government and twelve states to respond to a severe pandemic of **influenza** originating in China.

Influenza is caused by influenza A and B viruses , while COVID-19 is caused by the (once) novel coronavirus designated SARS-CoV-2. It's apples and oranges, in other words.

In the future, please write in Standard English using capitalization and punctuation. I usually skip over sloppy posts like yours because they commonly include misinformation, as yours does.

The origins of the covid pandemic narrative lie within a network of NATO scientists (Drosten, Holmes, Koopmans, Rambaut and others).

If you don't understand the basics of virology and genome sequencing (and it's clear that none of the authors on this site do), all these theories about "lab leaks", "origins of covid" or "escaped or released biowarfare weapons" are more nonsensical than flat earth theories.

There are only two ways to determine origins:

1) in the event of a lab incident that causes harm to humans there will be an undeniable clinical trail. Thousands of lab accidents happen every year. They include: escaped animals, animal bit researcher, chemical spill, researcher stabbed himself with a syringe by accident, etc. Not one has ever led to people dropping dead while walking down the street which is what WESTERN MEDIA wanted you to believe about China in early 2020. Most lab accidents are resolved easily enough. Viruses cannot "escape" from labs nor is there any mechanism to "release" them. Viruses are identified through a process of centrifuge of nucleic acids and proteins and then applying fluorescence techniques to identify what you're left with. It's not like moldy cheese sitting in your fridge that you can try and feed to someone to poison them.

2) Analysis of history of genome sequences (phylogenetics) is a MATHEMATICAL MODELLING exercise. Outcomes depend on your model assumptions, the software you use, the parameters etc.

It is 100% conjecture and results are easily manipulated. Moreover, we are talking about very large and very messy datasets with all the consequent problems of analyzing big data.

**YOU DO NOT NEED A NEW VIRUS TO CREATE FLU AND PNEUMONIA PANDEMIC IN FLU SEASON.** You simply need to do a lot of scaremongering in the media, create panic, have hordes people rushing to hospital at the slightest cough and overwhelming the system.

If you can also send family doctors into hiding in their basements, suppress debate, deny use of basic medicines and tell people to wait ten days before seeing a doctor when they have a high fever....Bob's your uncle.

The pandemic plans were described in minute detail in 2019 at Event 201 and they were followed to the letter.

Blaming China was part of the geopolitical cold war against China.

So China hit back and blamed the US and we all got mired in this stupid and endless discussion about biowarfare and lab leaks and origins.

Scientists are by and large not that smart. They can't cure cancer without nuking you and they can't release or develop bioweapons without harming themselves.

If you don't believe me, just ask yourself this question: how many colds and flus have you or your close family had in your life? How many times did a team of scientists show up at your doorstep to take some lung fluid from you and identify the exact offending pathogen?

I'm willing to bet the answer to question number two is ZERO.

That team of "Chinese" scientists who published the first covid sequence include AUSTRALIAN Edward Holmes who is a close colleague of Christian Drosten. Drosten's team published the first ever covid test protocol within a day of Holmes publishing the genome sequence.

1. Why was the U.S. concerned about and following an outbreak in Wuhan in November 2019 which all the available evidence shows was not detectable at the time? Why did the U.S. falsely claim there was a signal of a large, worrying outbreak and brief allies about it?

The “U.S.” did not make any of these claims.

In fact, it was ABC News that broke the bogus story in April 2020 about an alleged NCMI report from Nov. 2019, but the head of NCMI at the time, Dr. Shane Day, an Air Force Colonel, subsequently made an unequivocal statement that “no such NCMI product exists.”

If there really were such a report, surely by now one or more of those allegedly briefed allies would have stepped forward with some kind of follow-up to this story about the alleged briefing, which like the alleged NSC briefing, almost certainly did not occur.

There was no pandemic or even any outbreak in Wuhan in Nov. 2019. There was nothing to see or hear or report. Period. Full stop.

Nobody has this alleged report, and nobody claims to have seen it, other than a few, still unidentified media people.

Okey Dokey.

This whole fandango with its glaring internal inconsistencies and phantom sources is entirely a product of the MSM and some bad actors. Any party with access to highly classified government documents would have been able to put together a much more convincing hoax than this one.

The lab leak theory is a diversion to mislead the people, covid-19 does not exist, it is an illusion created by the Rockefeller and Gates Foundations, the CDC, the WHO, UN Agenda 2030, the WEF, etc., etc., to terrify the people into getting the MRNA genocide shots. These demons did not have to have a real threat to get people to kill themselves, all they had to do was produce the illusion and the deal was sealed.

Covid-19 is the flu and colds and pneumonia renamed, millions of illegals are allowed to cross the border and not one had to take the genocide clot shot, members of congress and their staffs are exempt, members of the UN are exempt, as are the WHO, the CDC, the NIH, etc., etc., it is all a scam an psyop, the biggest scam and psyop in the history of the world, this is not about health, it is a depopulation agenda, driven by some of the most evil demons in the history of the world.

@Alrenous

USG was running the Chinese lab which leaked the virus, so what happened was: having done it first hand, they knew what happened. It's an American biowarfare lab, it's just in China, because doing it on imperial heartland is legally sticky.

So if that's the case what was the pathogen responsible for the outbreak of an "unknown respiratory illness" (with covid-19-like symptoms) that sickened 82 people and killed 3 at the Greenspring Retirement Community in Springfield Retirement Community in Springfield, VA in June and July of 2019?

And why did the U.S. "government" fail to report the outbreak to the World Health Organization (WHO) as is apparently required of it under IHR(2005) rules?

Why do we continue to ignore extremely obvious and relevant facts:

-CDC closed USAMRIID at Ft. Detrick in mid 2019 due to containment breaches involving a [redacted] pathogen or toxin. They fired the facility's commander and kept it closed for months for retrofitting.

-This shutdown was followed by an epidemic of novel pneumonia with symptoms identical to COVID. There was no way to test for this disease, and the CDC could not say what caused it, but they associated it with vaporizers and called it EVALI.

-During the same period an unprecedented number of summertime respiratory outbreaks occurred in the U.S. which were NOT associated with vaporizers. Even Kary Mullis died of pneumonia at the height of summer.

-By the end of 2019, the CDC was warning about the earliest and worst flu season in decades. Anecdotally, many people will tell you that they had the worst respiratory infection of their lives sometime around December 2019. By February 2020 EVALI had disappeared in the U.S., just in time for COVID to officially take its place. The CDC has been the gatekeeper for all this information about USAMRIID, EVALI, 2019-2020 flu season, and COVID.

So we have a documented lab leak. We have a documented epidemic of novel pneumonia in the summertime. If SARS2 leaked out of Ft. Detrick, it would perfectly explain the foreknowledge displayed at Event 201. It would also explain why

China has essentially cooperated with this cover up every step of the way. Because it's not really an act of war – it's just a massive globalist fuck up.

I used to think that maybe SARS2 is a self spreading HIV vaccine, but on further consideration, I think the HIV proteins were only added to SARS2 to facilitate and strengthen ACE2 receptor binding. SARS2 appears to be a bioweapon without a payload: a missile without a warhead. It stills damages and kills some people. But if this chimera had been loaded with other genes, like from Ebola, the IFR would have been orders of magnitude higher.

As for the vaccine, I think it only ever had one purpose, which is to force mutations on the chimeric SARS2 spike protein so that it will not have a natural reservoir when it becomes endemic. Everything ever claimed about the vaccines was a “noble” lie. Everyone who has been killed or injured by the vaccines is collateral damage.

Thank you for your comment. Do you think the fact that the Military Olympic Games, which were held in Wuhan around November 2019, have any relevance to your comment or to the whole affair? It is known that the US delegation was housed 5 minutes from the wet market. Also, the delegation was over 300 members and they did not win one medal between them. The Chinese knicknamed them “Soy Boys.” With the type of services we have, Seals. Rangers, Recon Marines. we couldn’t find one volunteer to win a Bronze in shooting? Instead we sent what seemed to be a bunch of desk jockeys. Could they have been the vector?

Do you think the fact that the Military Olympic Games, which were held in Wuhan around November 2019, have any relevance to your comment or to the whole affair?

This idea has been voided as timelines have shifted (due to better data).

- The Military Games were in October.
- The Patient Zero date was late November or early December.

Even Mr. Unz will concede this no longer works as a “release concept”.

the [U.S.] delegation was over 300 members and they did not win one medal between them.

Those with sufficient skill to go Professional leave the American military to cash in. The U.S. is notorious for poor results in these types of events.

Sparkon, the Israelis confirmed that November report right away. It was an analysis of hospital parking lot density used as a predictor for pandemic. I looked at the photos closely because I am an expert at hospital parking lot density after a lifetime of parking in them.

Two things were obvious. First, there was no appreciable difference in parking lot density and second, you would have to get out to a rural hospital in USA to find a parking lot that empty

We know Fauci approved and funded “gain-of-function” research at Wuhan.

But if the lab leak was the intended cover story, why was it shortly afterwards suppressed as a ‘conspiracy theory’? It is a matter of public record that this occurred largely due to the efforts of Anthony Fauci

Fauci does something that would raze and plunder his reputation, then tries to cover it up. Too incompetent to keep his labs sealed, and too incompetent to keep his underlings from accidentally reporting inconvenient truths. ￣\\_(`ツ)\\_/￣

I see the cover-up as a confession. “Oh shit that was me, make sure nobody finds out!” If it wasn’t him he could have pushed the truth to throw his rivals under the bus instead.

It's not like moldy cheese sitting in your fridge that you can try and feed to someone to poison them.

The point of biosafety-4 protocols is that respiratory viruses are exactly like that. Worse, in fact. If you spill a can of coronavirus you can absolutely cause a pandemic. It's not like it's guaranteed but it's very, very far from impossible.

Or rather, an **endemic**, as coronaviruses have been known to be endemic since the 1960s.

If, for example, a researcher improperly takes a sample home for whatever reason, and then the seal is damaged or otherwise compromised (e.g. they trip) while they're trying to smuggle it back in – there you go, that's your ground 0. Unless they confess, there are no records. Maybe their boss notices the damaged sample, tracks it down and gets the story, and tells Fauci they may have a problem – over a secure phone line. Maybe.

The most plausible suggestion for the spread of ncov to date is sewage treatment plants. It goes into toilets, the plants aren't sealed, so they create a plume of virus, which then settles on nearby neighbourhoods and cheerfully bypasses silly things like masks. Major evidence: they keep finding it in deer and stuff, and you can't exactly accuse wild animals of failing to keep social distance from humans. (Fun fact corona easily spreads 12 feet; six feet of distance is pure theatre.)

When you spill a jar of coronavirus, you make a miniature plume of it.

...

Two things were obvious. First, there was no appreciable difference in parking lot density and second, you would have to get out to a rural hospital in USA to find a parking lot that empty .

The same Daily Sceptic editor had published an earlier piece carefully analyzing some of those same issues:

Of course the Israel government has confirmed nothing, nada, zilch. One MEDIA outlet in Israel “claimed” the report existed. However, they have not been able to produce a single page of it.

This is similar to the American MEDIA claims in **APRIL about something that supposedly happened in November**. Not a single page has shown up from the U.S. version of the Lügenpresse.

Odds are the NCMI document does not exist at all. Or, as Sparkon suggests, it was not from a date in November.

**Rumors about a mythical document** that was shared with incredibly leaky NATO **are very unconvincing**. If such a document existed as purported, some or all of it would have leaked to the public by now.

The question about the disinformation becomes, “Were the media outlets tricked? Or, complicit?”

This shutdown was followed by an epidemic of novel pneumonia with symptoms identical to COVID. There was no way to test for this disease, and the CDC could not say what caused it, but they associated it with vaporizers and called it EVALI

My theory about this is that yes, EVALI symptoms closely resembled those of SARS-CoV-2 infection, and this could have been a potency/effectiveness test-run without the FCS [= furin cleavage site], thus making the vector non-infective and distributed via black-hat polluted mail-order vaping liquid, delivered by users direct into their lungs. [Mr Unz has never agreed with this theory.] rgds

@obwandyag

I tend to believe the Judy Mikovits suspicion that the original outbreaks were caused by toxic flu vaccines in the fall of 2019. All they had to do is to put more crap in the shots than they normally do. This does not sound as sexy as the lab leak theory but it is much closer to the truth. Needless to say, when Fauci and his friends fart, it is much deadlier to the public, than their so called gain of function BS.

Even the Covid shots did not seem to kill as many people as they wanted. Thank God for making psychopaths so mediocre.

@Alrenous

More than 200 viruses are known to cause cold-like symptoms. One of them mutating at an inconvenient moment is extraordinarily plausible.

Seriously? Not nearly as “extraordinarily plausible” under the circumstances as the idea that the pathogen responsible was SARS-CoV-2.

They didn’t report it because USG is amazingly corrupt. All-time world-champions of corruption.

That’s not an explanation, that’s just hand-waving. Why should generic U.S. “government” “corruption” prevent the CDC from fulfilling its routine responsibilities but not the U.S. post office, for example?

In any case, if generic “corruption” is somehow the reason why the U.S. “government” didn’t fulfill its legal obligations under IHR(2005) regarding the outbreak in Virginia, why didn’t the generally-recognized-as-very-corrupt government of Argentina also fail to fulfill its responsibilities under IHR(2005) when a similar outbreak of a mysterious respiratory illness occurred there in August 2022?

[https://en.wikipedia.org/wiki/Corruption\\_in\\_Argentina#:~:text=In%20Transparency%20International’s%202021,\(%22highly%20clean%22\).](https://en.wikipedia.org/wiki/Corruption_in_Argentina#:~:text=In%20Transparency%20International’s%202021,(%22highly%20clean%22).)

<https://www.reuters.com/world/americas/who-monitoring-cases-pneumonia-unknown-origin-argentina-2022-09-02/>

Rules? What are those? The WHO works for USG, not the other way around. If it complains too much about USG breaking the rules, it’s the WHO who will get into trouble, not USG.

Why break the “rules” in this case, just to unnecessarily make yourself look suspicious while trying to put the blame on someone else? That doesn’t make sense. The point is that the corrupt U.S. “government” apparently did not fulfill its legally binding obligations under IHR(2005) not because “shit happens” (or fails to happen) but because the U.S. “government” has something to hide.

| Old folks dying of random colds is the most normal thing in the world.

ROTFL! What do “old folks dying of random colds” have to do with the subject of the U.S. “government” suspiciously failing to identify the pathogen responsible for the outbreak of an unknown respiratory illness in VA and suspiciously failing to fulfill its obligations under IHR(2005)?

Evidence that this was a bioweapon attack—most likely by elements of The Mossad and their obedient vassal agency, The CIA—is very strong, and Ron deserves full credit for illuminating this.

Street Level Questions: If you're going to get your bioweapon on, why use such a pisspoor bioweapon? And if the argument is that it *was*, in fact, a devastating bioweapon, why wouldn't its unleashers be afraid of getting got by it? Let me guess, they had early access to the vaccines that don't really work? And surely they didn't think that the bioweapon would remain contained in the target areas, so... how did they think this would hurt the targets without hurting their own territories? Or was that collateral damage they were more than willing to accept, especially with the trillions in profits that would come from the vaxx sales?

<https://nypost.com/2021/06/28/scientist-who-worked-in-wuhan-cant-rule-out-covid-lab-leak-theory/>

All that's happening was that the Neocon *NY Post* was putting an extremely misleading spin on Dr. Anderson's *Bloomberg* interview, which presented exactly the opposite conclusions. Just read the actual interview yourself and you'll see what I mean:

<https://www.bloomberg.com/news/features/2021-06-27/did-covid-come-from-a-lab-scientist-at-wuhan-institute-speaks-out>

She describes the WIV safety precautions as outstanding, better than those in her own Australian lab, and says she's extremely skeptical that the virus was created at WIV or that there had been any lab leak.

She's actually the strongest single eye-witness *against* the lab-leak hypothesis, and the *Post* is merely pretending otherwise. Their story is much like those they ran about about Saddam's WMDs twenty years earlier.

@Alrenous

Nice try, but the virus spread cannot work that way!

All the 'sewage treatment plant' aerosol exposed to the air will be dead in less time it can spread.

So, no, I am am not buying the sewage treatment plant theory, especially when there was nothing to worry about. In fact, we cannot even prove the existence of SARS-CoV-2, although, perhaps all the health authorities want is an mRNA positive test that can be from anywhere.

All those stories of people falling over in China were published and disseminated by Western media.

Have you seen anyone dropping dead of covid while walking down the street wherever you live?

Definitely some NATO assets in China (e.g. George Gao head of China CDC who was at Event 201) were used to get the ball rolling in China but do not equate that to the Chinese government which was a target of the psyop. Remember China was blamed for sars 2003 and generally it is in the crosshairs for anything it does. So I believe the government a) relied on ridiculous info fed to them from pandemic architects like George Gao and others b) were trying to save face to not be blamed for another sars event. The big difference between China and the free world\_\_

-they did not massage their data and they had very few deaths after the initial panic period in Wuhan. They were accused of “covering up deaths” but in fact they had discovered that it was just the flu.

-they threw everything they had at TREATING ill people rather than having their doctors disappear into hiding.

The decisions made by people at the top are only as good as the info they get and I’m sure the Chinese government was given a lot of garbage along the way. China has any number of ambitious scientists who see their careers grow by being aligned with Western interests.

None other than Malone admitted on Joe Rogan that he first heard of the pandemic at the end of December 2019 because he got a call from CIA asset Michael Callaghan who was in Wuhan. And yet Rogan did not ask him what on earth this Callaghan was doing in Wuhan....

@gay troll

remember that operation crimson contagion was started in jan 2019 and ran through aug of 2019. ft detrack was shut down in aug 2019, so this dark plan was already proceeding by then. perhaps the shut down due to a lab leak, was just a cover story, allowing the darpa boys to concoct enough of their vile poison without any oversight. two months later, event 201 (attended by john bolton, even though he had been fired two months earlier), the final dress rehearsal before the military games in wuhan. skirk's reply seems entirely plausible and the outbreak in a nursing home, 50 mi from ft detrack could well have been a testing ground as well.

imo the chinese weren't in on it, as evidenced by their refusal to use mrna based "vaccines" and development of a traditional vaccine that proved at least effective as the clotshots (if you believe the propaganda from pfizer).

[@Notsofast](#)

| remember that operation crimson contagion

Remember that the *Crimson Contagion* exercise was a FAILURE. It provided massive evidence that an infectious disease in China would jump the Pacific to wreak havoc in America.

The existence of *Crimson Contagion* is strong evidence that the WUHAN-19 virus was **\*NOT\*** an attack. It more or less proves that there are only two viable explanations:

-1- Zoonosis

-2- Unintended release (not necessarily a laboratory “leak”) from WIV or another nearby facility.

The most likely scenario for #2 is low paid, non-scientist staff stealing apparently healthy animals from the destruction queue. They were then sold at the Wuhan Wet Market.

The “lab floor” single source, Danielle Anderson, is limited by the fact no one will corroborate her “lab floor” assertions. Plus, there is no reason to believe she has specific knowledge of the weakest point of the facility away from the “lab floor”. It does not matter how good the “lab floor” techniques are if the unintended release is not the “lab floor”.

Petty theft of animals is also a highly credible explanation for how the WUHAN-19 virus made it ~8 miles from WIV to the Wuhan Wet Market. The transit was a deliberate part of the criminal exercise, not an accident.

PEACE

@Old and Grumpy

Did anyone in China actually fall over dead in the beginning of the Covid thing? The videos of such collapses were all over the internet. Would love to know the answer because if it is none, then China was involved in a psyop that ultimately lead to a failed but dangerous vaccine. Maybe it is time to ditch the nation state paradigm here.

All those stupid videos were widely promoted and distributed by anti-China activists and anti-China websites and anti-China Tweeters. They were almost certainly produced by anti-China organizations and intended to make it look like China was collapsing due to the Covid epidemic. I think the Falun Gong and other groups like that were involved.

The notion that Chinese government itself produced videos making it look like their own country was falling apart is so astonishingly stupid that only the most gullible American rightwingers could possibly fall for it.

First they all fell for the ridiculous videos produced by anti-China activists, then they fell for the claim they'd been produced by the Chinese themselves.

@One Nobody

Thank you for your comment. Do you think the fact that the Military Olympic Games, which were held in Wuhan around November 2019, have any relevance to your comment or to the whole affair? It is known that the US delegation was housed 5 minutes from the wet market. Also, the delegation was over 300 members and they did not win one medal between them. The Chinese nicknamed them “Soy Boys.” With the type of services we have, Seals, Rangers, Recon Marines, we couldn’t find one volunteer to win a Bronze in shooting? Instead we sent what seemed to be a bunch of desk jockeys. Could they have been the vector?

I think it’s quite likely that the Games were used as cover, allowing a couple of American operatives to spread the virus, but much of what you’re saying is false information promoted by pro-China propaganda-activists and widely distributed on the Internet. You might want to take a look at some of my own articles on these issues:

@Sparkon

Wrong. Crimson Contagion did not involve the simulated outbreak of a novel coronavirus.

You're being silly. Robert Kadlec, America's leading biowarfare expert, spent eight months from January to August 2019 running Crimson Contagion, aimed at preparing America for leakage if a dangerous respiratory virus happened to suddenly appear in China. Exactly that sort of virus then appeared in Wuhan a couple of months later, which seems extraordinarily suspicious timing.

Whether the virus was a coronavirus or a flu virus was entirely immaterial with regard to the defensive preparations.

@mulga mumblebrain

Common sense says most are not best described as bioweapons labs evenif very little that goes on at any of them might not contribute to knowledge relevant to biowarfare. The security requirements alone wrt both the wrong people getting sick and the dehence/warfare aspects, would limit the numbers. Then why so many labs in Ukraine? Because that's where the Soviet Union had them when US public servants or scientists saw the chance to pick them up cheap with the added bonus of being able to operate so.ething without much Congressional or other official oversight. I am referring of course to the concentrated attention on Ukraine.

@mulga mumblebrain

That's ridiculous on a couple of levels. The idea that China needs to fear destruction by anyone, including the US, is absurd and paranoid. And who's blaming China for etc? Who, apart from RU,thinks there was a bioweapon attack? The overwhelmingly probable cause of embarrassment – if for anyone – lies in the joint efforts to do gain of function research at Wuhan – which many individuals thought it in their interests to cover up with obfuscation.

@Ron Unz

My point was merely that Kadlec's Crimson Contagion *did not* simulate an epidemic or pandemic from a *coronavirus*, as has been falsely claimed by some here, obviously to support the fantastic idea that SARS-CoV-2 was created in a lab to unleash against China using the Wuhan Games as cover.

The satellite parking lot data is interesting but inconclusive, in my view, and the authors acknowledge its limitations for Wuhan in the period under scrutiny 2019 – 2020.

The use of satellite data does come with limitations that are amplified in densely populated urban areas. The presence of tall buildings cast shadows that block the view of parking lots, requiring images to be taken at noon local time and exactly overhead. Wuhan experienced a significant amount of cloudy weather during November to February 2019 [sic] which along with the consistent smog, created limitations in high quality images that could be harvested

Their Baidu search engine data is even more interesting as it shows an uptick in Internet searches for “cough’ and “diarrhea” in Wuhan beginning in August 2019. I don't know why the authors didn't include “fever,” but if this data from August 2019 has any merit, it at least rules out any role of the Wuhan Games or its athletes, and tends to support the entirely natural emergence of SARS-CoV-2 and COVID-19.

Analysis of hospital traffic and search engine data...

Using molecular dating tools and epidemiological simulations, researchers ... estimate that the SARS-CoV-2 virus was likely circulating undetected for at most two months before the first human cases of COVID-19 were described in Wuhan, China in late-December 2019.

[...]

“Our approach yielded some surprising results. We saw that over two-thirds of the epidemics we attempted to simulate went extinct... **This finding supports the notion that humans are constantly being bombarded with zoonotic pathogens.**”

[my bold]

Novel Coronavirus Circulated Undetected Months before First COVID-19 Cases in Wuhan, China

| Who, apart from RU,thinks there was a bioweapon attack?

Didn't you actually bother reading this very article? It certainly seems to point towards exactly the scenario I've been describing for almost three years now, and a couple of previous articles by the same writer also raised the same very dark suspicions.

The author is Dr. Will Jones, a British Ph.D. who's the editor of *The Daily Sceptic*, a well-regarded science-oriented webzine founded a couple of years ago by Toby Young, a longtime British journalist and public intellectual.

Over the last couple of years quite a number of reasonably prominent people have privately told me that my analysis seems pretty plausible. But this is just about the first time several articles along exactly those lines have appeared in print, so I'm extremely pleased with this important development.

I strongly suggest that you reread the article and also notice that I'm not the author.

Of course, this means this was done with the full knowledge of the Trump Administration, which blamed Gyna while doing fuck-all to protect American rights while proudly pushing the vaccines.

Videos of people dying on the floors of Chinese hospitals were “leaked” on Reddit, so the media could ignore them, and create a sentiment among the government-skeptical right that something was being hidden from the rubes. We were played, used to create confusion. I was taken by these and was telling people all over in late 2019-early 2020 that something BAD was coming from China. Meanwhile, the scum media was telling people that it was all conspiracy theorizing by the tinfoil-hat set, -ist and -ism words flew, we were told to go celebrate Chinese New Year.

Then it all turned on a dime, suddenly we were all going to die, the rubes lost their minds, and failed to question why every single government department, organization, corporation, all came out with the exact same Covid messaging, all at the exact same time. Things that take a lot of time to coordinate and put together were all ready to go! A neat new tool called Zoom began to get a lot of advertishment on the TV. Again, just in time for the new normal! How convenient!

Then Biden, who up to this time hadn’t managed to fill a high school gymnasium and was calling his own supporters fat and challenging them to pushup contests, began to pull ahead in the polls, just in time for lockdown.

Folks, this whole mother-loving thing was written just like a Hollywood drama, and ALL the major players in the world are in on it. The BLM riots were act 2. Ukraine is act 3. Putin was good enough to wait until ZOG was out of Afghanistan before he

launched his special operation. Almost six months to the day. I don't know how people still believe in coincidence after all this. All these governments are working together toward the same goals.
