Přestože velká část mého výzkumu a psaní za poslední tři roky byla věnována globální epidemii Covidu, většině různých webů zaměřených na Covid jsem paradoxně věnoval velmi málo pozornosti.

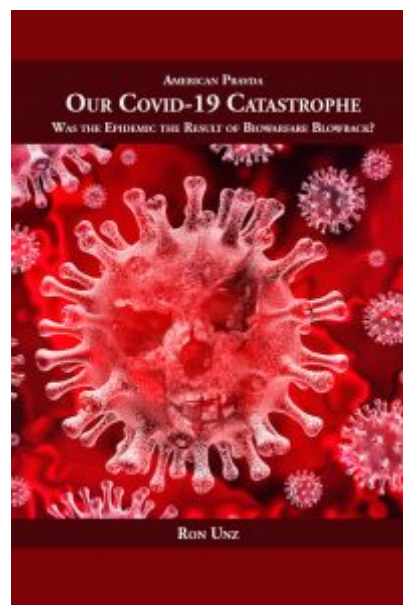

Je to proto, že jsem se úzce soustředil na původ epidemie, zatímco oni se zaměřili téměř výhradně na detaily

nemoci a kontroverzní opatření v oblasti veřejného zdraví přijatá k

její kontrole. O tato posledně jmenovaná témata jsem měl jen nepatrný zájem a částečně z toho důvodu byla většina mých názorů nejasně mainstreamová, příliš se nelišila od toho, co jsem pravidelně četl na stránkách *New York Times*, *Wall Street Journal* nebo *The Economist*.

Každodenní život miliard jednotlivců na celém světě byl však nesmírně narušen těmito vládními politikami, které zahrnovaly zamykání, maskování a sociální distancování, což jsou mandáty, které byly často nesmírně nepopulární a měly obrovské sociální a ekonomické důsledky. Navíc, tváří v tvář situaci života a smrti, značná část veřejnosti spolu s některými lékařskými profesionály tvrdila, že různé způsoby léčby Covid, jako je použití HCQ a IVM, jsou bezpečné a účinné, ale nesprávně potlačované, což je pozice hlasitě napadána a odsuzována. pobouřenými zdravotnickými a mediálními zařízeními. Tyto bitvy se ještě zостřily poté, co na konci roku 2020 začalo masivní očkování proti Covidu, Během celého tohoto období poskytovala etablovací média téměř neúnavnou podporu vládním pozicím ve všech těchto nesmírně kontroverzních otázkách, což přirozeně podpořilo růst toho, co by se dalo nazvat komunitou alt-Covid, sítě webových stránek, bloggerů a podcasterů. který tvrdil, že mnohé z těchto oficiálních politik byly zcela nesprávné, často založené spíše na propagandě než na vědě. Jeden z nejvýznamnějších uzlů v tomto nesouhlasném ekosystému byl založen v dubnu 2020 Toby Youngem, dlouholetým britským novinářem a veřejným intelektuálem, konzervativně zaměřeným, ale obecně uznávaným. Spustil *Lockdown Skeptics*, internetový zpravodaj kritizující to, co považoval za nedomyšlené opatření v oblasti veřejného zdraví, stejně jako další problémy související s Covidem. Postupem času postupně rozšiřoval a rozšiřoval její pokrytí

, přičemž vzal na palubu i Willa Jonese a Noaha Carla, pár mladších doktorandů, přičemž první z nich nakonec sloužil jako redaktor. Když v červenci 2021 britská karanténa konečně skončila, jeho čtenářská obec a vliv se rozšířily do té míry, že se rozhodl znovu pokřtít svou publikaci *Daily Skeptic* .a udržovat jej v provozu a poskytovat pečlivou analýzu dalších otázek veřejné politiky, zejména těch, kterým se mainstreamová média vyhýbají nebo je špatně řeší, i když stále se silným důrazem na záležitosti související s Covidem. I když nemusím nutně souhlasit se všemi závěry jeho webzinu, články, které publikují, se zdají velmi strážlivé a pečlivě zdůvodněné, často založené na publikovaných vědeckých pracích nebo kvantitativní analýze, což je vítaná změna od divokých spekulací a vyvolávání strachu, které se na tato témata vyskytují. na velké části internetu. Mám dojem, že tato webová stránka se stala v kruzích alt-Covid docela vlivnou, přičemž ji také mnoho mainstreamových novinářů a vědců bere vážně. Podle SimilarWebu jeho návštěvnost rychle roste a v poslední době dosáhla více než 7 milionů zobrazení stránek a 200 000 hodin čtenářů za měsíc, což je součty několikrát větší než u Quillette , kde Young kdysi působil jako přidružený redaktor, apodstatně větší než naše vlastní .

Navzdory rostoucí viditelnosti, předmětu webu a britskému zaměření znamenaly, že jsem si toho byl jen nepatrně vědom, dokud mě před několika týdny někdo neupozornil na jeden z jeho článků, který byl znovu publikován na konspirativním webu Alexe Jonese InfoWars . populární, ale málo spolehlivé.

K mému značnému překvapení se velmi solidně argumentovaný text o 3 200 slovech od redaktora *Daily Skeptic* Willa Jonese přímo zaměřil na jednu z naprosto kritických otázek, které se téměř tři roky úzkostlivě vyhýbala všechna naše mainstreamová média, problém, který podcaster Kevin Barrett vhodně nazval. „Smoking Gun “ epidemie Covid.

Úvodní odstavec položil jasnou otázku.

Tady je něco, co mě štvě. Jak se američtí zpravodajští analytici dozvěděli o tom, co v Číně považovali za nebezpečný nový virus, v době, kdy neexistují žádné dobré důkazy, že by ho Čína zachytila nebo že by o něj měla obavy? Jak našli signál ve všem hluku běžné čínské chřipkové sezóny?

Po pečlivé analýze všech fragmentárních a poněkud protichůdných důkazů byl článek uzavřen velmi odvážným předložením výbušné možné odpovědi, zvýrazněné výmluvným citátem Dr. Roberta Kadlece, vysokého úředníka Trumpovy administrativy a dlouholetého zastávce biologické války.

Je třeba poznamenat, že existuje jeden přímý způsob, jak to všechno vysvětlit, ale jeho důsledky jsou přinejmenším znepokojivé. Jde o to, že virus byl úmyslně vypuštěn v Číně nějakou skupinou nebo skupinami v rámci amerických zpravodajských a bezpečnostních služeb. Účelem takového uvolnění by bylo částečně rozvrátit Čínu a částečně jako živé cvičení připravenosti na pandemii – což, jak víme, je způsob, jakým s pandemií v praxi zacházeli pracovníci americké sítě biologické obrany. I když je to šokující, není to za hranicí možností. Zvažte, co Robert Kadlec napsal ve strategickém dokumentu Pentagonu v roce 1998.

Použití biologických zbraní pod krytím endemického nebo přirozeného výskytu onemocnění poskytuje útočnickovi potenciál pro věrohodné popření. Potenciál biologické války způsobit značné ekonomické ztráty a následnou politickou nestabilitu, spojený s věrohodným popřením, přesahuje možnosti jakékoli jiné lidské zbraně.

Pokud by tomu tak bylo, mohlo by se stát, že přidání furinového štěpného místa k viru by zvýšilo jeho infekčnost, aby se zvýšila pravděpodobnost výskytu pandemie (možná to už dříve zkoušeli s méně infekčním virem a nefungovalo tak dobře). Virus by byl záměrně relativně mírný, takže nezpůsobil příliš mnoho škody, ale byl dostatečně závažný, aby měl požadovaný účinek – alespoň za pomoci psychopatů a propagandy. Velmi málo jedinců by pravděpodobně znalo původ – většina by byla součástí živého cvičení.

Takový scénář by úhledně vysvětloval, jak pracovníci amerických tajných služeb v listopadu bedlivě „sledovali šíření“, přestože Čína na to zapomněla. Vysvětlovalo by to také, proč byli američtí lidé z oblasti biologické obrany od samého počátku mnohem více znepokojeni než čínské úřady; proč popřeli, že by mohl být virus zkonstruován, a potlačili veškeré úsilí o prozkoumání původu (a lpěli na zdiskreditovaných teoriích); a proč dodrželi celý plán biologické obrany typu uzamčení a čekání na vakcínu, přestože to virus zjevně nezaručoval (a opatření nefungovala), a obecně k celé věci přistupovali jako k živému cvičení. Je nesporné poukázat na to, že pandemie byla skvělou příležitostí k realizaci jejich dlouho připravovaných plánů. Ale co když to byla příležitost, kterou neponechali náhodě?

Nikdo z nás samozřejmě nechce vyvodit tento závěr. Abychom to vyvrátili, alespoň pokud jde o tento argument, museli bychom vidět podstatně více podrobností o tom, co američtí zpravodajští analytici viděli a říkali v listopadu 2019, což by vysvětlovalo, jak věděli, co Čína ne a proč byli takoví. znepokojeni, když Čína nebyla.

Stručně řečeno, je těžké se nedívat: co když vypuštění viru v Číně, aby narušil zemi a viděl, jak svět zareaguje, mohlo být nějakým zaječím mozkiem uvařeným v hlubších zákoutích amerického státu biologické bezpečnosti?

## Jak americká rozvědka objevila virus ve Wu-chanu týdnů před Čínou?

Will Jones • *Denní skeptik* • 12. prosince 2022 • 3 200 slov

Předal jsem tento důležitý článek několika mým přátelům s tím, že jej Young rozeslal na Twitter jeho 240 000 sledujícím. Jak to tak bývá, jeden z nich Younga znal a představil mě, takže jsem byl brzy v přímém kontaktu s autorem a začali jsme plodnou korespondenci. Nedlouho poté publikoval silný navazující článek, který uzavřel konstatováním extrémně nepravděpodobných aspektů tvrzení analytiků z Americké obranné zpravodajské agentury.

Tato harvardská zpráva, jejímž cílem je ukázat, jak američtí zpravodajští analytici objevili virus v listopadu 2019 v Číně, i když si ho samotná Čína ještě nevšimla, nakonec neúmyslně odhalila, že v té době nebyl ve Wu-chanu žádný signál o propuknutí respiračního viru. američtí zpravodajští analytici by si ho tedy v žádném případě nemohli všimnout. Přirozeně to nijak nesnižuje rostoucí podezření ohledně toho, jak americké zpravodajské služby sledovaly vypuknutí koronaviru ve Wu-chanu, a to pouze ve Wu-chanu, v době, kdy nikdo jiný, včetně Číňanů, o jeho existenci ani nevěděl.

### USA náhodně dokázaly, že v listopadu 2019 nemohly virus zaznamenat v Číně

Will Jones • ***Denní skeptik*** • 1. ledna 2023 • 1 000 slov

Americký *Brownstone Institute* je další přední webovou stránkou alt-Covid a pravidelně publikuje články s britským *Daily Sceptic*. Snad podnícen podezřením vzneseným v jednom z těchto článků, editor Jeffrey A. Tucker brzy vytvořil článek o cvičení America's Crimson Contagion, které provozoval Kadlec a které se konalo těsně před náhlým výskytem viru Covid ve Wu-chanu. Představil všechny podrobnosti a na závěr poznamenal extrémně podezřelé načasování.

co to všechno znamená? Možná je to všechno jen série náhodných datových bodů, že to, co je nazýváno nejhorší pandemií za 100 let, přišlo jen pár měsíců po propracovaném multiagenturním zkušebním běhu téhož, kterého se účastnili bývalí vysocí představitelé Trumpovy administrativy. A možná, že nejlepší osobou, která provedla reakci na Covid, byla shodou okolností právě osoba, která zorganizovala a řídila zkušební provoz v předchozí sezóně.

Mnoho lidí si jistě řekne, že zde není nic k vidění. V dnešní době je toho tolik k vidění.

### Co je karmínová nákaza?

Jeffrey A. Tucker • ***The Brownstone Institute*** • 22. prosince 2022 • 1 300 slov

Tucker, který článek rozeslal na Twitteru svým 137 000 sledujícím, jej popsal jako „nejzajímavější prvek“, který našel za tři roky psaní o problému Covid:

Za tři roky psaní na toto téma pokrývá tento článek ten nejzajímavější prvek, který jsem dosud našel. <https://t.co/nVn3eiAaZD>

— Jeffrey A Tucker (@jeffreayatucker) 22. prosince 2022

Od prvních dnů vypuknutí bylo zdrojem viru téma velmi vzrušené debaty, přičemž většina vědeckého a mediálního establishmentu tvrdila, že je přirozený, ale silná a hlasitá menšina tvrdí, že byl bioinženýrství, pravděpodobně unikl. z čínské virové výzkumné laboratoře ve Wu-chanu.

Po většinu prvního roku byla nesouhlasná perspektiva tvrdě potlačována ve vědeckých publikacích a sociálních médiích, dokonce byla zakázána na Facebooku, ale pak v květnu 2021 zásadní článek bývalého redaktora *New York Times Science* Nicholase Wadea oživil. Nedávno prof. Jeffrey Sachs, předseda komise *Lancet*'s Covid Commission, silně argumentoval, že virus vypadal uměle, a odsoudil to, co popsal jako vládní zastírání zaměřené na potlačení této reality. Tato pokračující debata nabrala důležitý obrat minulý týden, když Jones publikoval další vynikající článek analyzující tento problém, kus, který byl brzy znovu publikován *Brownstone Institute* a excerpován *LewRockwellem*. Ale na rozdíl od téměř všech předchozích autorů na toto téma se nezaměřoval na důkazy pro nebo proti úniku z laboratoře jako takové, ale místo toho na zásadní důsledky související záležitosti. Jeho analýza je natolik důležitá, že ji vyjádřím do značné míry.

Kde se vzala teorie úniku v laboratoři? Kdo jako první propagoval myšlenku a proč? Odpověď na tuto otázku je překvapivá – a může být klíčem k odhalení tajemství původu COVID-19.

První známá zmínka o myšlence, že koronavirus mohl pocházet z čínské laboratoře, se objevila 9. ledna 2020 ve zprávě Rádia Svobodná Asie (RFA). Bylo to jen několik dní poté, co se virus poprvé dostal do povědomí veřejnosti, a v té době ještě nebyla hlášena žádná úmrtí a jen málo lidí se virem obávalo – včetně, jak se zdá, Číňanů, kteří tvrdili, že to nebylo ani jasné, zda se to šířilo mezi lidmi.

Zdánlivě nešťastná z nedostatku poplachu, RFA vydala komentář od Ren Ruihong, bývalé vedoucí oddělení lékařské pomoci v čínském Červeném kříži, která řekla, že je přesvědčena, že se šíří mezi lidmi. Tvrdila také, že jde o „nový typ mutantního koronaviru“, a okamžitě, aniž by se zastavila nadechnutí, nadnesla možnost, že jde o důsledek čínského biologického útoku na Hongkong pomocí viru vyvinutého ve Wuhanském virologickém institutu (WIV). . Mějte na paměti, že to bylo předtím, než byla hlášena jediná osoba, která zemřela na virus, a nebyly předloženy žádné spolehlivé důkazy pro toto tvrzení. Je to poprvé, co se v médiích objevuje WIV a myšlenka laboratorního původu viru. Zpráva pak naznačuje, že WIV svou účast skrývá – ačkoli základ pro tuto nářku je přinejmenším slabý.

Během následujících dvou týdnů RFA tvrdě prosazovala myšlenku původu čínské biologické laboratoře a její zprávy byly 24. ledna převzaty deníkem Washington Times, který citoval Danyho Shohama „izraelského odborníka na biologickou válku“.

Smrtící epidemie zvířecího viru, která se šíří po celém světě, mohla podle izraelského odborníka na biologickou válku pocházet z laboratoře ve Wu-chanu spojené s čínským programem skrytých biologických zbraní.

*Radio Free Asia* tento týden znovu odvysílalo místní Wuhanskou televizní zprávu z roku 2015, která ukazuje nejpokročilejší čínskou laboratoř pro výzkum virů známou [jako] Wuhanský virologický institut, oznámilo *Radio Free Asia*.

Laboratoř je jediným deklarovaným místem v Číně, které je schopné pracovat se smrtícími viry.

Dany Shoham, bývalý důstojník izraelské vojenské rozvědky, který studoval čínskou biologickou válku, uvedl, že institut je napojen na pekingský tajný program biologických zbraní.

„Některé laboratoře v institutu se pravděpodobně zabývaly, pokud jde o výzkum a vývoj, čínskými [biologickými zbraněmi], alespoň souběžně, ale ne jako hlavní zařízení čínského uspořádání [biologických zbraní],“ řekl pan Shoham *Washington Times*.

Proč *Radio Free Asia* a *Washington Times* představily a propagovaly myšlenku Covidu jako čínské biologické zbraně? Zdá se, že RFA tak učinila, aby čelila nedostatku čínského znepokojení ohledně viru, proto nadpis: „Odborníci zpochybňují čínská oficiální tvrzení ohledně ‚nového‘ Wuhanského koronaviru.“ Zpráva *Washington Times* v jednu chvíli uvádí, že jde o reakci na fámy „šířící se po čínském internetu, které tvrdí, že virus je součástí amerického spiknutí k šíření zárodečných zbraní“, s odkazem na nejmenovaného „amerického úředníka“.

Jedním z neblahých příznaků, řekl americký úředník, je, že od vypuknutí epidemie před několika týdny začaly na čínském internetu kolovat falešné fámy, které tvrdí, že virus je součástí amerického spiknutí za šíření zárodečných zbraní.

To by mohlo naznačovat, že Čína připravuje propagandistické výstupy, aby čelila budoucím obviněním, že nový virus unikl z jedné z wuhanských civilních nebo obranných výzkumných laboratoří.

Proč zpráva předpokládá „budoucí obvinění“ z úniku z laboratoře – zvláště když je v procesu vytváření takových obvinění?

Zdá se, že slova anonymního amerického úředníka uvádějí, že čínské fámy začaly „před několika týdny“, hned na začátku ledna nebo na konci prosince; nicméně kupodivu byl článek brzy aktualizován, aby z nejasných důvodů vypustil slova „protože epidemie začala před několika týdny“.

V každém případě je na těchto „fámách kolujících po čínském internetu“ opravdu zvláštní to, že o nich nebyly nikdy vyrobeny ani nalezeny žádné důkazy. Ve skutečnosti všechna místa, kde byste mohli očekávat, že je zmíníte, ne. Například v únoru 2021 DFRLab z Atlantic Council zveřejnil ve spojení s *Associated Press* obsáhlý dokument shrnující

všechny „falešné fámy“ a „hoaxy“ týkající se původu Covidu. Jeho velký výzkumný tým hledal na internetu všechny fámy spojené s původem Covidu – přesto se v sekci o Číně nic o těchto údajných lednových fámách o amerických biologických zbraních nezmiňuje.

Dalším příkladem je Larry Romanoff, aktivista, který píše o různých ‚konspiračních teoriích‘ a který v Číně žije mnoho let. Jeho sloupky počátkem roku 2020 na webu *Global Research* útočící na americkou pozici byly tweetovány vysokými čínskými představiteli , ale nikdy se nezmiňoval o těchto údajných raných fámách na „čínském internetu“, což by jistě udělal.

Navíc, pověsti tvrdí, že nikdy nebyly opakovány žádnými zpravodajskými zdroji; to bylo jedinkrát, co to bylo vyrobeno.

Proč tedy RFA představila příběh o viru vytvořeném v laboratoři, ještě před první smrtí?

Proč se to snažilo spustit alarm? A proč nejmenovaný americký úředník tvrdil, že reaguje na čínské fámy, které se ukázaly jako neexistující?

Děj houstne, když si uvědomíte, že *Radio Free Asia* je americkou vládou financované médium, které je v podstatě frontou CIA, kdysi pojmenované *New York Times* jako klíčová součást „celosvětové propagandistické sítě“ agentury. Jak Whitney Webb zdůraznila již v lednu 2020, ačkoli RFA již není řízena přímo CIA, je řízena vládou financovanou

Broadcasting Board of Governors (BBG), která odpovídá přímo ministru zahraničí – který počátkem pandemie byl Mike Pompeo, jehož předchozím zaměstnáním byl ředitel CIA.

To znamená, že můžeme vidět, že vyprávění o původu laboratoře Covid pochází od bezpečnostních služeb vlády USA a učinilo tak velmi brzy, před první smrtí, jako součást záměrného úsilí o zvýšení poplachu v Číně i jinde. Byl také navržen tak, aby čelil očekávaným tvrzením, která ještě nebyla učiněna (ačkoli anonymní americký úředník nepravdivě tvrdil, že ano), že virus byl biologickým útokem USA.

To, že americká vláda by byla zdrojem teorie laboratorního původu, je nepochybně překvapivé pro mnoho lidí, vzhledem k tomu, že během několika týdnů by stejná teorie byla vládními úředníky zamítnuta jako „konspirační teorie“ a násilně potlačena. Na jejím místě by oficiální americké kanály podpořily teorii přirozeného původu na mokřím trhu a snažily se uzavřít další debatu a vyšetřování. Tak o co jde?

Zde je jedno možné vysvětlení, které dává smysl všem známým faktům – i když je jistě velmi znepokojivé. Možná to není správné, ale přiznám se, že mě momentálně nenapadá lepší. Možná někdo jiný může.

Vysvětlením je, že příběh o původu v čínské laboratoři zveřejnila americká rozvědka na začátku ledna jako krycí příběh. Krycí příběh k čemu? Za biologický útok USA na Čínu. Jako krycí příběh pro útok slouží čtyřem klíčovými účelům. Za prvé, předchází obvinění z amerického útoku (a skutečně anonymní americký úředník nepravdivě tvrdil, že již byla vznesena). Za druhé, předpokládá potřebu vysvětlit nepřirozený původ viru, u něhož by se očekávalo, že bude objeven, protože přirozený původ se projevuje jinak než nepřirozený původ – přírodní původ by měl mít živočišné rezervoáry, ranou genetickou rozmanitost a důkazy o adaptaci na člověka, které u SARS-CoV-2 chybí. Za třetí, šíří poplach v Číně – jeden z účelů útoku. A za čtvrté, ospravedlňuje USA přesně to, co udělali , považovali to za záležitost národní bezpečnosti, nikoli veřejného zdraví.

Představa, že by USA mohly záměrně vypustit virus v Číně, se někomu může zdát přitažená za vlasy. Je však dobře známo, že Pentagon v letech blížících se pandemii zintenzivnil svůj výzkum virů přenášovaných netopýry. Ačkoli to bylo uvedeno pouze pro obranné účely

vzhledem k předpokládanému riziku použití netopýrů jako „biologických zbraní“, vědci již dříve v časopise *Science* varovali, že další údajně obranný program Pentagonu, program DARPA „Insect Allies“, se zdálo být skutečně zaměřeno na vytvoření a dodání „nové třídy biologických zbraní“ a že odhalilo „záměr vyvinout prostředek pro dodávání HEGAA pro útočné účely“. Kromě toho byla íránská vláda natolik přesvědčena, že její rané propuknutí COVID-19 v únoru 2020, které zabilo značný počet jejích vysokých vůdců, bylo způsobeno biologickým útokem USA, že podala formální stížnost OSN. Taková obvinění samozřejmě nic nedokazují. Ale společně tyto obavy naznačují, že takový útok není mimo oblast možností a měl by být považován alespoň za vysvětlení původu viru.

Ale pokud byl únik z laboratoře zamýšleným krycím příběhem, proč byl krátce poté potlačen jako „konspirační teorie“? Je veřejně známo, že k tomu došlo z velké části díky úsilí Anthonyho Fauciho, Jeremyho Farrara a dalších západních vědců, kteří zorganizovali vědecké zakrývání důkazů, které by mohly implikovat jejich spoluúčast na výzkumu zisku z funkce podezření, že mohl vytvořit virus. Věděli o útoku? Neexistuje žádný důkaz, že to udělali. Což znamená, že by také nevěděli o zamýšleném krycím příběhu. Jeden ze spiklenců, Christian Drosten, se v jednom ze zveřejněných e-mailů skupiny přímo ptá odkud pochází „konspirační teorie“ laboratorního původu. Zdá se, že Farrar a Fauci ve svých e-mailech skutečně zkoumají otázky původu (přičemž jasně usilují o konkrétní odpověď). Obavy této skupiny vědců z účasti na vytvoření viru je vedly k tomu, aby zorganizovali vysoce efektivní úsilí o zamítnutí a potlačení teorie laboratorního původu. Tento zásah značně zkomplikoval krycí příběh, což vedlo k tomu, že výstupy americké zpravodajské komunity (IC) byly zmatené a nekonzistentní.

K oficiálnímu schválení teorie mokrého trhu (4) zpravodajskou komunitou koncem dubna a začátkem května 2020 by pak došlo v důsledku přechodu mezi většinou zpravodajské komunity na příběh vytvořený a schválený Anthonyem Faucim, Jeremym Farrarem atd. Ti v IC, kteří nebyli zapojeni do útoku (pravděpodobně naprostá většina), pravděpodobně přišli na to, co se děje, tj. teorie úniku z laboratoře byla krycí historka vydaná bezohlednými kolegy a byli by si velmi dobře vědomi strašného dopadu, který by měl pravda vyjde najevo. Proto také v této době vláda USA potlačila všechna vyšetřování původu Covid, o kterých vysoký vládní úředník řekl, že pouze „otevře plechovku s červy“.

Toto napětí mezi prvky IC pak pokračovalo odtajněnou zpravodajskou zprávou z roku 2021 (5), přičemž většina IC tvrdila, že nic neví, ale NCMI stále věřilo, že únik z laboratoře je nejlepší krycí historkou, a chce, aby se vrátil do hry.

V době zprávy Senátu z října 2022 (6) se teorie přirozeného původu jasně hroutila. Tato zpráva pak představuje snahu některých členů zpravodajské komunity vrátit únik z laboratoře jako krycí příběh, přičemž veškerou pozornost směřuje k Číně a WIV a pryč od USA.

Jak moc je to všechno možné? Rozhodně to odpovídá důkazům, i když možná existuje jiný, nevinnější způsob, jak to všechno vysvětlit.

Avšak ti, kteří by chtěli vyloučit možnost biologického útoku USA – a to bych skutečně rád vyloučil – si musí odpovědět alespoň na dvě klíčové otázky:

1. Proč byly USA znepokojeny a po vypuknutí epidemie ve Wu-chanu v listopadu 2019, které podle všech dostupných důkazů nebylo v té době zjištěné ? Proč USA nepravdivě tvrdily, že došlo k velkému, znepokojivému propuknutí a krátce na to spojenci?
2. Proč americké bezpečnostní služby začaly na začátku ledna šířit zvěsti o tom, že virus byl vytvořen v Číně, ještě předtím, než byla hlášena první smrt, když o tom neměly žádný důkaz (alespoň nikdy nevysvětlily, jak to věděly to) a nikdo jiný se tím netrápil a na základě nepravdivého tvrzení, že už se v Číně šíří fámy o americké biologické zbrani?

Buďme upřímní: nevypadá to dobře.

## Vláda USA identifikována jako původní zdroj teorie úniku z laboratoři. co se opravdu děje?

Milióny nebo desítky milionů lidí na celém světě nakonec čerpají své informace o Covidu z komunity alt-Covid, v níž jsou *Daily Skeptic* i *Brownstone Institute* hlavními publikacemi, jejichž obsah může být široce šířen.

Dr. Robert W. Malone je v těchto kruzích významnou postavou a zdálo se, že považuje tuto analýzu původu Covid za stejně důležitou jako já, když článek rozeslal na Twitteru svým 900 000 sledujícím a získal téměř 1 400 retweetů.

Pokud bylo USG prvním spuštěním s tímto příběhem 9. ledna 2020 (5 dní poté, co mi zavolal Dr. Callahan), pak musíme začít klást více zkoumavých otázek o tom, co USG věděl a kdy. <https://t.co/Gi3jus5XMR>

Pokud desítky milionů jedinců, kteří soustředili svou pozornost na důsledky epidemie Covid, nyní také začnou zvažovat její pravděpodobný původ, domnívám se, že stávající zastírání se může zhroutit s potenciálně obrovskými politickými důsledky.

Při epidemii zemřelo hodně přes milion Američanů, a pokud by tato tragédie začala být vnímána jako úder zpackaného amerického biologického útoku, dopad by mohl být ohromující. Taková katastrofa by byla tisíckrát větší než jaderná katastrofa v Černobyli, která pomohla svrhnout sovětský režim, který vládl SSSR.

Mezitím bych také doporučil svou vlastní dlouhou sérii článků na toto téma a několik z nich zejména:

Otázka: Pokud čínské fámy, které začaly na začátku ledna, nesouvisely s hanebnými americkými záměry, proč si vybrali vojenské hry ve Wu-chanu? Proč to neobviňovat asi 25 000 expatů, kteří tam v té době žili? (Toto číslo kleslo na 800 poté, co blokáce povolily)

<https://zhidao.baidu.com/question/1711731086609172900.html>

Čínský ministr zdravotnictví nedávno místním řekl, aby se vyhýbali fyzickému kontaktu s cizinci, aby se nakonec nenakazili opičími neštovicemi.

<https://www.usnews.com/news/top-news/articles/2022-09-18/dont-touch-foreigners-to-reduce-monkeypox-risk-says-senior-chinese-health-official>

Kolik toho Číňané věděli o tom, co se stalo v prosinci a na začátku ledna? Je možné, že Radio Free Asia právě zachytilo a změnilo význam zpráv tak, aby odpovídaly jejich sdělení? Nedokážu si představit, že jazykové znalosti jejich reportérů jsou tak vysoké, a pokud se spoléhají na externí zdroje, možná se zpráva pomíchala jako hra „telefon“. To, že si Číňané vybírají vojenské hry, mi vždy připadalo podbízivé, skoro to znamenalo útok z USA.

Víte, vždy jsem odmítal myšlenku neidentifikovaných létajících objektů řízených mimozemskými mimozemskými formami života. Jasně, všiml jsem si občasného brouhaha ve vnitrozemí a chvalozpěvů z hovorových rádií.

Ale pak mimozemšťané přistáli v Palo Alto, mezi více informovanými. To mě přimělo přezkoumat posledních 100 let literatury o létajících talířích a hádejte co, jsou skutečné.

...20 000 slov...

Nejsem odborník, ale důkazy jsou přesvědčivé, že existují a že je posílají mimozemští mimozemšťané. Zejména proto, že je kdokoli může zajet a podívat se na ně, kde zaparkovali na Stanford Golf Driving Range.

Hej, to mi připomíná další potlačovanou pravdu, o které jste možná vůbec neslyšeli: můj nápad, že Covid-19 byla biologická zbraň, kterou světu ušetřili zlotřilí američtí neoconi. Dovolte mi připomenout, že jsem měl milion zhlédnutí na Rumble, když o tom mluvil. Milion. Wow. Sedm číslic. Málo lidí mělo milion zhlédnutí. Deset až šestý.

...1 000 slov + 3 odkazy na videa...

Téměř žádný z komentujících na mém webu nesouhlasí s mým příběhem rogue-neocon, ale brzy se ztrapní. Přiblížil jsem se k místu přistání mimozemšťanů a navázal komunikaci. První věc, na kterou jsem se jich zeptal, je jejich názor na moji americkou teorii biologických zbraní. Potvrzují, že mám pravdu! Příští týden s nimi mám schůzku, abych prozkoumal nové důkazy.

Také potvrzují, že ilegální mimozemšťané jsou skvělí a také mi o tom poskytnou studie. Brzy budu na Rumble a shrnu zjištění. Pět milionů zhlédnutí tentokrát určitě, konečně porazilo Bongina a

Greenwalda, woo hoo!

To, že Ron věří, že Američané věří, že COVID byl zkonstruován a vypuštěn americkým národním bezpečnostním aparátem, to sesadí, je zbožné přání.

Neustále to zmiňuje téměř v každém svém článku o COVID, pokud ne.

Ten sen je prostě hloupý.

V USA nezemřelo na Covid-19 více než milion lidí.

Tato čísla byla zmanipulována zahrnutím úmrtí „s“ Covidem do oficiálního seznamu, i když tato osoba zemřela z jiné příčiny.

Samotný virus má patentovaný řetězec DNA Moderna v místě štěpení furinu, což je část viru, díky které je přenosný na člověka:

<https://www.frontiersin.org/articles/10.3389/fviro.2022.834808/full>

Zde Maria Bartiromo z Fox Business konfrontuje generálního ředitele společnosti Moderna o novinách; nepopírá to, říká, že „jeho lidé to zkoumají“, a pak se okamžitě pustí do podnikání „je možné, že ve Wu-chanu došlo k úniku z laboratoře“:

<https://rumble.com/vvve14-modernas-ceo-stephane-bancel-interviewed-by-maria-bartiromo-on-fox-news-reg.html>

Pokud má patentovaný kmen DNA Moderna, vydělává na tom Moderna? Pokud má patentovaný kmen DNA Moderna, měl by být patent zrušen, protože nemůžete patentovat něco, co pochází z přírody, jako je přírodní virus, který pochází z netopýrů? Nemůžete to mít oběma způsoby, buď je virus umělý a Moderna ho vlastní kus, nebo je virus přirozený a patent Modernas je třeba zrušit. S tímhle patentovým byznysem se musí něco stát, pokud se to zamete pod koberec, je to prostě nepřijatelné.

Zde je Tucker Carlson, který nedávno dělal rozhovor s Glennem Beckem, kde Beck uvádí, že má informace, že Moderna a NIAID podepsaly důvěrnou dohodu dva týdny před tím, než byla veřejně oznámena existence viru, kde souhlasili, že budou partnery ve vlastnictví „vakcíny“, kterou společně vyvinuli NIAID a Moderna:

To se však v USA nikdy nestalo. Hrstka měst měla poloviční uzamčení, která sotva vynutila, a to je vše (což je důvod, proč toho moc nedosáhli). USA neměly téměř žádnou reakci federální vlády.

Expaty v Číně sledují jako jestřáb, každý jejich pohyb a komunikaci sleduje státní bezpečnost. Jsou považováni za de facto špiony, takže možnost, že zdroj pochází od nich, je extrémně nízká. Muselo to pocházet odněkud, kde by to Číňané nebyli schopni monitorovat, tedy ze zámoří. Vojenské hry se proto okamžitě staly hlavním podezřelým.

Pokud to pochází záměrně z americké laboratoře (spíše než neúmyslně z čínské laboratoře financované USA, což se zdá být druhou nejpravděpodobnější možností), potřebujeme někoho zúčastněného, možná vědce, aby se přihlásil (i anonymně) a vysvětlil co vědí. Lidé, kteří si mysleli, že možná posunují Čínu směrem k „demokracii“, by měli vidět, jak velký byl tento neúspěch a jak musíme v budoucnu zabránit takovým skrytým aktivitám. Jednou ze záhad na těchto údajných „konspiračních teoriích“ je, jak udržují všechny zúčastněné tak dlouho v klidu. Přinejmenším pro atentát na Kennedyho máme nyní anonymní zdroj s údajnými vnitřními informacemi, že CIA byla spoluviníkem.

But the conspiracy theory of a US bioterrorist attack against China doesn't hold water when contrasted with the reality on the ground. Unless, of course, China is playing some sort of 6D-chess -the kind Trumptards with Qtardation are still claiming their orange Jesus is using against the "Deep State"- and readying a brave patriotic onslaught against the evil Western "globalist communists" to whom China owes its current status as an economic powerhouse. China and the terrorist USEUNATO conglomerate have been coordinating and mirroring their response the the global plandemic, treating it like a joint venture and taking advantage of WHO-led bioterrorism to impose arbitrary restrictive measures against their respective populations, and open markets and sell "vaccines", ventilators, masks, etc. But the "US is bioattacking poor, innocent China" conspiracy does seem quite useful to cover for any number of additional catastrophes the powers behind the UN Security Council may be preparing to bring forth "multipolarity".

Ron Unz writes,

“Well over a million Americans died in the epidemic.”

Its well established in countless credible sources that the frauds connected to changing the rules for filling out death certificates formed one of the major early frauds in getting the manufactured COVID crisis up and running.

It has been public knowledge for many years, but seems to be little mentioned nowadays, that China has suffered a whole series of unexplained virus outbreaks. Most of those afflicted animals – pigs, birds, etc. – that Chinese people rely on for food.

Now we have seen a similar outbreak in humans. To my mind, it is quite likely that the outbreaks have been the visible signs of biological warfare.

The US government has the means – the knowledge, the experience, and the equipment. It also confronts a stubborn obstacle in China, which will not yield to economic, financial, or military pressure. What could be more natural for an unscrupulous group of power-hungry criminals than to resort clandestinely to biological warfare?

It would be hardly surprising, too, if they bungled the attack so severely as to inflict more harm on their own people.

thoso folks just haven't been paying attention or live in a state of delusion. The USA regularly kills tens of thousands of people .. occasionally hundreds of thousands.

Omicron „Variant“ byl další útok biologickými zbraněmi a „Kraken“ je nyní. Tyto „varianty“ pocházejí z genetických větví, které vymřely a pak se jen zázračně objevily s nově získanými funkcemi.

Útok Biowarfare pokračuje. mRNA vaxxiny jsou nedílnou součástí biologického válečného útoku, přestože nejsou bezpečné, účinné a dokonce ani nesnižují přenos. Je zřejmé, že lžou ve všem, ale někteří lidé si myslí, že si mohou vybrat, které části vyprávění jsou pravdivé, na základě slova MSM.

Přesto velká židovská farmaceutická propagandistická mašinerie, která má být „posílena“, pochoduje vpřed v naprostém odporu vůči realitě. Kognitivní nesoulad lidí liberálů a boomů, kteří vidí mladé sportovní hvězdy a mediální osobnosti umřít „náhle“ všude kolem, je jednou z nejúžasnějších charakteristik éry, ve které žijeme.

Pro mě to přímo souvisí s lidmi, kteří uznávají New York Times a MSM jako konečné arbitry „faktů“. Pokud to NYT nenahlásilo, nestalo se tak. Pokud NYT říká, že Vaxxové jsou v bezpečí, pak jsou v bezpečí, dokud se NYT nestáhne. Pokud NYT říká, že USA vyhrávají válku proti Rusku, pak vyhrávají USA.

Jedním ze způsobů, jak se propagandistickým orgánům podařilo vytvořit prázdnotu reality, je veškerá ctnost, kterou přikládají politické korektnosti. Lidé, kteří podporují Vaxx, Ukrajinu, Gun Control, AGW, skryté přísně tajné dokumenty Peda Peta a Huntera Bidena, jsou „dobří“.

Čínské vysvětlení úniku z laboratoře je nejběžnějším vysvětlením. Výzkum ziskovosti funkce na těchto koronavirech se tam prováděl podle pokynů Fauciho davu a ve spolupráci s UNC (Chapel Hill, NC). O tom se všeobecně vědělo a Ron Unz o tom propagoval články.

Laboratoře ve Wu-chanu fungovaly pod BSL-2 namísto požadovaných BSL-4 (bezpečnostní úrovně), protože je snazší dělat věci tímto způsobem, a je to Čína. Pokud neznáte Čínu, pak byste nepochopili, že kvalita není práce 1. Pokud dává smysl, že se zde virus poprvé dostal z laboratoře.

Teorie Rona Unze předpokládá, že pachatelům bylo jedno nebo si neuvědomili, že se virus rozšíří do světa z Číny. Číňané cestují všude možně. Oni to „nevěděli“. Ani se nepokusili omezit cestování v rámci svého plánu? Takhle se bioútok nedělá, lidi...

> původ se rozplétá

Původ je zřejmý od začátku roku 2020. Není to jen ze Spojených států, protože předpokládat, že na národních hranicích/zájmech záleží, je dětinská pozice. Tvrzení, že USA přehnalý hrozbu a že to je ta kuřácká zbraň, je naivní, opravdu si myslíte, že takto rozsáhlý plán by vydal nějaký podřadný lokaj hyperventilující o tom, jak dindu nuffin? Ne.

Je to snadné: virus vyrobila v laboratoři (kde? koho to sakra zajímá?) koalice WEF / Schwab / Soros / Blackrock / Gates / Satanic / atd., která označila nezávislé, rodeo-klauny rudé krve Američany za hrozbu a hledala vymazat je, což je hřebík do rakve, urážka zranění atd.

Skutečné zavedení viru a způsob, jakým jsou zprávy / „oznámení“ zpracovány, jsou dvě velmi odlišné věci a ta druhá jen stěží poskytuje pravdivý obrázek o té první. Přemýšlet o tom, proč někdo ukazuje prstem na nějakého chlapa, je ztráta času, jsou to ti, kdo dávají lístky až dolů.

Následuje následující: lidé umírají na komplikace způsobené „vakcínou MRNA“. V těhotenství nastanou velké komplikace. Mnoho nově narozených dětí bude autistických (např. retardovaní, méně než 80 let, neschopní se o sebe postarat). U mnoha otrávených žen se rozvine PCOS, pak rakovina a pak budou plně sterilní. U mnoha, mnoha lidí se rozvinou autoimunitní onemocnění.

Po tom všem vyjde pravda najevo a WEF udělá rugpull. Všichni jejich lokajové budou uvedeni jako příklad toho, co NEDĚLAT. Nečekejte, že to bude příliš veřejné. Pak WEF (a přidružení) slíbí nebe, slíbí technologii a civilizaci a lidé to přijmou oběma rukama. Ano, „manažeři“ jsou degenerovaní psychopati lačnickí

po krvi. Ne, nejsou bezradní, i když jsou skutečně na hony vzdáleni tomu, čím byli jejich předkové. Jsou to pouze „manažeri“ na konci řady, ti s extrémní příbuzenskou plemenitbou a zředěnou krví. Podobně jako byl konečný faraon černý. Opravdu jsme wuz, ale podívejte se, na druhou stranu, Brawndo má elektrolyty!

Držel jsem se za nos, dvakrát jsem volil Trumpa a pravděpodobně bych se držel za nos potřetí, pokud bude kandidátem Republikánské strany v roce 2024. Ale řeknu také toto: zjistil jsem, poněkud pozdě v životě a hodně mé hluboké zklamání – že jsem úplně jiný druh voličů, pokud jde o to, abych ostře sledoval ne to, co politici říkají, ale co skutečně dělají, pokud jsou zvoleni.

S ohledem na to, když byl Trump zvolen v roce 2016 a přestěhoval se do Bílého domu, jsem se jako laserový paprsek soustředil na to, koho ten chlap najímá do své administrativy, a díky tomu, co jsem ho viděl dělat, jsem si velmi rychle uvědomil, že ten chlap byl buď naprostý imbecil – nebo schválně zaměstnával svou administrativu nikdy-Trumpery, anti-MAGA krysami, globalisty, neokonzervativními psychopaty šířícími války a RINO a Židy nenávidícími bílou rasu. Z těchto skupin jedinou kategorií krys, které se snažil vzdorovat, byli neokoni válčící a odmítal se jimi nechat nasát, aby rozpoutal jakékoli nové války. Nechal se však, aby ho přiměli zavraždit Solemaniho, což trvale pošpinilo jeho pověst a odhalilo, jaký zbabělý, slepý červ může být, když se nechá ovlivnit neokonzervativními psychopaty.

Co to má společného s těmito nebezpečnými a smrtícími údery smrti? Unz a několik dalších se pokoušeli vytvořit případ, který by naznačoval, že Trump byl aktivním spiklencem s Big Pharma a Billem Gatesem a že měl předchozí znalosti o tom, co je nyní společnost Pfizer nucena přiznat – že tyto vakcíny obsahují složky, které by způsobit vážnou újmu a dokonce být smrtelné pro každého, kdo je vzal. Trump je tedy stejně vinen jako Pfizer a Fauci a všichni ostatní výrobci vakcín Big Pharma a CDC a FDA, kteří všichni hráli roli v propagaci těchto nebezpečných vakcín.

No, přiznávám, že Trumpa velmi pohrdám na základě toho, jak byl zklamán ze značného počtu svých slibů z kampaně z roku 2016, které nesplnil – a také kvůli jeho neomluvitelné hlouposti, když přišel čas najmout pro-MAGA, pro-Amerika Za prvé, lidé proti neokonům, proti válce, antiglobalisté, propopulisté a místo toho, aby bažinu vysušil, rozšířil ji. Ale bez konkrétních důkazů – mám problém uvěřit, že byl aktivním účastníkem této ďábelsky zlé depopulační agendy a že měl úplné znalosti o tom, že vakcíny byly navrženy tak, aby zranily a někdy zabily lidi.

Svůj názor zakládám na svém přesvědčení, že Trump nevykazuje žádné známky toho, že by byl výjimečně inteligentní jedinec. Je to narcista a ego maniak a má typickou, hyper otravnou, drsnou, hrubou a hrubou osobnost, která je standardem pro každého, kdo kdy strávil jakoukoli část života v New Yorku. Newyorčané jsou geneticky naprogramováni tak, aby byli nepodobní, a Trump je toho klasickým příkladem.

Začínám uvažovat, zda tyto vakcíny nebyly záměrně navrženy tak, aby byly nebezpečné a škodlivé anti-trumpisty, kteří ovládají Big Pharma, kteří pak využili Trumpovy naivity a jeho velkého ega k tomu, aby ho snookovali, aby se dostal na palubu s jejich ‚Warp Speed‘. roll-out, který provedl bez zapojení jediné kriticky myslící mozkové buňky ve své hlavě (za předpokladu, že vůbec nějaké takové mozkové buňky má) a myšlenkou bylo počkat, až se začnou objevovat nepříznivé vedlejší účinky a úmrtí, a pak přesunout vinu za ty vedlejší účinky na Trumpa?

Pokud je mi známo, Trump ještě veřejně neuznal tyto nepříznivé vedlejší účinky, které jsou způsobeny vakcínami, a ten idiot se stále chlubí tím, že je „otcem vakcín“, což obvykle vyvolává explozi „pískání“ z davů, kteří se účastní jeho shromáždění. Ptám se tedy sám sebe – je vůbec možné, že Trump stále neví o stovkách a stovkách zpráv o nepříznivých vedlejších účincích spojených s vakcínami? Zdá se mi nemožné uvěřit, že lidé, které

má ve svém nejužším kruhu, jeho poradci pro kampaň, jsou o těchto nepříznivých vedlejších účincích zcela neznalí – zvláště když se o nich nyní diskutuje v hlavním zpravodajství. Nesdělili by tito poradci to, co se naučili, se svým oranžovým šéfem?

Nejsem fanouškem Rona DeSantise, kromě toho, že schvaluji jeho setrvání ve funkci guvernéra Floridy; tenhle chlap má napsaného válečného štváče z Deep State. Ale DeSantis se přesunul napravo od Trumpa a otevřeně mluvil o nepříznivých vedlejších účincích bodnutí. Proč se tedy Trump stále odmítá dotknout tohoto kriticky důležitého tématu?

Dr. Robert Malone, jehož obrázek je v horní části tohoto článku – spoluvývojář technologie MRNA, a sám se nepochybně zbláznil – měl v tomto životě několik velkých spojení mezi ultraetapy.

Malone je někdy kritizován 'konspirační' komunitou jako možná 'omezený hangout', který pomalu zvládá negativa, jakmile se objeví, ale nikdy se zcela nestaví proti establishmentu.

Jedním z Maloneových nedávných vpádů, které vedly k flaku, je jeho návrh, že začínají očkovat hospodářská zvířata, která jsou přeměněna na maso pro lidskou spotřebu, jako zadní vrátka k nedobrovolně laškujícím lidem

[https://www.revolver.news/2023/01/dr -malone-shares-dire-warning-mrna-vacciny-jsou-injikovane-nasi-nasi-potravinove-zasobky/](https://www.revolver.news/2023/01/dr-malone-shares-dire-warning-mrna-vacciny-jsou-injikovane-nasi-nasi-potravinove-zasobky/)

Malone naznačuje, že se můžeme zbláznit jen tím, že budeme jíst maso – „zklamání v McDonalds“ – stejně jako nešťestím, že jsme chodili do nemocnic a dostávali transfuze krve... někteří si myslí, že Malone by mohl využívat svou prestiž k tomu, aby se stal „plným spiknutím“ a rozptýlit nás červeným sleděm

Celé to „kdo to tupí“ o „biozbraň covid“ působí rušivě, zvláště s ohledem na myšlenku, že na vrcholu spolupracují velké mocnosti na věcech, jako je covid, např. proč je ruský Sputnik vax údajně podvodníkem AstraZeneca, ale Západ si na to nestěžuje, technologie prostě předaná Rusským? Je to všechno odvádění pozornosti od důležitějších agend? Jako třeba toto –

When people claim that the U.S. government is lying about the origins of Covid but at the same time say that same government is providing accurate information and statistics on whether the vaccines are safe and effective there is a certain inconsistency there. It seems more plausible the government, at least to me, is lying about both.

Jsem z velké části agnostik ohledně toho, zda nemoc pochází ze zpackaného biologického útoku nebo ze zpackaného pokusu o její potlačení v čínské laboratoři, kterou financoval Fauci. Při znalosti úrovně kompetencí našich současných zkorumpovaných a zlých elit by bylo možné obojí. Domnívám se však, že pokud připustíte, že vláda je nečestná ohledně původu nemoci, je docela pravděpodobné, že je také nečestná ohledně vakcín a léčby.

Programy včasné léčby byly z velké části blokovány vládou, přičemž vláda hrozila odebráním licencí lékařům, kteří se je snažili vyvinout a zavést. Tyto programy včasné léčby, pokud by byly snadno dostupné a široce implementované, mohly velmi dobře snížit rizika onemocnění. Srovnání rizik očkování a následného získání Covid ve srovnání s riziky získání Covid a následné léčby pomocí programu včasné léčby může velmi dobře ukázat, že druhý je bezpečnější.

Argumenty pro spojení neocon/americký „bezpečnostní“ stát jsou však přesvědčivé.

Na druhou stranu důkazy proti myšlence „vakcíny varují, neškodí“, o které pan Unz také tvrdí, se každým dnem množí. Jistě, obrovské množství elitních a téměř elitních sportovců a starších, tolik stále zdravých lidí, kteří byli dříve elitními sportovci umírají, je stochastický jev, ale je velmi reálný a nemá precedens.

Statistické důkazy pro obecné pop'ns ve formě před- a post-vaxových nadměrných úmrtí lze také snadno najít.

JFK. 9/11. Snowden NSA whistleblowing. Public opinion hasn't moved the needle on the misbehavior of the government in decades let alone depose it.

Mohl bych přidat „holocaust“. Ale ve skutečnosti nezáleží na tom, čemu veřejnost s vymytým mozkiem věří nebo nevěří. Unz, BTW, tráví příliš mnoho času čtením a tím, že bere vážně orgány sionistického establishmentu na vymývání mozků [UNZ: „Pravidelně jsem četl na stránkách New York Times, Wall Street Journal nebo Economist“], což je typické pro retardi, kterým byl vymyt mozek, aby věřili, že jsou „Židé“ a ne satanisté. Toto poslední prohlášení zcela vysvětluje spiknutí „vakcíny“ Covid proti HCQ a IVM. Ale zpět k mému původnímu bodu: to, čemu věří veřejnost s vymytým mozkiem, je pro objektivní pravdu irelevantní (i když to, čemu věří veřejnost s vymytým mozkiem, je relevantní pro schopnost šířit objektivní pravdu).

UNZ: Navíc, tváří v tvář situaci života a smrti, značná část veřejnosti spolu s některými lékařskými profesionály tvrdila, že různé způsoby léčby Covid, jako je použití HCQ a IVM, jsou bezpečné a účinné, ale nesprávně potlačované, což je pozice hlasitě napadána. a odsuzována pobouřenými lékařskými a mediálními institucemi. Tyto bitvy se ještě zостřily, jakmile na konci roku 2020 začala masivní vakcinace proti Covidu, přičemž kritici poznamenali, že používané mRNA vakcíny byly založeny na zcela nové biotechnologii a vyžadovaly použití nouzových výjimek, aby bylo možné obejít to, co by jinak bylo dlouhý a opatrný proces klinického hodnocení.

Objektivní intelektuál a ne „Žid“ s vymytým mozkiem by se na spiknutí s cílem potlačit tyto dvě léčby od začátku díval a ucítil krysu. Ale Unz by se musel cítit, což se obvykle nestane. Ale řeknu, že ze všech krys smrdí nejméně!

Mám pocit, že značně přeceňujeme naši schopnost manipulovat se složitými věcmi. Hledají brouky a sázejí na to, že se některé z nich rozšíří daleko, což se v přírodě čas od času stává. S nedávným propuknutím covidu zasáhli terč a dostali příležitost uvést své teorie do praxe.

Člověk má představu, že by si přáli, aby byl covid o něco smrtelnější a také se rychle šířil, což je pravděpodobně způsobeno jejich vysoce agresivním marketingem nemoci i jejich prosazovaného léku. Čína má na mnoha místech správné podmínky pro nové nebo změněné přenosné nemoci, aby měly šanci na velké věci, jako na mnoha jiných místech, jen pokud se na to díváte jako sázkařský vědec.

If the tens of millions of individuals who have been concentrating their attention on the consequences of the Covid outbreak now also begin to consider its likely origins, I believe that the existing cover-up may collapse, with potentially enormous political ramifications.

Even if the cover-up does “collapse”, the political ramifications will NOT be enormous – the reaction of the US population will be minimal. Why? Well, the vast majority of the US public does NOT trust the government as it is, according to Pew Research:

Today, two-in-ten Americans say they trust the government in Washington to do what is right just about always (2%) or most of the time (19%). Trust in government has remained at roughly this low level for more than a decade.

Although the public does not trust the government, the vast majority follows the instructions of the government, as is seen by the following example from the site Statista:

As of January 4, 2023, around 81 percent of the U.S. population had received at least one dose of a COVID-19 vaccination.

Even though the US public does NOT trust the government, the population will still follow the government’s instructions – even Ron Unz took the “vaccine”! And I am assuming he does not trust the government either.

What does this show? That the US population is schizophrenic? That it is suffering from Stockholm syndrome? How can trust in the government be so low (around 20%) but the compliance rate with what the government dictates be so high (around 80%)?

Therefore, even if the the “cover-up” collapses, with only 20% of the population believing in the narrative, the sheeple will still toe the line and do whatever the government tells it to do. It’s an example of the Pareto Principle: the 20% of the people who trust the government will still cause an 80% of compliance rate with

the government. This does not bode too well for those, like Ron Unz, who think that a “cover-up collapse” will result in meaningful political consequences.

Dr Vernon Coleman, který napsal více než 100 knih, uvedl v březnu 2020, po prostudování čísel úmrtí na covid a srovnání statistik úmrtí ve Spojeném království se statistikami z předchozích let, že hrozba covid-19 byla divoce přehnaná a že existuje nebyla žádná pandemie.

V roce 2020 také kategoricky prohlásil, že Covid-19 byl jen přeznačené nachlazení a chřipka. Vláda Spojeného království/sociální média z něj za své tvrzení udělala neosobu.

Ale tady jsme v roce 2023, kdy obvyklí podezřelí stále prosazují lest Covid-19.

Přestal jsem číst na konci titulku!

Tento „Origin of Covid“ je prásknutím krtka hůlkami. Tyto nekonečné a nadbytečné články, aby nekoneční a nadbyteční čtenáři mohli přemítat a přemítat o těchto nekonečných a nadbytečných úvahách, tvrzeních, teoriích, hypotézách nebo čemkoli jiném.

Lidé, získáte fakta v roce 2123, až budou všichni hráči mrtví. Pokud jste stále naživu, dostanete 40 milionů stránek redigovaných dokumentů. Fraudchi a ostatní hráči budou pro ještě ignorantnější a lhostejnější veřejnost stejně obskurní a neznámí jako Luther.

Mezitím „spisovatelé“ čtou psaní jiných „spisovatelů“ a vymýšlejí další šmejd pro figuríny. Říká se tomu literární ricochet!!

Nezajímá mě, že Covid začal v USA, Číně nebo Timbuktu. Tito autoři točí svá kola a čtení této nekonečné palandy je ztráta času.

Malone byl chovatelem koní posledních 20 let. V recenzovaných časopisech jsem našel jen pár článků, které Malone publikoval za posledních 20 let. To je daleko od stavu vysoké postavy. Rone, můžeš poskytnout ten seznam jeho publikací?

Pokud si pozorněji přečtete, co jsem řekl, uvidíte, že jsem Malonea popisoval jako „vysokou postavu“ v kruzích alt-Covid a anti-vaxxing, což si myslím, že je zcela správné.

Na Twitteru má podstatně více sledujících než RFK Jr. nebo Dr. Peter McCullough, dvě další velmi prominentní postavy alt-Covid, a několikrát tolik jako Steve Kirsch.

Covid skutečně existuje, k dnešnímu dni nám to řeklo přes 40 000 spisovatelů. Kromě MSM, Bitchute, YouTube a tisíce blogů řekly totéž. Dokonce i renomovaní blogeři, jako je Anatoli Karlin, se svým mečem a nitěmi Armády spásy potvrdili existenci tohoto mikroskopického kreténa. Prezidenti, politici a šéfové CDC, WHO, ABC, FDA, XYZ, NFL, NRA a PAHO řekli totéž. Dokonce i Židé potvrdili virus až po generálního ředitele Bigg Farma.

Na internetu jsou dokonce 18letí teenageři, východní Indové, dindoové, lidé, kteří nedokončili střední školu a oslí kárce, kteří existenci chyby potvrdili!!!. Všichni nosí masky, ne? Jaký další důkaz potřebujete.

Jsem také věřící. Proto jsem se zabalil do igelitu, nasadil si tři masky a od začátku roku 2020 se schovávám pod postelí. Zatím jsem přežil varianty Omicron, Macron, Makaróny, Alpha, Alpo a Jumbo.

Doufal jsem, že válka na Ukrajině, Trumpův nálet, Hunterův notebook a práce na klíně a foukání budou mít nějakou trakci. Pak bych s jistotou věděl, že epidemie, pandemie, endemie je u konce a může ukončit mou karanténu. Není tak !

Pokud tedy nevznikne nějaké nové drama, které by poslalo veřejnost do módu kousání a kousání nehtů, abych je vyděsil, budu si muset změnit jméno na Dick Van Wrinkle a zůstat pod postelí.

Věřte prosím, že je to pravda. Politici, MSM a každý hlupák s připojením k internetu nemají důvod kecat důvěřivou veřejnost.

The “lab leak” media narrative was started by a CIA run and CIA funded radio station.

However, the narrative that COVID orginated from the Wuhan Military Games, was created and circulated in Chinese media by Israeli assets in Taiwan.

The narrative that the COVID attack against China and Iran was a US Bioweapon attack, was circulated in China by Israelis.

These rumors spread by Israelis in Taiwanese media reached The government and triggered the military response in Wuhan. Before that COVID was spreading in China for months but was ignored.

Bart Classen wrote a highly supresses paper titled “COVID-19 and Illegal US Bioweapons Activity, an Insider’s Revelations”. He worked at US NIH/NIAID with Fauci until 1992. He claims that it was widely known that the agency was controlled by persons working for Israeli intelligence.

He also states that NIH/NIAID was turned into an Israeli biological weapon program. He also states the names of the persons who developed and patented both the SARS and COVID virus and who were involved in their development.

Covid is nothing except a power grab over society. A plot to consolidate power and attack Iran, China and other independent nations that are a threat to global hegemony. Today the EU, as a competitor nation, is being dismantled and its corporations sold to western interests in a bankrupcy sale. Brazilian election was stolen after support for BRICS. Brazil threatened independence from the US led global hegemony.

Trump knew. Trump was involved with COVID. He knew what he was doing. Trump signed funding for this operation to the ESF. He knew.

Even if it was used it against Trump and even if conditions created by virus allowed the election to be seized. He knew. He chose this. Trump signed the funding bill for the COVID operation.

Remember the congress and white house received mono-clonal anti-body therapies for COVID long before the public was given the “vaccine”.

Expect more viruses.

SARS/COVID are not a virus. They are a platform for creating new viruses.

What distinguishes Grand Conspiracies from the rest is the stakes. Those objectives determine the resources that will be applied.

For my focused purpose here, that means lots of contingency planning, increasing in size and scope as the coalition of the willing and unwilling, if you will, necessarily expands.

I've had only slight interest in those latter topics, and partly for that reason most of my views have been vaguely mainstream, not too different from what I have regularly read in the pages of the New York Times, the Wall Street Journal, or the Economist.

We all seek Safe Spaces, at least in terms of our expressed ideas. I won't belabor this, suffice it to say that psychological operations know what buttons to push for each cohort.

As I've mentioned before, the intelligence agencies — those charged with and paid to protect the national interest, for whom the Cardinal Error is a failure of imagination, expended enormous efforts after the Kennedy Assassination to condition anyone not authorized out of that disposition. Conspiracy theorizing, if yet verboten then the way it is to close now, was discouraged and stigmatized. The latter by the serendipitous appearance of Wacky Conspiracy Theories.

In any event, returning to the Covid Madness, the JFK Assassination is the right Grand Conspiracy to consider because it's a close analogue in putting one foreign power on the hot seat upon kickoff. But, here's the key, Russia wasn't alone there. It was joining factions of the US government.

If past is prologue, the origins of Covid will wax and wane as have the origins, so to speak, of Kennedy Assassination.

Not to put too fine a point on it, that's because it's never a search for the truth — remember, the stakes are too high, but is functional toward ongoing objectives, both offense and defense.

Such a catastrophe would be a thousand times greater than the Chernobyl nuclear disaster that helped bring down Soviet regime that ruled the USSR.

Ron isn't the only one for whom Chernobyl as an analogue to consider comes to mind. Though, given the current state of affairs under the illegitimate Biden regime, his observation should be filed under a good contribution to 'Let me count the ways. . .'

Consider it instead in terms of what I mentioned at the beginning — a failure of imagination. Unless I miss my mark, Soviet authorities, Soviet-style, engaged in both conspiracy theorizing and information management thereof.

This leads to something that also bugged me, how would it be brought in? Were people infected with it before hand? Was it brought in someone's luggage? How hard would it be to smuggle in a bottle of medicine? It's not like customs is looking for anything like it. Hell, what would you need to even transport it without infecting yourself or everyone else?

Wouldn't the military be monitored even more? Especially in the middle of the trade war, you'd think any thing they brought would be checked? I don't know if military athletes are treated any different than civilians, but surely they don't receive a free pass into a fairly hostile country?

I don't know if it's possible for Ron to find someone with more knowledge on how this could physically have been done.

Right, and in all likelihood China knew covid was really pretty mild. They must also have known it was a Us bio-attack. What does China do? Act like it's a world ending virus, spreading scary videos of people dead in the streets and hospitals built in a week.

Net result, the US population loses its mind and suffers worse consequences than China.

Fast forward to a couple weeks ago and china finally admits, by ending covid zero, that there never was anything to worry about.

China's response to Pompeo's stupidity is truly amazing – China won the battle.

Key problems with an “attack” theory that have never been addressed:

-1- Why intentionally choose SARS2 — a modified, **more contagious** coronavirus?

-2- The *Crimson Contagion* exercise was a failure. It shown that contamination less severe than SARS2 could not be contained.

Combine #1 plus #2 and it is immediately obvious that the idea of an “Attack on China” is a non-starter. Intentionally releasing SARS2 might be an “Attack on the Entire Planet”. However, that introduces additional complications.

-3- Why choose Wuhan as the launch point for an “Attack on the Entire Planet”?

-4- Why transport SARS2 from America to China?

Rogue **#NeverTrump** Globalists would be partners with CCP Elites. And, they want to send more American jobs to China. Going to the trouble to start a 100% guaranteed global event in China works against the interests of the purported plotters.

If the Rogues were targeting “world economic order” or “Trump’s reelection campaign”, why did the plotters not pick something much easier? Stealing SARS2 from America and releasing it at LAX or Heathrow Airport would be more effective and less risky.

-5- Why not “Obtain SARS2 from WIV, releasing it in Wuhan”?

If this was an “attack”, then this is the simplest sequence of events to intentionally contaminate Wuhan, China. Discussion of this obvious option is notably absent. This would be much easier

than a complex international conspiracy.

*Testimony from Wuhan Institute of Virology [WIV]*

-6- The biggest “smoking gun” is the missing testimony. WIV was built as a collaborative effort between the French and Chinese governments. There should be 50-100 French nationals on the ground there at any time. Why have we not heard from them in quantity?

-7- The Danielle Anderson ‘testimony’ has two glaring issues.

She worked in the BSL4 laboratory portion of WIV. Coronavirus is handled in the BSL2 part of the facility. She has no direct knowledge of actual execution on the BSL2 floor.

Worse yet, Anderson claimed that WIV could not be engaged in the exact research described in the Eco Health Alliance document dump. This effectively destroys her credibility. If she had given her ‘testimony’ under oath, she would likely be headed to trial for perjury.

*The NCFI Document shared with NATO+*

-8- Only MEDIA — No government has corroborated the existence of this document. Mr. Unz is relying on the American Lügenpresse who ran the ‘pee pee dossier’ story. Yes one MEDIA outlet in Israel also reported that *anonymous sources said something*. Subsequent investigative reporting either discovered nothing or there was no follow-up.

-9- Timing — This document is supposed to be from November, but the public did not hear about it until April. That timing is highly suspicious. NATO leaks like sieve. If ~30 NATO country politicians had received this, we would have heard about it before Christmas.

-10- No Document — Not a single page of this hugely important document has made it into public view. This strongly suggests that the document does not exist. Or, it was misrepresented to the media.

Occam's Razor continues to point at WIV as the source. There has been no compelling evidence to support a more convoluted explanation.

PEACE

The US government has the means – the knowledge, the experience, and the equipment.

But it could never keep something like that secret for years. People involved retire, get consciences and spill the beans. Some just get sick of it while doing it, like Snowden. The Chinese would eventually catch on and execute the bastards. Nothing like that could be done without approval at the highest levels and people at high levels of the military provide themselves with good paper cover, which would be copied and sent to friendly reporters.

‘The virus was deliberately released in China by some group or groups within the U.S. intelligence and security services. The purpose of such a release would be partly to disrupt China and partly as a live exercise for pandemic preparedness.’ — Will Jones

Assume, for purposes of discussion, that Jones is correct. This raises a question:

Didn't the malevolent spooks realize that international air travel quickly would spread the engineered virus around the world, including to the US?

It's like shooting at someone inside a steel-walled vault, and having the bullets ricochet back and wound the shooter himself.

One accepts that the intel community are amoral sociopaths, and not nearly as bright as they imagine themselves to be.

But would they really do something this gobsmackingly stupid? And what potential rewards would induce them to do so?

Yoichi’s work is an acquired taste, but is always informative. I see his writing as intentionally somewhat “ethereal”, the way I imagine writing is when the regime will arrest and torture an author for writing the truth.

IIRC he thought the virus was developed by Japan and Britain to attack China directly and indirectly the US. This may be a different theory than you have heard, but he builds it upon facts he has dredged up.

Even if you disagree with his ideas, his works silently scream “do not take anything for granted” and are valuable for that reason alone. I think he believes that fieldwork is essential to understanding the crime.

There are two reasons:

1. The 80% includes those who figure out how to make it look like they comply,
2. We’re all becoming good samizdat, the Russians who would never openly dispute or defy the Soviet government, but would slide under it, living normal lives.

Shlomo Baker writes :

[Dr Robert] Malone [who pioneered the mRNA technology being used in the clot shots] has been a horse rancher for the last 20 years.

Shlomo, I see you're at it again, peddling the 'Malone is just a horse rancher' smear once more.

Using you logic, because the greatest scientist that ever lived (Isaac Newton) blew his money speculating during the Tulip Bubble, we could then dismiss the entire body of his scientific/mathematical output and label him as a gambler and a loser.

YOU'RE AN ABSOLUTE FUCKWIT SHLOMO.

What hobby Dr Robert Malone pursues in his twilight years is of no consequence as far as his long and loud warnings to humanity to AVOID THE TOXIC CLOT SHOTS.

If anyone would know of the shortcomings of the mRNA technology, who better to ask than THE PIONEER OF SAID TECHNOLOGY !!

Dr Robert Malone is indeed a towering figure, not just in the alt-Covid/anti-vaxxing circles as Ron Unz is falsely claiming. Malone is highly regarded by all the Not-Beholden-To-ZOG world class medical community.

Unfortunately for you Shlomo and for Ron Unz, neither of you take heed of what the non-ZOG aligned medical community are saying.

If you didn't read it in the New York Times or the Zio controlled MSM, then it isn't true (as far as the two of you are concerned).

The two of you have an axe to grind on behalf of your Big Pharma benefactors.

My hunch is the Deep State (whoever that is) intentionally caused the COVID crisis to trigger what I think of as ‘Biowarfare Protocols’ which are presumably sweeping and draconian. Once this is put in motion it allows an unprecedented power grab. This idea may be too conspiratorial, but some of the precursors to this event look strongly like the predictive programming that is occasionally mentioned.

Here is information that DOD is behind the whole scam.

Video Link

Alfred in post #20 linked to a variation on this information.

I've contended for a long time that the US is a soft military dictatorship where the theater of elections and "representative government" is a facade for public consumption. DOD is the deep state along with their other malignant agencies like CIA, FBI, NSA, etc. They run the country for their benefit. The most logical source for all this is the deep state.

In order to implement all that they needed a pandemic. So if there was a “lab leak” it was deliberate not accidental. And since you know that China isn’t too strict on QC, so must have Fauci and others in US, so why did they allow that research to be done in China?

And if Covid is just the flu then China must have colluded with others to present it as a deadly new virus since China was the first to raise the panic, way before the US. That would imply the conspirators instructed China to start calling the flu Covid and to implement those counter measures.

So it seems more likely that it was a deliberate biowarfare attacks by US on China.

You don't attack a country or even a hemisphere with a virus having an Ro of 3.8. The signature capability of SARS2 is how incredibly infective it is. Not incredibly deadly, with an initial IFR of .26%. Just incredibly contagious. The epidemiological "blowback" of such an attack on the perpetrator would be inevitable and easily understood. So why would the U.S. use it in a first strike?

When such a virus is newly on the loose, you don't tell people that blocking planes from China would be racist. You don't spend months ignoring the possibility that the virus could reach U.S. shores, only to spring testing and prophylactic measures once it is too late. Nancy Pelosi was telling people to come on down to Chinatown at the end of February, two months after the virus was discovered in Wuhan. Everyone knew immediately how incredibly contagious this virus was. Yet there was no action taken by any of our leaders to slow or prevent its spread to the United States.

It's not an international act of war FFS, it's an international coverup. SARS2 leaked out of Ft. Detrick in mid 2019 and immediately sparked an epidemic of novel pneumonia. This pneumonia was unscientifically associated with vaporizers in many cases, but scientists also noted an extreme surge in other respiratory outbreaks in mid to late 2019, while the CDC ended the year warning about a very early and severe flu season. Although COVID, EVALI, mystery pneumonia, and flu all have different names, they have mostly identical symptoms that cannot be distinguished without a test. Furthermore, there was never any way to test for EVALI, and COVID tests did not become available until EVALI disappeared.

Here's what really happened. A virus that leaked out of Ft. Detrick started spreading across the U.S. and killing people. The government tried to sweep it under the rug until Sept. 2019, when they decided to spoof its origin in Wuhan. The time and place was carefully chosen. They let it loose at the start of the Lunar New Year to ensure maximum spread. Furthermore, the "lab leak" origin in Wuhan has always been a fallback from the "wet market" in Wuhan.

China immediately set the panicked tone of the pandemic response: emergency hospital construction, brutal lockdowns, people dropping dead in the street. Burning so many bodies that a sulfur dioxide plume was visible from space. This is the time period when the media was telling us not to be racist. America watched the threat of COVID meander over from China with extreme nonchalance. I believe it was the policy of our government NOT to impede the spread of SARS2 from China to the U.S. in any way. Why? Because it was already here and widespread. They had to make it SEEM like it spread here from China.

This also explains why the CDC was so stingy and controlling with early testing. They had absolute control over the official pandemic curve, including cases and deaths, through their control of testing. The growth of COVID in the U.S. in 2020-2021 was NOT only the result of the disease becoming more widespread. It was the result of steadily increasing testing capacity. The finest example of the CDC's statistical manipulation surrounds the election and inauguration of Biden. According to official stats, COVID became 3x as prevalent per capita in the lead up to Inauguration. It peaked on Inauguration Day, then became 3x less prevalent (until Delta hit later in 2021). But the official statistics didn't show a 3x spike; they showed a **9x** spike! This is because the CDC was **also** performing 3x the number of tests per capita. After Biden was in,

they rolled their testing rate all the way back down. It seems to me that the period from the election to the inauguration was an exercise in naked statistical fear mongering. The CDC *never* had a constant testing capacity. Instead they have had the ability to move COVID statistics at will.

This explains the vaccines as well. SARS2 has a SARS backbone. But it's spike protein is littered with genetic inserts. The spike protein is engineered. Furthermore, it is widely understood that the spike protein is the cause of many of COVID's unusual pathologies. As the Salk institute showed, the spike protein causes injury and disease independently of cellular infection. Now, the vaccines force your cells to make the same spike protein. So it is entirely plausible that the vaccines also cause injury and disease.

It also becomes apparent that the intent of the vaccines was never to protect individuals or slow the spread. The intent of the vaccines was to force mutations on the circulating SARS2 spike protein, so that circulating SARS2 would be less dangerous overall to everybody (whether vaccinated or not). By this metric the vaccines spread to have accomplished their goal. At some point we are going to be left with another endemic human coronavirus. Who, what, when, where, why, and how are still questions that deserve a definitive answer.

Unz' theory leaves way too many questions unanswered.

@Tony Hall

Ron Unz writes,

“Well over a million Americans died in the epidemic.”

Its well established in countless credible sources that the frauds connected to changing the rules for filling out death certificates formed one of the major early frauds in getting the manufactured COVID crisis up and running. Why keep flogging this dead horse? There is no way to know presently how many of those who died supposedly of COVID– mostly sickly old folks before the injections started

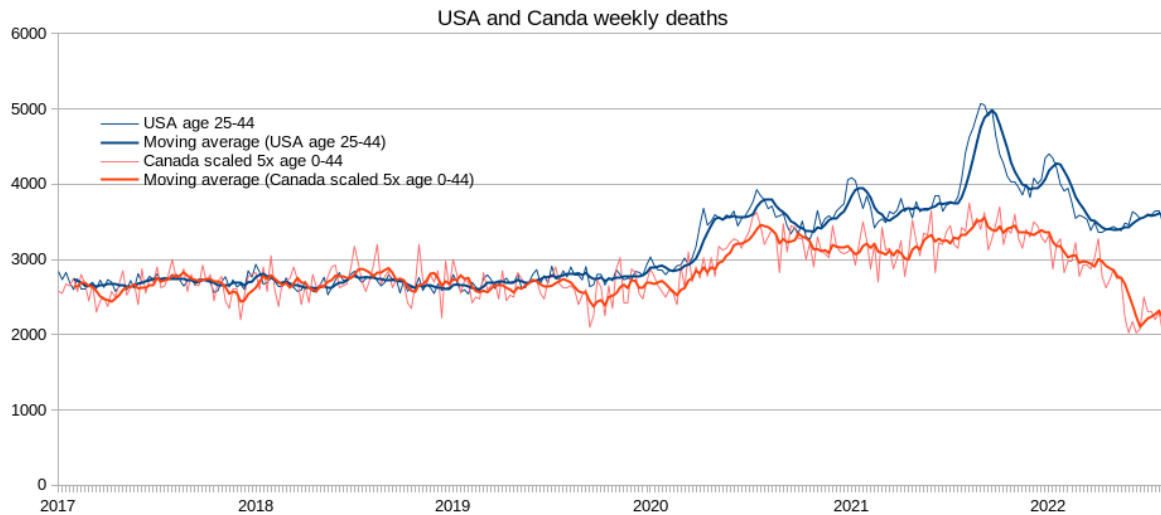

If only relatively few “mostly sickly old folks” died from covid before the injections — how do you explain this graph for the 25-44 age group in the U.S. ?

Mind you: Total death figures don't take into account what caused the deaths. Looking at them, the issue if someone died from Covid or with Covid or from something else is irrelevant. What caused the sudden jump in deaths for the 25-44 age group in the U.S. in the beginning of 2020?

Sure, we don't trust U.S. figures, so let's compare the above figures with Canada, age group 0-45.

To put the Canadian figures on the same scale as the U.S. I multiplied them by 5. Close enough to compare changes. Take a look:

It really looks like Canada had similar experience as the U.S.

Explain this: What caused this sudden rise in deaths almost a year before anyone was vaxxed – if it wasn't Covid?

You don't want us to keep beating a dead horse do you?

The insistence on mRNA vaccines was all about testing a new military technology. The neocon-run US has a huge lead in that technology and wants to use its advantage to beat down challengers to its unipolar hegemon status, in accordance with the Wolfowitz Doctrine.

I used to view Kevin Barrett as a credible alt-media figure ... until he turned into Ron Unz's lapdog and started pushing this inane (if not insane) hypothetical scenario as if it were somehow proven fact.

Never mind that the real crime of this last three years has less to do with a virus and A LOT more to do with governments' actions in response to said virus.

In the practice of modern medicine, sepsis, not the bugaboo coronavirus, is the overwhelming killer of hospitalized intensive care COVID-19 diagnosed patients. In modern medicine It has been believed to be a bacterial infection, not an invisible virus. Belgium doctor Jean Louis Vincent, MD, PhD, recently concluded that deaths attributed to COVID-19 cannot be distinguished from death by sepsis. Moreover, researchers from BioForce labs in France indicate that all COVID-19 deaths are actually hospital-acquired sepsis. Perhaps this explains why 137 independent researchers and laboratories in 25 countries have been unable to find or credibly photograph the bugaboo Coronavirus virus?

Since sepsis is the unrecognized elephant in the hospital room of Coronavirus patients, there need not be any Coronavirus at all to result in the same magnitude of deaths attributed to it.

Covid-19 does not exist, it is an illusion concocted by the WEF and the Rockefeller and Gates Foundations and UN Agenda 2030 and the WHO, etc., to scare the people into taking the genocide MRNA clot shots , which is a genocide agenda to depopulate the world.

Over 5 million illegals have crossed the border since the covid-19 scam was thrust upon us and not one of the illegals has had the MRNA clot shot, and congress and their staffs are exempt as are the WHO, the UN members and staffs, the CDC, the NIH, etc., etc., it is a hoax and this proves it is a scam and a psyop and a hoax.

All the elites needed was the perception of a pandemic, here in Montana , if you told someone there was a grizzly bear in the area, people would be scared, regardless if there was a bear in the area or not, it is the same method that was used with the covid-19 scam and psyop, just tell the people that there is a threat and the majority of people believed it.

What covid-19 is , is the flu and colds and pneumonia renamed, that is all, and it got millions to take the genocide MRNA shot that has killed millions, mission accomplished.

These demons behind this scam and psyop are most evil, draconian, demons on the face of the earth.

You are right, many bacterial infections are secondary to viral infections, particularly when it involves pneumonias. We see this in humans and many other species. The virus is the primary invader, doing its damage in the respiratory tree, by breaking the protective barriers, to set the stage for the secondary bacterial components.

Perhaps they had done something similar before that led them to think this wouldn't be much problem? Perhaps they underestimated the R0 for the virus..

This seems implausible. They would have to be simultaneously Smart & Stupid.

- Dumb enough not to grasp a “juiced” SARS2 would be more contagious than the original SARS.
- Smart enough to weaponize the virus and get it to Wuhan, with no mistakes along the way.

If the plotters were incompetent fools who intentionally took SARS2, they would have lost control near where they stole it.

---

This leads us back to WIV as source. It is the easiest place to obtain the enhanced SARS2.

It is proven fact that WIV was performing “gain of function” research on coronavirus. They were using the techniques needed to insert the public knowledge (though patented) gene sequence to increase communicability.

@gay troll

When such a virus is newly on the loose, you don't tell people that blocking planes from China would be racist. You don't spend months ignoring the possibility that the virus could reach U.S. shores, only to spring testing and prophylactic measures once it is too late. Nancy Pelosi was telling people to come on down to Chinatown at the end of February, two months after the virus was discovered in Wuhan. Everyone knew immediately how incredibly contagious this virus was. Yet there was no action taken by any of our leaders to slow or prevent its spread to the United States.

It's not an international act of war FFS, it's an international coverup.

100%.

It's as ridiculous as the 9/11 blowback theory, which is the official 9/11 conspiracy theory. The same people are still running the show, but now they're so incompetent that they messed this terror operation up big-time. Good thing we have the (not a biological weapon) Covid vaccine to save the day. Not to mention, the same people pushed the global lockdown (which was actually a good thing).

@Alfred

I miss the old days. Back then a long American Pravda essay by Ron Unz would start out like unflavored oatmeal. For several pages (yes I would print them out) they were bland and boring. But as I kept chewing and reached the end something would happen. I would feel a great surge of energy and mental nourishment. I really got something out of his work.

These days it is the opposite. For the past couple years his essays start out pretty strong. And for a moment I think: here is some righteous almond roca ice cream to delight in. But, by the time I get to the end I fell as though he just put a cup of sawdust in my mouth. No way am I going to swallow it (i.e. that this was some a small rogue element, a Pompeo stunt). Face it: something else is going on.

p.s. Ron, the legitimate dissenters do not need to come over to you. You need to move over to them.

Start with Dr. Peter McCullough and Dr. Jay Bhattacharya and the Great Barrington Declaration. There are many others including, yes, Dr. Michael Yeadon. (Thank you Alfred, comment # 20). And of course, RFK Jr. has fruits of insight to last you years.

The lockdowns and coerced injections were part of a biodefense exercise. They, like the bio-attack itself, were part of a military operation, not a civilian public health response to a natural pandemic. Their purpose was to practice for the next bio-attack on China (and/or Russia and/or Iran) and build up a military capacity to unleash plagues at whatever level of virulence deemed most advantageous. The insistence on mRNA vaccines was all about testing a new military technology. The neocon-run US has a huge lead in that technology and wants to use its advantage to beat down challengers to its unipolar hegemon status, in accordance with the Wolfowitz Doctrine.

This makes sense. While Russian traditional military technology has now far outstripped the US (as the fiasco for Ukraine — backed by NATO — has proven) the ZOG-US probably has an advantage in biowarfare technology, and willingness to use it (because ZOG-US is Satanic).

Quoting Unz from his article:

“If the tens of millions of individuals who have been concentrating their attention on the consequences of the Covid outbreak now also begin to consider its likely origins, I believe that the existing cover-up may collapse, with potentially enormous political ramifications.”

Mr Unz: Thank-you for the re-attribution. Those of us concerned with the officialdom responses to the covid phenomenon, are the vaxx-hesitant (actually covid-gene-therapy-hesitant). You have noticed that the wonky officialdom responses, have all been in support of this crazy-making-vaxx-program-as-executed, – yes? Anyways, ... maybe you are slowly coming around on dropping the anti-vaxxer rhetoric (I hope so). But mainly, I thought I should weigh in here, on this precise passage of yours, because of course, you could not have missed that all the crazy anti-vaxxers (actually covid-gene-therapy-hesitant, aka ‘those of us concerned with the officialdom responses to the covid phenomenon’) among your commentariat, have been very focused and concerned about it’s likely origins, all along, and largely agree with many of your speculations, but also see that you are emphasizing the wrong elements. The conspiracy (among those controlling things in our western jurisdictions – the faux-west globalists) is larger and deeper than you think. It is actually you Unz, that populate the less sophisticated take upon all the evidence, as compared to your average vaxx-hesitant folk, ..... you still think the sars-cov-2 blowback upon all the western population was not foreseen. I guess Will Jones thinks that as well (because he says so). Yet Will Jones asks us to consider that what we are looking at is the Deep State Crimson Contagion exercise going live, as it was planned to. Yes, ..... of course it’s that, and more. There has been no sense of panic emerging, from any corner of the officialdom edifice, at any

juncture. The blowback topic is mishandled by Will Jones, and by proxy then, Unz now, too. Why is that, ... why or how does Will Jones avoid the blowback topic? I don't know why, but I do know how. He avoids it by avoiding any discussion of the CPP culpability with respect to accepting the patsy-ship they have taken on, which must have been in play by September 12th, 2019, that is, unless I am all wet with respect to this claim of mine, as per comment thread exchanges with you (Unz) back in Oct/22.

So, by your rationale, if it wasn't for this reason that it made 'perfect sense' to launch said rogue neocon Deep State false flag hack, .... then what was the reason? Note that the American virologists working within the team effort with Dr. Shi's lab (EcoHealth Alliance, Ralph Baric and company) already had access to the shared database that were taken down, but only prior to September 12th, 2019.

Let's suppose these CCP actions of September 12, 2019 are evidence of the CCP's acquaintance with some new knowledge (perhaps suspicions by then, that the coming patsyship-ploy-play was now coming into effect, holy sh\*t!). In that event, nearly every one of Will Jones' conclusions in the 3 Jones' articles Unz references, (and therefore Unz too, by proxy), are only right by half-measure, and therefore wrong by half-measure (i.e – not nearly sophisticated enough .... we need speculations, conjectures and theories that fit **all** the evidence).

These are **not** official CDC figures according to this:

<https://www.poynter.org/fact-checking/2021/why-the-covid-19-survival-rate-is-not-over-99/>

To minimize the importance of vaccination, an Instagram post claimed that the COVID-19 survival rate is over 99% for most age groups, while the COVID-19 vaccine's effectiveness was 94%.

The post's alleged survival rate for COVID-19:

0 – 19 years, 99.997%

20 – 49 years, 99.98%

50 – 69 years, 99.5%

70+ years, 94.6%

An incorrect use of data

The Instagram post misrepresents data from the CDC's COVID-19 Pandemic Planning Scenarios document published in September 2020. It was created so public health officials who use mathematical models could help hospitals and policymakers react to different levels of severity of the pandemic. The data does not show the likelihood of surviving COVID-19.

These numbers are meant to be used for estimates of death over time, said Dr. Ruth Etzioni, a professor of biostatistics at the University of Washington School of Public Health.

If this is incorrect: provide a link to the CDC figures. Quick search didn't reveal any such figures on the CDC website for me.

Besides: Whatever the IFR is for this age group – the question remains, what caused this sharp rise in deaths in early 2020?

The last time I was sick was in 1996. I came home feeling as fit as a fiddle and two minutes later was flat on my back. I lay on the family room couch for one week in the same clothes, not eating, not drinking and hallucinating, chills and sweats etc.

I never took any medication as I was too weak to go to the pharmacy or Doctor. One week later it was all over and that was that

I did not catch Covid during the freak show circus of the past three years.I was not vaccinated as I am too cynical where MSM, the Politicians and Doctors are concerned.

Here is the rub though. My Sister in Law caught “Covid” AND her symptoms were the same as my stupid flu/ cold or whatever 26 years ago. After a week whatever it was disappeared the same way it appeared and she is as right as rain. No one else in her household got anything..

So, while I am not a Doctor, as far as I am concerned the Flu (whatever the strain) is the same as Covid (whatever the name). The whole thing in my opinion was a load of shite.

It would be hardly surprising, too, if they bungled the attack so severely as to inflict more harm on their own people.

Agreed – in fact with Talmudic Jews running the west, that would be a feature, not a bug.

Not sure why Ron of all people can't see that the Jews hate the Goyim and are doing everything possible to destroy the west; depopulation by Covid vax (vaxassination?), depopulation w/ chemicals that mimic hormones and destroy fertility, overrunning the west with low IQ / low civilization populations, queer ideology, genital mutilation of children, CRT & anti-white racism, fear of climate change so that those who could actually raise a family won't, etc. etc. etc.

The idea that the “leaders” who run the west are trying to preserve and advance western civilization and populations is completely absurd. Those who run the west (Jews) hate the west. Period.

The idea that “our” government is working on behalf of its population is fucking retarded. So Ron is now either retarded or worse. What a serious drag considering the brilliant work he did exposing the Jew.

Covid exists. I've had it. Awhile back I caught the flu, about the same symptom-wise as I've had a number of times. A couple of months later I had Covid. It had some similarities in symptoms and some differences. Many others whom I know have had Covid and report the same thing. "It was a little bit like the flu, but different, as well." I tested for Covid in both cases. In the first, I was negative. In the second, when it was somewhat like the flu, but somewhat different, I tested positive for Covid. BTW, it wasn't as bad as the flu.

You guys who draw the conclusion that Covid "has never, ever been conclusively demonstrated to exist" means that it doesn't exist are thinking very wishfully. It's common for people, otherwise intelligent, to put aside their normal reasoning ability to believe and promote poorly thought out crap just because it suits their agenda. It's why the term "conspiracy theory" was easily able to be linked to the image of unshaven mental misfits in their mother's basement. This that you seem to be promoting, that it doesn't really exist, is the stupid crap that discredits legitimate, fact-based study of behind-the-scenes public manipulation.

A few years before the covid outbreak, I recall Adam Schiff, the US senator, going on the media stating that the West Nile outbreak could be a terrorist plot by Arabs against the US. I thought then; he's just promoting more hatred and war mongering. Covid knocked that narrative out of the park, vis a vis middle eastern Arabs, but it made me aware that the US uses virus outbreaks for political reasons. If they do that, with such narratives about West Nile, who knows what they actually do in the labs ? Projecting on Arabs what they would like to do to them, followed by what they actually did to China; spreading the covid bioweapon to them [and targeted Iranians] and then blaming China when it boomeranged?

@niceland

First off-that “explanation” is from Politifact, who I trust about as much as my friendly neighborhood meth dealer in terms of honesty, accuracy and intellectual rigor.

But beyond that, the text indicates that those survival rate figures were developed to be used as model inputs. Fine! I did mathematical modeling in the transportation sector for over 25 years.

In order to model travel behavior accurately I needed realistic estimates (derived from various surveys and observations) for numerous real-world travel behavior characteristics and socio-economic characteristics in order to develop accurate model parameters and calibrate/validate the models.

Those CDC survival rates given in the initial table, as far as I can tell, are the *Infection Fatality Rate* (IFR) the number of the overall population that is infected, that is expected to survive infection.

As a part of their “refutation” of the use of this CDC table as an accurate estimate of the overall survival rate, the Politifact “explainer” gives an overall fatality rate figure of 1.7% of *reported cases* again derived from CDC figures.

But by definition that is the *Case Fatality Rate* a totally different animal, that again, only takes into account individuals whose cases were reported either by a doctor or a public health agency. But many cases obviously go unreported (including mine earlier this year), usually because the infection is so mild the individual doesn’t need medical attention. They may not even know they

have “COVID”. This was certainly true even in 2020 when those figures were published, and accounts for the discrepancy between the two estimates.

Ask yourself this: why would CDC be using inaccurate figures as model inputs to forecast the effects on the health care system of the COVID pandemic? They wouldn't, no responsible modeler would.

And you blamed the Chinese who, for motives of their own, wanted to destroy American potential to reindustrialize (whether Trump was serious about or could actually bring about that end is moot). You may want to consider why Jesus chose to remain silent when he was asked “what is Truth?”. And also what kind of civilization you can expect if civility is not practiced.

Things are not so simple as tend to think.

But ask yourself this, perhaps: “would there be more or less free speech on the internet if Ron Unz decided to close down shop?” – I think the answer is obvious.

I happened to be watching one of the Covid news conferences on TV in early April 2020. Pompeo and Trump were there along with Fauci. Pompeo says to Trump “It’s an exercise.” Then Trump retorts “Thanks for telling me.”

My question has always been – Why was Fort Detrick closed in October 2019?

I gave up on this one, for everything seems to go back to a person named Toby Young. Things I read about this person are not at all reassuring.

<https://mediabiasfactcheck.com/daily-sceptic-bias/>

”Global warming started to run out of steam over two decades ago... Half of the apparent global temperature increase from January 1910 to January 2000 is due to administrative adjustments.”

“Covid Vaccines More Likely to Put You in Hospital Than Keep You Out”

More than twice as many Americans have lost a household member to a Covid vaccine injury as have lost one to Covid.

“Natural variation explains a substantial part of global warming observed since 1850;” no statistical evidence that global warming is intensifying natural disasters, or making them more frequent.

Mr. Young seems to me to be the sort who will publish *anything*.

As an aside, while looking into the claims about US Intelligence knowing about the Covid Pandemic before China did, I found this:

More to the point, the DNI's annual briefing has repeatedly warned about the risk of a global pandemic. The intelligence community first raised the alert immediately after President Barack Obama took office in January 2009, when then-DNI Dennis Blair testified that, "The most pressing transnational health challenge for the United States is still the potential for emergence of a severe pandemic, with the primary candidate being a highly lethal influenza virus." Following the 2009 H1N1 (swine flu) outbreak, Blair doubled down in 2010, highlighting the potential for a pandemic to disrupt the economy. A "lack of consistent surveillance and diagnostic capability for diseases in animals," he said, "undermines the United States' ability to identify, contain, and warn about local outbreaks before they spread."

Blair's successor, James Clapper, delivered the same message in March 2013, but also refined the US assessment of the threat with prescient detail. Pointing to the growing danger posed by zoonotic viruses, he warned that "an easily transmissible, novel respiratory pathogen that kills or incapacitates more than one percent of its victims is among the most disruptive events possible. Such an outbreak would result in a global pandemic."

If US Agencies predict an epidemic every month or so, eventually they're going to be "right".

@Ghan-buri-Ghan

mRNA vaccines being employed were based upon an entirely new biotechnology and had required the use of emergency waivers to circumvent what would have otherwise been a long and cautious clinical trial process.

anyone with a grain of biological education would agree mRNA is not “an entirely new biology”. mRNA is a root element involved the translation of DNA to proteins. One thing mRNA is not, is a vaccine. mRNA is at the basis of protein production its been known about since the Watson and Crick first discovered DNA and the protein product schema. mRNA is a genetic element involved in many different biological processes. Change any one of the processes is a walk into the unknown and most likely will adversely affect about 2% of the population subjected to mRNA treatment. My 2% estimate is based on experience in the laboratory with cells in solution many moons ago.

<https://byjus.com/neet/difference-between-mrna-trna-and-rrna/>

I blame Ron for his refusal to investigate this matter much earlier then now. Comments providing data indicating mRNA was a dangerous thing to be playing with, were denied appearance on the website in the early days.. ..

Although my corp biolab experience is four decades ago, the less regulated lab was more than 10x (100x?) more productive than the more formal labs working the same problem.

Who was more successful? Depends on how you count.

The less regulated lab solved all the immediate problems in under a year and some outside patents, moved on to other projects while still fighting downstream political stuff for some years.

The more formal labs generated over 10x the infrastructure (>10x people etc) and collected grants and salaries for two decades, arriving a similar conclusions in somewhat greater detail but (copied?) same concepts. Personally, they collected huge payoffs for much less results per person per year.

@DeepThroat

So you are discounting the clearly obvious and easily proven evidence that Trump is probably one of the biggest and most easily manipulated imbeciles to ever take a dump into the toilet adjacent to the Oval Office?

Let's get serious here. If Trump were really as sneaky, conniving, devious and treasonous as you claim, and if he was fully involved and cognizant of the evil depopulation agenda behind these death jabs – why would he staff up his administration with so many Deep State, war mongering jewish neocons and globalist, open borders and amnesty supporting RINO slabs of dog manure? A truly clever and devious worm would have realized that he would tip off his critics by doing that, and they would question his sincerity for the America First, pro-MAGA, populist, Nationalist agenda.

I don't think that Trump has the intellectual ability to be trusted by the evil jewish cabal to be brought into a conspiracy that is this enormous. They hate his guts and I do not believe anyone who tries to say that the jewish hatred for Trump is fake and not legitimate. I am about 90 percent convinced that jews studied his personality and developed a psychiatric profile on the guy and knew how they could most easily capitalize on his abundance of character defects (narcissism, egotism, his being a conceited blowhard, etc.) and they manipulated the dumb NYC rube to do their bidding.

I will also say this. If America was a 100 percent White European Christian nation and there were not a single jew allowed to reside inside our nation – Trump would be the absolutely perfect president, because his basic instincts seem to be good for such a nation. He does seem to care about America and at some level, I

think he does notice that the nation is being subverted and deliberately destroyed from within. Unfortunately, he is dumber than 30 bags of 6 month old dog manure when it comes to him being able to grasp the identity of the race of subversives who are orchestrating the destruction of America.

I mean, he has allowed his own family to be contaminated by the group who are working day and night to destroy White Western Nations.

@gay troll

I like your take on the middle parts of the potential narrative you present, as to: ‘Covid phenomenon: What actually happened’.

But on the origins: You might be right but there are those that would argue hard against that. It does sound within the realm of possibility to me, despite these criticisms. But as well, the origins issue might be more sinister. I wonder about that, because I still wonder why didn’t the CCP tell the world when they were being made a patsy of, and prove it by widely releasing the links between Dr. Shi’s work and Ralph Baric’s work, instead of doing the opposite and censoring those links, and doing that quite early on, by September 12, 2019? There is still a story to be told there, ..... like I start to wonder, is the PLA so important and so powerful an organization within China, that they get to shove the Party around, and force the opposite of what would be a geo-political victory, by the medium-term, because the PLA wanted to protect their bioweapon turf? I mean, if it’s that, then, I start to think to myself – holy crap .... this means we are in the midst of a biowar! This all seems rather dark to me, instead of rather innocent (on the origins).

So that leaves, for examination, your concluding remarks about the – ‘Covid phenomenon: What actually happened’:

“The intent of the vaccines was to force mutations on the circulating SARS2 spike protein, so that circulating SARS2 would be less dangerous overall to everybody (whether vaccinated or not). By this metric the vaccines spread to have accomplished their goal. At some point we are going to be left with another endemic human coronavirus.”

I hope so, but there is still elevated excess all-cause mortality in many western jurisdictions. And it looks to be vaxx-mediated. The vaxx mediation may be as simple as mostly consisting of a

potentiating of covid, .... covid that perhaps has been under-reported all along. Mmmmm gay troll, you are one smart cookie. I guess that is what you are saying – eh? In your estimation then, .... when do we come out of this?, .... I mean, when do the authorities stop recommending vaxxes, that according to your scenario (perhaps) drives clade-variant-spikes, with the associated spikes in illness and death, to avoid worse spikes in illness and death that may have occurred without the vaxx-fast-lane emerging as a tool to drive the emergence and spiking of less lethal clade variants? Also, I dunno ..... it sounds a bit like that first episode of Black Mirror to me, ..... bizarre and surreal. It seems like your narrative is about manipulation upon manipulation, to hide even earlier manipulations, all done in order to maintain the manipulative order of things. All well and good but what is this ‘manipulative order of things’ all about, and why does Deep State seem to love mRNA tech so much, when it is not yet ready for prime time? In other words, what is Deep State’s agenda really about, around all this manipulative activity? I tend to think this might be about forcing the mRNA tech well before it is ready for prime time, so as to work out all the kinks on us guinea pigs, for what is actually a hidden ulterior transhumanist agenda of life extension research (which is just a conjecture), whereas you seem to believe that the fact the mRNA tech doesn’t work, and in fact probably potentiates covid, is a feature not a bug. I mean, thinking this through, ... I guess I still really don’t get it, your stance. I don’t sense that mRNA tech, useful as an anti-antidote then, I guess, would feature much, after this episode, .... yet it seems there is only a growing list of new mRNA tech research and apps in the works, announced since Jan 1st.

I hope no offense taken. What you are doing is what is needed, – offering conjectures. Just thinking out loud.

Thank you for helping my credibility. Being attacked by a known Iranian state operative, such as yourself, makes my case much more convincing.

*You're 'welcome'.*

Your admission that you are an Iranian state operative is appreciated.

Non-scientist staff (e.g. security, building maintenance) are not particularly well paid. It is fairly easy to envision them stealing apparently healthy animals slated for destruction. They would then transport them to a place where they could be sold for personal profit, such as the Wuhan Wet Market.

*'Occam's Razor' must fit to 'means, motive & opportunity;'*

MEANS = Carrying a cage with an animal in it is pretty easy

MOTIVE = Personal (though petty) gain

OPPORTUNITY = Building Security Staff access to the complex

This is vastly more probable than a thriller scheme that sounds like a Tom Clancy novel.

I believe China's zero-covid policy really didn't have anything to do with Covid. I think it was a bit of an experiment to see what effects a hard lockdown would have on future pathogens that possibly could be more deadly; prepare with a virus they know is pretty mild. They were also gauging how obedient the citizenry was to their demands, and how far they could push the limit before people started to break.

They also knew shutting down would affect American supply chains greatly, and have financial ramifications within the U.S. With the BRICS alliance growing stronger, taking a stealth swipe at the U.S. financial system, they could be pressure testing us for future attacks.

I don't know what caused the jump at the start of 2020, but it's interesting that the spike in late 2021 coincides pretty well with Biden's various vaccine mandates, which is what got me a lot more interested in the vaxx issue in late summer/fall, because I was subject to them. The smaller spike later in 2021 coincides pretty well with the December deadline to get vaxxed or get fired. Not saying that's definitely the cause, but maybe connected.

Thankfully we don't have to rely on fact checkers, because they provide link to follow:

The document these suspicious figures came from is here:

<https://www.cdc.gov/coronavirus/2019-ncov/hcp/planning-scenarios-archive/planning-scenarios-2021-03-19.pdf>

**Last updated sept 2020**

Same or similar planning scenario, later version is here;

<https://www.cdc.gov/coronavirus/2019-ncov/hcp/planning-scenarios.html#box1>

**Last updated april 2021**

It contains these figures;

Infection fatality ratio (Estimated number of deaths per 1,000,000 infections)†

0–17 years old: 20

18–49 years old: 500

50–64 years old: 6,000

65+ years old: 90,000

† These estimates are based on age-specific estimates of infection fatality ratios from Levin AT, Hanage WP, Owusu-Boaitey N, et al. Assessing the age specificity of infection fatality rates for COVID-19: **Systematic review, meta-analysis, and public policy implications.** *Euro J Epidemiol.* 2020; 35(12):1123–1135.

Using a meta regression of data from England, France, Ireland, Italy, Netherlands, Portugal, Spain, Geneva (Switzerland), Belgium, Sweden, Ontario (Canada), and 12 U.S. locations (Atlanta, Georgia; Connecticut; Indiana; Louisiana; Miami; Minneapolis, Minnesota; Missouri; New York; Philadelphia, Pennsylvania; Salt Lake City, Utah; San Francisco, California; and Seattle, Washington), Levin et al. produced estimates of IFR and associated 95% confidence intervals for 0.5–year age bands from 1 to 96 years old. To obtain the estimated values for each scenario, the IFR estimates by age were averaged to broader age groups, using weights based on the age distribution of cases from COVID-19 Case Surveillance Data reported by February 14, 2021 (public use version of data: <https://data.cdc.gov/Case-Surveillance/COVID-19-Case-Surveillance-Public-Use-Data/vbim-akqf>).

So in April 2021 the CDC is using research that appeared in *European Journal of Epidemiology* in 2020 as source for IFR numbers.

I don't think these count as official CDC figures either.

People are having to go into hiding to avoid being institutionalised and forcibly injected with Covid vaccines against their will. Especially if they're 85 year old Russian survivors of Nazi concentration camps living in Germany:

<https://www.veteranstoday.com/2023/01/15/germany-orders-russian-holocaust-survivor-institutionalized-because-she-refused-the-covid-19-shot/>

So if you fit the intersectionality of 85 year old, female, Nazi concentration camp survivor, music composer, living in Germany you better go into hiding. On the other hand, even if you don't fit this intersectionality you better run and hide from forcible injection of Covid vaccines. At least in Germany. You've been warned.

The call for the indictment for fraud of the senior corporate leadership of the Big Pharma firms involved in the Fauci-Funded US Bioweapon, could turn out to be a piece of strategic genius.

Fraud is the ultimate solvent, contractually speaking.

If fraud is proved against the major players – in how they doctored and massaged the data they presented to get the EUA for their *Magic Jizz* – then all their immunity from lawsuit goes away.

This is – almost certainly – why the corrupt shitbags at the FDA and CDC have been hell-bent on getting the ClotShots into the quasi-mandatory childhood vaccine schedule.

Yes, that detail has always bothered me. Very specifically, Pompeo says, “We’re in a live exercise here”.

Trump, behind him, mumbles but it’s audible, “you should have let us know.” So, WTH is that all about?

I will add that it was very obvious that at several (many?) points in time in 2020, Trump seemed absolutely drugged. Like Valium had been put in his food. He spoke slower with words garbled a bit, his eyes looked glassy and he delivered his speech or impromptu monologue like a zombie. The best example of it is his State of the Union speech in 2020. Unreal. Pelosi was asked about that the next day and she said something to the effect, “he seemed drugged or something”. *Yea, because I bet she knew that he had been.*

I don't know what caused the jump at the start of 2020, but it's interesting that the spike in late 2021 coincides pretty well with Biden's various vaccine mandates,

The strange thing is, the hills and peaks during the pandemic years seen on this plot are not visible in most countries for this age group. In some countries you can't find the pandemic years on similar plot for the same age group. It's not there. They have death deficit over the pandemic years for working age group 15-65.

I think the U.S. pandemic experience is unparalleled across the world for young people. The rest of the total death statistics for the U.S. is along the same lines. I am not sure if it's positive for the U.S. but those countries who could possibly have messed up the pandemic response as badly – due to extreme poverty, corruption or bad leadership – don't have any statistics.

| COVID is about fixing a demographic problem in western nations.

If that was genuinely part of the objective, “they” should’ve made sure that their preferred countermeasure (the jabs) didn’t affect fertility.

Western-nation TFRs are falling, and have been for quite some time.

It’s true that COVID itself killed infirm old people preferentially – the extent to which that’s true is confounded by the fact that it gave the health industry ‘cover’ to knock off infirm elderly people who were clogging up retirement homes and failing to die on cue. The **massive** increase in the use of midazolam in UK retirement settings is pretty clear evidence of that.

Still: those aged-infirm had an expected remaining lifespan of about 6 months – so getting rid of them a few months early doesn’t help much.

The **real** demograpohic problem faced by the developed world: Boomers are the largest cohort, with the most savings, and the most invested in risk assets.

That cohort is retiring now, and as a direct result will move away from risk assets. The cohort taking their place – GenX – is much smaller; has far less savings; and is far less invested.

I’m not usually one to sing the praises of Peter Zeihan – who is usually spouting whatever the State Department wants midwit-normies to think. So Zeihan can’t speak on **any** topic without mentioning how the US Navy subsidised global trade since WWII (the new “*White Man’s Burden*”).

That said: Zeihan's recent piece on the demographic issues confronted by the West (really, by industrialised nations generally) is excellent – once you get past the bit where he blathers about US CBGs making the seas safe for global trade.

It's a bit more than nine minutes long, and it should be quite sobering. Watch it or don't, but know this: government responses to COVID were the **exact opposite** of what elite supervillains would do if they were had objectives that included '*fixing a demographic problem in western nations*'. Killing a few tens of thousands of sickly octagenarians who were going to die in 6 months anyway, is more than offset by the deleterious consequences for healthy-people incomes, savings, sanity and reproduction.

@Zachary Smith

I gave up on this one, for everything seems to go back to a person named Toby Young. Things I read about this person are not at all reassuring.

Toby Young is a reasonably prominent *conservative* journalist and public intellectual in Britain, just as I had said. Since you're not a conservative, you regard his views as anathema, but that's being foolish. Moreover, his website is a prominent alt-Covid publication, so it unsurprisingly promotes alt-Covid views. And you also might want to take a look at this:

<https://www.unz.com/runz/two-cheers-for-heresy-on-global-warming/>

As an aside, while looking into the claims about US Intelligence knowing about the Covid Pandemic before China did, I found this...If US Agencies predict an epidemic every month or so, eventually they're going to be "right".

It's important to carefully consider these particular examples. After the outbreaks of SARS-1 in 2002 and MERS in 2012, it's hardly surprising that both the American government and international bodies would be concerned about possible future epidemics, run exercises, and periodically issue warnings. There is absolutely nothing suspicious about these, which took place every few years, including the examples your article you cited in 2009 and 2010.

However, that's extremely different from the case discussed in my article. During the first eight months of 2019, Robert Kadlec, America's leading biowarfare advocate, ran the Crimson Contagion exercise, preparing America for defense against a dangerous Covid-like respiratory virus if one happened to

appear in China. Then ***Two months*** after the end of that exercise, Covid suddenly appeared in Wuhan. That seems like an absolutely extraordinary coincidence.

If someone takes out an extremely large fire insurance policy on his factory and it burns down, well, such things happen. But if the factory burns down just a few weeks after the policy was signed, the insurance company becomes extremely suspicious.

Finally, I should emphasize to everyone that this is not a vaxxing thread, and such comments are seriously off-topic. My previous two articles focused on vaxxing, and you're certainly welcome to leave your vaxxing comments there or on other vaxxing-related threads. But not this one.

@gay troll

Hello again. Further to the conjecture I offered in my first response comment (#166):

I tend to think this might be about forcing the mRNA tech well before it is ready for prime time, so as to work out all the kinks on us guinea pigs, for what is actually a hidden ulterior transhumanist agenda of life extension research (which is just a conjecture),

, ..... note the Sam Harris take here:

<https://www.infowars.com/posts/wtf-sam-harris-complains-not-enough-children-died-during-pandemic-to-derail-vaccine-skepticism/>

, ..... as an example of what I mean, ..... a certain attitude common among the technocratic elites, ..... as if their life counted, as a much older person, as much as child's life ..... like to me, the only way the attitude would make any sense in terms of the persona's (Sam Harris's) worldview, is if he thought that for all intents and purposes, his life expectancy was the same as a child's. Mmmmmm? It seems to me there is a lot of this such BS (pretty much a stance of 'radical individualism postmodernist-style), laying about, simmering in the background, within officialdom circles, that would indeed seek to excuse a grand transhumanist-technocratic-faux-west-globalist mRNA life-extension research project at the expense of the greater population, amongst themselves, as enabled by the postmodernist radical individualistic outlook.

Look, Sam Harris asks for it, because he is in the philosophy/ethics game. He should know better. Is this all fantasy or is there actually something simmering in the background, with the likes of Sam Harris and his ilk, by way of

his implied wonky postmodernist radical individualistic worldview? In other words, ... just how far along, are these nuts, with respect to executing their professed frightening technocratic faux-west globalist future, post-history-style or neoliberal-style or what ever you want to call it, with its fake rules based order and all that?

3 Points (because looking at this article costed me 45 minutes of my life I will never get back)

1. Clickbait. Dr Malone is one of the very few people I will listen to regarding the virus or the novel mRNA mechanism of the (under researched-untested) vaccine. I clicked on this hoping he was going to talk about the origin – i.e., what was this “gain of function” business I’ve heard tidbits about here & there, and the term “Adenovirus” that was present in that discussion. Known for at least 40 years, Adenovirus causes myocarditis (Coronavirus not commonly known to). Myocarditis is the hallmark of the Adenovirus class. Nope. Nothing. Just some connect some vague CIA-dots baloney I’d be unlikely to consult Dr Malone about.

BUT

2. Trump was apparently completely left in the dark regarding the virus. Apparently HIS agencies working under him (or somebody responsible for relaying the info to him) kept it from him. He was clueless. You want someone like him in the White House? Not me. Stick to high end real estate Donnie. We’ve got Russia’s dander up. Not a time for entertainment figures running the country.

3. So, like, why (and who) would be interested in fucking China’s economy? My goodness. Where would we get our goddamned toys from? We don’t *make* anything here – we just wrap, ship, and bill.

Oh cry me a river.

For petesakes, not only the largest workforce but now the nit goes off to work too to potentially double the workforce again?? And to top it off, they shipped all the manufacturing off to China, so that we could TRIPLE x 4 (12x) the number of clerks (each drawing pay) behind each and everything you consume? And 2 paychecks are of course going to double the price of a house. You charge what you can get. Frankly I'm not a bit surprised a Lean Cuisine costs \$5 and a pizza pie \$40. It's simple math.

This is 3rd grade arithmetic. Don't you learn anything in those biz degree courses?

And, of course GenX is hostile to boomers (especially the white guy) because the poor fucker was born too goddamned late and now is catching on to that ugly fact. [but, don't blame me – I'm quite sure I didn't fertilize that egg]

@How do you know its a real Durer

If you look at the headlines from the Chinese side from early 2021, say this piece

<https://www.globaltimes.cn/content/1183658.shtml>

you will find that the Chinese have already identified possible individuals who may be vectors to have brought covid into the country. It would not have been smuggled in as a bottle of pathogens or something that could be decisively concluded as a smoking gun – the risk for blowback would have been too large. It would be placed somewhere where it cannot be searched: inside the human body. It is highly likely some grunt signed some NDA for some important “experimental” shots in exchange for material rewards or perhaps blackmail, not knowing he or she was signing up for covert biowarfare action.

All China had to do to connect the dots is to rely on the vast array of surveillance tools they have on hand and they will have a pretty good idea of who brought it in.

All right, lext lemma: So evidently somebody precisely coordinated years of intricate programs of the State Department, HHS, DHS, DoD, and other cabinet-level agencies (down to the last-minute micromanagement of firing the HHS domain experts and putting grunts and FEMA nitwits in charge.) This was effected covertly at the most stringent levels of classification and compartmentation (recall that SCIFs are CIA's Sensitive Compartmented Information Facilities.)

As in CIA's AMERITHRAX attack on civilian populations, the smoking gun is state signaling and war propaganda to obscure attribution and support legal pretexts for additional illegal acts. (see MacQueen, The 2001 Anthrax Deception.) As in CIA's AMERITHRAX attack on civilian populations, the attack rests on manifest development and use of banned biological weapons – federal felonies under BWATA and, more to the point, crimes against peace under the 1929 Geneva Convention.

Whatever you want to call these guys, it's sure as shit not “the deeper recesses” of anything. This is the apical command structure of the US state, the highest levels. As you will see, it's CIA, who continued germ warfare covertly when Nixon criminalized it – CIA, not rogue, not out of control, but firmly in control. Your government is CIA; decapitate that and we're off the hook, you won't get nuked.

When it's time for scumbags to swing for this in universal jurisdiction, you know where to look.

Finally, I should emphasize to everyone that this is not a vaxxing thread, and such comments are seriously off-topic.

If had you bothered to look at the Media Bias link you'd have seen that Mr. Toby Young is currently milking the Covid 19 hobby horse for all it's worth. I provided only the two examples of his anti-vaxxer views because reprinting all 11 of them seemed to be excessive.

Since you're not a conservative, you regard his views as anathema, but that's being foolish.

I happen to be an USian American living in the State of Indiana. As such, I don't give a hoot about the politics of some far-away UK nutcase. *My objection to the man is that he is an unscrupulous self-promoting ass.*

**Disclaimer: I am aware this thread is not about Women's Cleavage, and the following "quotes" about that are solely to display one of the character traits of the Boy Wonder Young.**

*Toby Young: writer who is no stranger to controversy*

While watching Comic Relief in 2009 he commented: "What happened to Winkleman's breasts Put on some weight girlie." A few hours later he wrote: "Alan Carr has bigger breasts than Claudia Winkelman" (sic)

While watching Prime Minister's Questions in 2011 he wrote: "That's quite a cleavage behind EdM."

In 2012 during PMQs he tweeted: "Serious cleavage behind Ed Miliband's head. Anyone know who it belongs to? #pmqs"

He followed it up with "Breaking: Cleavage belongs to @pamela\_nash #pmqs", referring to former Airdrie and Shotts MP Pamela Nash.

In 2013 he responded to criticism of his previous comments by saying: "Women who display a lot of cleavage shouldn't then complain when men notice them."

Mr. Toby Young had an earlier run at trying for fame – promoting Eugenics.

In 2015 he wrote in support of embryo screening to weed out children deemed less likely to have high IQs.

Mr. Toby Young will do anything to get attention and to promote himself. One more example of that from a wiki which he is said to endlessly edit:

One tweet by Young was in response to a BBC Comic Relief appeal in 2009 for starving Kenyan children.[104] During the broadcast, a Twitter user commented that she had “gone through about 5 boxes of kleenex” whilst watching. Toby Young replied: “Me too, I havn’t [sic] wanked so much in ages”.[105]

~~~~~

I ought to have been more explicit in my first post about the exact point the ‘logic’ of this story started falling apart for me.

Here’s something that’s been bugging me. **How did U.S. intelligence analysts pick up on what they deemed a dangerous novel virus in China at a time when there’s no good evidence China had picked up on it or was concerned?**

I have “no good evidence” Mr. Ron Unz knows how to tie his shoe laces. Nor have I seen any convincing demonstration Mr. Unz knows the difference between football and basketball. Am I therefore entitled to write a long essay starting on the basis of things “I don’t know” into a tale of the owner of the Unz Review being an extremely strange fellow? I don’t think so.

Mr. Toby Young (UK Conservative) is a less successful version of RFK Jr. (US Liberal). Both are attention-seeking jerks who are milking the Covid Pandemic for all it’s worth.

\*\*\* The assumption China doesn’t keep close track of events within China is quite unbelievable. \*\*\*

I'm OK with Covid being a US biowar stunt directed against China. China being a clueless babe in the woods about such a project is not so OK. That's why I'm also easily persuaded there may be a connection between a potential Covid biowar project in China to the \$4/dozen eggs I saw today at the supermarket.

China's zero covid policy ended the moment the public turned against it.

The reports out of China emphasised the totalitarian nature of the policy. People being welded into their homes, starved, their dogs shot, daily testing, queuing all night in the rain, faceless armies of goons in white coveralls, etc.

The Chinese claimed almost zero deaths – so their policies, though brutal, were “successful”.

Message = lockdowns and restrictions “save lives”.

No mRNA vaccines available in China.

Western media now claims Chinese cases and deaths “skyrocketing”.

Western lockdowns/passports/mandates now appear moderate compared to China's.

China suffers brutal restrictions but necessary because no vaccines.

The west avoids more brutal restrictions and saves lives thanks to vaccines.

Western lockdowns/mandates appear moderate

Chinese lockdowns/mandates save lives

Vaccines = doubleplusgood

Yes, by December 2019 they had “connected the dots” to 5 soldier athletes who had gotten fevers during the games.

This timeline puts the Chinese theory of US military involvement, I.e likely bio-weapon attack before the VOA piece.

If the US is going to infect some grunt, how do they stop any blowback before leaving the country? If they took a plane over, how do you prevent all the other athletes from getting sick? How did only 5 soldiers get a fever during their time in Wuhan and not more? Why not just infect someone and send them in the country as a civilian? Using your own soldiers seems too obvious, especially when they danger of “leakage” is so high.

Funny enough, while researching I encountered many “where are they now” pieces about the 5 soldiers. Reminded me of the dancing Israeli interviews from Israeli TV..

“Despite its growing visibility, the website’s subject matter and British focus meant that I’d been only slightly aware it until a few weeks ago”

Hilarious. As usual, Ron Unz just wasn’t paying attention. Regardless of the intelligent information available at his very own forum.

Ron Unz is always behind the curve. But notice his gratuitous kick at the supposed crazy alt-covid sites. Hmm, where do you think Toby Young was getting his information? Answer: From just these types of sites—people who on their own time and using their own resources, lacking the resources of the government and established research organizations did the analyses that the official sources were ignoring and actively suppressing. And many formerly high-profile scientists were of course sidelined from the MSM in this process but were still able to provide cogent analysis to the (curious, attention-paying, truth-seeking) public. They were also offering the public solid information—that part of the public who searched for it. This did not include Mr. Unz.

It is the commenters —all of those “anti-vaxxers”—who are way out ahead, certainly in the matter of covid.

I wonder why?

Could it be because those “fearful anti-vaxxers” were actually the ones out on the cutting edge of truth seeking and cutting through the BS in this new world of 24/7 propaganda?

As for me, I was aware of Lockdown Sceptic as soon as it went online. I don’t know why it has taken Ron Unz so long.

Perhaps Mr. Unz has been so invested in spending his time and his column inches insulting his commenters that he has fallen 2.5 years behind. At this point he should at least say Thank-you to his commenters for leading the way.

Oh, BTW, also hysterical is the new Unz usage “alt=covid.” What is wrong now with “anti-vaxxer”?????

Did a memo go out to eschew “anti-vaxxer” and switch to “alt-covid”??

Can Ron Unz actually think for himself?

I agree that Covid-19 is a bio-engineered virus (or just bio-weapon as David Martin would say) deliberately released. The whole false dichotomy discussion (is it natural – is it *accidental* release) pretty much shows that. Mainstream media always stays with natural/accidental false dichotomy.

What I can't understand is how Ron Unz can, on the one hand, assert deliberate release, and yet seem to believe that the vaccine is somehow benign. It's clear that deliberate release and vaccine were created by the same parties. How could vaccine ever possibly be benign? Unless Ron believes deliberate release was also benign.

I gave the explanation very clearly right at the beginning. My impression is that *Lockdown Sceptic* focused very heavily upon lockdowns, masking, social distancing, the dangerousness of the Covid virus, and eventually vaxxing. None of these topics have been of much interest to me, so why would I pay attention to a British website concentrating on them? Since you were interested in those topics, you naturally did.

| Did a memo go out to eschew "anti-vaxxer" and switch to "alt-covid"??

Not really. I'd define alt-Covid as a super-set including anti-vaxxers but also including those who have alternative views on lockdowns, masking, HCQ/IVM, the dangerousness of the virus, and everything else connected with Covid.

If you don't like the alt-Covid term I just invented, what would you call them?

The majority of Americans are so totally brainwashed that NOTHING will convince them that their governing elites are capable of this crime, even though it is just one of thousands such crimes, if a huge one, committed by the USA since its inception. In the context of maintaining our prosperous high tech USA society, I think the main problem is the decline of meritocracy much more than demographics.

Superstars have been replaced by stars,  
Stars have been replaced by midwits,  
Midwits have been replaced by dimwits,  
Dimwits have been replaced by nitwits,  
You get the idea.

Many "tech" people are not competent enough to recognize this, so they have more meetings and Zoom calls where people with little idea of what is supposed to be going on call the shots.

This Zeihan piece is a heavy-handed promotion of immigration. The problem with invasion (some call it immigration) is that most of the influx is at the level of nitwit to dimwit once basic capability, education and language are accounted for. They are not sending their best.

*Ron Unz's theory assumes that the perpetrators didn't care or didn't realize that the virus would spread around the world from China.*

That's not true. You're assuming that the perpetrators had certain "goals". How do you know what their goals are?

You remind me of some critics of 911 Truth. They ask: "Why would they do that?" As though you have to know a criminal's motive before you can arrest him. Cheney shut down US air defenses on 911. Why'd he do it? Many motives have been proposed. Doesn't matter. Cheney shut down US defenses. That's a fact.

If a policeman sees evidence that one person killed another, he arrests the killer. He doesn't say "Oh, I can't arrest this man because I don't know why he did it." He says, "This guy killed this other guy. Who knows why he did it? I don't care. I'm gonna arrest him."

Kratoklastes' point was proven, yet again, by the hilarious seven to nil effort of the High Court to exonerate the odious Pell. A jury, who found Pell GUILTY, unanimously, on all five counts, two appeal court judges and many other victims whose cases the police, somehow, decided not to pursue, were all fools beside these judicial paragons of elite rule, and they beg to differ. As do I. But the 'judges' found a 'legal technicality' to order, to protect a high Rightwing and elite asset. Filthy, and, in my opinion, quite clearly an exercise in complicity.

But I think it's important to calibrate the credibility of that Media Bias website: "Who Guards the Guardians?"

When I make a search on the internet I almost always use DuckDuckGo. Media Bias is not a site I have bookmarked, but DID show up after the search.

*Are you suggesting the Media Bias site made up those quotes? That they cannot be found anywhere else? If that's the case I'll waste some more of my time and look for the "originals" – if you don't believe they exist.*

My impression is that you're an anti-Zionist leftist of some sort.

Your impression about "anti-Zionist" is a solid hit. As for the "leftist" business, I can't say. During my voting lifetime I've known of only one person was even remotely "Left" – Bernard Sanders. Unfortunately Mr. Sanders was and remains a warmongering neocon, but I was willing to take half a loaf with his "leftie" domestic stances.

Once upon a time – long, long ago I had the Mondoweiss site bookmarked. Why I rather quickly dumped that bookmark is something I can't quite remember, but the "**Misinformation**" tag may be the reason. In an effort to recall what the site was about, I've made another DuckDuckGo search, and turned up a story at another site **I do not have bookmarked.**

**Disclaimer: I am not responsible for the DuckDuckGo results of any particular search.** This is the one wacko one I'm highlighting:

<https://alethonews.com/tag/mondoweiss/>

Mondoweiss: .... We are tired of serving as a platform for this discussion, including in the comment section, and don't see the conversation as a productive one. From here on out, the Mondoweiss comment section will no longer serve as a forum to pillory Jewish culture and religion as the driving factors in Israeli and US policy.

(reply posted below this Linked-to-Mondoweiss statement)

Xymphora responds: I look forward to the 'Roots of Slavery in the Old South' forum, which consists entirely of a discussion of the sufferings of the slaveholders, and how their actions derived entirely from the racism experienced by their Scots-Irish forefathers.

Of course, the deeper issue is that Zionism is based, not in Jewish suffering or the mythology of a universal irrational hatred of Jews, but in Jewish violent group supremacism. ....

So why did I leave Mondoweiss and never return? A combination of guesswork and dim memory suggests I concluded they served as a soothing conscience to American Jews who have hesitated to support the horrors of the Apartheid state. "Somebody cares about the Palestinians, and you (American Jew Joe Schmoe) don't have to stick YOUR neck out. Just keep your head down and don't rock the Zionist boat. All will be well."

Protecting the horrors perpetrated by the pissant state is very important, and the list of sites where I've had to either shut-up-or-leave is quite long. They include Consortium News, Moon of Alabama, AmericaBlog, AntiWar, and Mike The Mad Biologist. In each case I chose to depart.

I don't know how to determine if someone has died from Covid. So what? I also can't 100% positive sure that's what I had, or my wife either, who had the same symptoms and tested positive at the same time. I had Covid, bro. It exists. My wife has had it twice. The first time she lost her sense of smell for a month. Her sense of taste was affected, too. The second time she didn't have those symptoms, but others. Now, are the fatality counts completely accurate. If I had to guess, I'd guess no, but that they are roughly accurate.

I think that was a good attempt at coining a new term, but you're trying to encompass a much too broad set of views:

| *... have alternative views on lockdowns, masking, HCQ/IVM, the dangerousness of the virus, and everything else connected with Covid.*

The first 2 added on to those (most of whom you erroneously called "anti-vaxxers) who are against mandatory vaccination are, well, there's been a term around for 1/2 a century – **Libertarians**.

The HCQ/IVM anti-ventilator, anti-big pharma crowd, I'd called **alt-med** folks, how 'bout that?

Then, those not so concerned about this virus and panic brought on by it – **Non-hysterics** perhaps?

Those who think the vaccines were purposefully made by evil Globalists to de-populate the world, via sickness or anti-fertility – **Conspiracy theorists** who may very well be right?

Those who are more concerned with the origins of the virus than any of the Totalitarianism, nasty effects of the virus, or suppression of alternative medicine – **Conspiracy theorists** who aren't even after the biggest conspiracy.

| *If you don't like the alt-Covid term I just invented, what would you call them?*

@Eric94123

My worldview has gov't, all gov'ts, as mafia operations; criminal enterprises comprised of the worst scum in every society. When covid first popped up, I didn't know what to make of it. Soon, gov't action convinced me it was a giant gov't program for more control to position the various mafias before the fiat currency systems collapsed.

With the US Dollar as the world's reserve currency, it was obvious that the US would spearhead the effort to gain maximum advantage over the US population and convince their vassals to go along. At first, I found it puzzling that Russia, China and other mafias that are nominally the US's enemies were also involved in gaslighting their populations, but then they all rely on fiat for their survival and they just saw an opportunity to never let a crisis go to waste.

The warp speed rollout of the "vaccines" also told me they were not to be trusted since all previous attempts at the tech had failed and now, all of a sudden, we have not one success but several and that's just not credible. I surmised that lots would die from the injections but initially I never considered them a weapon against the population as a planned genocide, but I do believe that now.

*The lockdowns and coerced injections were part of a biodefense exercise. They, like the bio-attack itself, were part of a military operation, not a civilian public health response to a natural pandemic.*

No, of course they were not. This was a PanicFest led by the Lyin' Press and governments of all levels. Why is it that Governor DeSantis and Florida in general spent so much less times with their panties in wads than did the nasty Totalitarian bitches like Stretchin' Gretchin and Hochul the Hutt in Michigan and New York State respectively. Federalism showed its benefits, as some **civilian** governors, mayors and the like outdid each other in their Totalitarian stupidity, while others (in very popular States right now) took a common-sense approach, using some perspective.

*The insistence on mRNA vaccines was all about testing a new military technology.*

No, it was about testing American's compliance level and belief in the goodness of government. It wasn't the military doing this, but Big Gov hand-in-hand with Big Biz and Big Ed\*. The results were not so encouraging for those wanting compliant Americans. We've had enough. Many of us were threatened with firing, but, sorry, we were never gonna take it.

... have alternative views on lockdowns, masking, HCQ/IVM, the dangerousness of the virus, and everything else connected with Covid.

well, I think his term (insofar as it describes the above) is sound and concise and succinct.

and also because it describes me.

Just as 'alt-right' more or less describes people like myself, who are in strong opposition to the 'official right, otherwise known as 'Cuckservative Inc. that loves wars and immigration and debt spending and lock downs and mandates and above all else, Israel.

So in a way, alt-Covid seems perfect.

Those of us who're 'alt-Covid' think the government and media and Big Pharma are lying. We believe that none of those entities, (like Fauci or the rest) have anyone's interests at heart other than their own, and that just like with Cuckservative Inc, they're perfectly willing and eager to sacrifice us all to wars or vaccines or anything else, without one second's consideration for anything other than their own self-interest. Oh yea, and the love, love, Love power and control.

So yea, I'm alt-right, and I'm alt-Covid.

Or, anti-anything the government and media agree on. In the case of Covid, also anti-Fauci, anti Big Pharma, anti-CDC, anti-WHO, anti-Google, and on and on..

You get the idea.

Just as we're anti-Kevin McCarthy, the current face of Cuckservative Inc.

There's no point in staying open when the customers stop showing up. Those businesses that tried to stay open needed employees and gov't mandate forced them to comply with the jab. The business owners were caught between a rock and a hard place.

that seems perhaps a bit harsh, no?

I’ve said from the beginning, that we’re being lied to, and I still say that.

But I’ve known and talked to people who (their doctors told them), had Covid. And some of them had pretty bad cases, and a couple of them were out for weeks with it, and you could tell it was worse than your common flu. Even as some of them were told they had Covid, with almost no symptoms.

So while I’m very sympathetic to skeptics and those who don’t trust the gov or media or our institutions and so forth, I’m skeptical of the idea that ‘there is no such thing as Covid’, when I’ve personally known people who suffered from it. Or, if not Covid, then what was it? What flu knocks you down for almost two weeks?

I find it interesting that, under the subtext of COVID discussions, the pro-vaccine camp seems to present their case devoid of human characteristics – lack of human compassion, lack of human empathy – lack of humanity, in general. It's like a portion of this group's consciousness is completely missing.

On the other hand, the COVID anti-vaccine camp argues from a position of human compassion, empathy, sense of right and wrong, ethical and moral thought processes, etc. It's like maybe they are overthinking the 'goodness' of humanity.

Which camp provides a better outcome for humanity? Difficult to say: the pro-vaccine camp is protecting the upper caste of humanity to further the human race, after having done whatever is necessary to prevent the develop human potential; the anti-vaccine camp would rather give every human the chance to develop fully.

Perhaps no side of the discussion is proper discourse – humans only shine when they develop themselves without outside interference.

Perhaps Ron Unz can relate his position with more clarity in his COVID essays.

I tested positive for Covid. BTW, it wasn't as bad as the flu.

You guys who draw the conclusion that Covid “has never, ever been conclusively demonstrated to exist” means that it doesn't exist are thinking very wishfully.

It's common for people, otherwise intelligent, to put aside their normal reasoning ability to believe and promote poorly thought out crap just because it suits their agenda.

And you Jonny, are one such person who has put aside his reasoning ability to believe some poorly thought out crap that the ‘Gubmint’ told you.

FACT : You have NO IDEA whether or not you actually got Covid.

PCR tests are typically run at cycle thresholds (CT) of 35-40. As the inventor of the PCR test (Nobel Laureate Kary Mullis) himself said :

‘At such high thresholds you'll end up with a whole lot of something out of a whole lot of nothing’.

In other words, it'll pick up just about anything and give a positive reading.

Mullis himself said that the PCR should NOT be used to diagnose infection.

At CT's in the 35-40 range, you will get 97% False Positives.

You may well have also tested positive on the R.A.T test (ie: the Rapid Asinine Test – because it quickly detects that you're an ASS for using it in the first place).

By all accounts, that test is even more unreliable.

Jonny, you should eat some humble pie and admit that you know precious little about how you've been played by the Zio orchestrators of the Covid Psyop.

To the extent that you know ‘anything’, it is misinfo that has been planted in your head by the likes of the corrupt MSM and, judging from his output on the danger of the clot shots, the likes

of Ron Unz.

Alt-Covid still covers too much ground. Let me restate my prior suggestion:

A more functional split is:

- ◆ Vaxx-Realists
- ◆ Manda-vaxxers

**Manda-vaxxers** are authoritarians. Force and threats must be deployed so that BigPharma can roll in filthy lucre. If people have to suffer and die, that is irrelevant (or a population control side bonus).

**Vaxx-Realists** want individuals to have voluntary choices and good information. Some elderly with multiple pre-existing conditions may choose to take the experimental jab. There is little reason for the young & healthy to participate in the mRNA experiment.

This realistic, follow the science, conclusion applies if the death toll is millions, hundreds of thousands, or only the ~30,000 that made it to VAERS. No one should be compelled to receive the mRNA experimental jab.

Regardless of the source of the WUHAN-19 Virus, this is the critical knife edge distinction for analyzing & understanding the authoritarian UN/NWO mandates.

PEACE

@Ron Unz

” My impression is that Lockdown Sceptic focused very heavily upon lockdowns, masking, social distancing, the dangerousness of the Covid virus, and eventually vaxxing. ”

How could you have any “impression” at all if you weren’t paying attention and didn’t actually know anything about the Lockdown Skeptics site? I reckon youj were unaware of the early Lockdown Skeptics site until I mentioned it a couple of weeks ago.

LS focused on ALL aspects of the covid operation. Including, for instance, providing a platform for the Great Barrington Declaration and those who formulated it. This means that their assessment of the “dangerousness” of the virus—namely, not as dangerous as the lockdown maniacs were insisting—was also highlighted. I seem to recall that there were links to the website of the Swiss Policy Research, who was providing ongoing updates of available data along with independent analyses of the data, graphs, and links to “alt=covid” studies that did not support the mainstream panic narrative (<https://swprs.org/covid19-facts/>).

I am quite sure that experts such as Dr. Michael Yeadon, Sugit Bakhtra (sp?) and others were given a platform at LS, because for quite a long time LS was my primary source of alternative info on the covid operation. However, to prove this I would have to dig into the LS archives.

Furthermore, your “my impression” explanation/excuse ignores the **reasons** behind UK citizens’ protests: They were also getting alternative information about covid—**the actual level of danger it posed (namely, considerably less to the general public than what the panic mongerers were**

**selling**), which you have consistently exaggerated—and were aware that the public was being lied to and was being subjected to a huge propaganda operation. Also their awareness that the NHS was (1) being used by the perpetrators of the operation, (\*2) that the UK public was being deprived of access to its health service, and (3) that elderly people were dying under the most appalling circumstances of neglect and isolation because of this false narrative. Of course these types of crazy things were also occurring in the USA, which one could read about on the LS’s “news update” feature.

UK protesters got this info from alternative sources. One primary such source, which you would I suppose characterize with the “anti-vaxx’ insult, being the UK Column, its experienced and probing investigators Brian Gerrish and Mike Robinson, and its seasoned nursing correspondent/reporter, Debi Evans. Ever heard of her? It’s not too late, even though 2.5 years does seem kind of late. They were early on presenting detailed analyses of the UK’s yellow card data (analogous to the VAERS system) which showed the actual health consequences of the jabs. With their determined efforts and expertise they breached the **user-unfriendly** wall of the yellow card system, to inform the public as to what the available data showed. They also ran interviews with active NHS nurses who were witnesses to some of the egregious events going on within the system.

Early on the UK Column also exposed the internal communications of the UK govt.-connected propaganda organization to gin up fear and put people under various sorts of psychological pressure to change their behavior and get jabbed.

Because of your tunnel vision regarding the “origin” of the virus or whatever it actually is, and your arrogant and demeaning labeling as “anti-vaxxers” those who were providing valuable “alt-covid” (as you now call it) information, you totally discounted the context within which this operation was taking

place, including the actual medical consequences for the populace caught up in it and the level of knowledge of protesters in the UK. You didn't grasp the point that excavating the "origins" was not separate from understanding the actual nature of the operation, and its goals and outcomes (which we still do not really know). One really weird thing is that three main "alternative" media platforms—TUR, The Saker Blog, and Bernhard, of Moon of Alabama—all were taken in by the covid story and the need for untested jabs. Weird.

In addition, one cannot avoid the conclusion that your own failure to detect the lies that accompanied the "vaccine" rollout and thus your acceptance of obviously untested jabs affected your ability to examine the whole covid19 pys-op objectively. I expect your own fear of the virus—your believing the panic mongerers and your consequent sense of vulnerability—drove your decision to get jabbed and your disdainful attitude toward those who did **not** make that fateful, ill-informed choice.

@Skeptikal

How could you have any “impression” at all if you weren’t paying attention and didn’t actually know anything about the Lockdown Skeptics site? I reckon youj were unaware of the early Lockdown Skeptics site until I mentioned it a couple of weeks ago.

LS focused on ALL aspects of the covid operation.

Like I said, I think I was very vaguely aware of it, maybe occasionally seeing a link here or there. Or perhaps I’m confusing it with some other website.

Based upon your description, its coverage was exactly what I thought it was, all those different Covid-related issues in which I’ve had very little interest, but probably almost nothing on the origins question that has been my own focus. So I’m not sure what you’re disputing.

I glanced over some of their recent articles, read the “About” section of their website, and browsed around Wikipedia a little. That, plus my vague (possibly mistaken) recollections of a few past links I’d seen was how I formed my impression of their coverage, which you seem to have confirmed for me.

Meanwhile, you’re just some agitated anti-vaxxer, having beliefs that I regard as total nonsense, and which I think I already pretty effectively debunked in my previous two articles.

Oh, fuck off. The “COVID anti-vaccine camp” could care less if everyone over 65 years drops dead, regardless of caste. They’ve made that very clear.

@Random Anonymous

How about further sub-divisions for even more clarity? Most people will belong to more than one:

1. Alt-covid-disease – They propose that viruses do not cause illness. Instead they are a symptom of it. Covid is being used to take people away from how they lived eons past. Victory comes through what we put in our bodies.
2. Alt-covid-origins – Can be either a lab leak or bio-weapon. Victory comes from gaining more information in regards to who perpetrated the crime and when.
3. Alt-covid-motive – Most people would belong in the WEF/Klaus Schwab camp. The “virus” is being used by globalists (including the Chinese and Russians – remember Putin was a young future leader chosen by WEF) to further consolidate their control over the entire planet and reduce the population. Victory comes through going off the grid as much as possible, libertarian politics, and other such methods used by Alex Jones types since the 90s. Gold should be stockpiled under your bed. I would put Ron’s Neocon theory in here as well, although his end game is much different than the WEFers. Maybe an even smaller sub-grouping is for those that recognize the corruption in the pharmaceutical and medical industries and their search for profits, but see it as a fortunate occasion they took advantage of.
4. Alt-covid-vaxx – the Vax is a deadly Bio-weapon used for culling the “sheeple”. Similar to 1 where victory is gained in regards to what we put in our bodies and 3 with motive. Hopefully you got the saline one. If not, a detox diet with some vitamin supplements may do the trick. If all else fails that stock of Ivermectin next to your gold bars will do it, studies have shown it effective in mild to moderate cases.

I was trying to explain the psyop messaging and collusion between Chinese and western governments. I don't see how this is racism.

Ron Unz claims the Chinese covid response was a means of conditioning the public to accept future restrictions when another biological warfare agent is released. That doesn't make sense to me. Why do you think China enforced lockdowns etc long after the rest of the world had moved on then suddenly dropped them for no apparent reason?

@Truth Vigilante

| On the subject of Donald Trump, his history is even sleazier than most imagine.

Indeed, their *Trump, Clintons, Roy Cohn*, (and all the other gauleiters), history of depravity (also matched by their sordid personal lives), is hard to “imagine.”

The Romans of Caesar’s time had a choice; Either Restore their Republic, or later, collapse ignominiously, in a heap of corruption, and finally, watch the Goths burn their capital and brutalize their civilians.

*Stiff upper lip.* Your Libertarian-minded friend.

Covid certainly allowed manufacturers to halve their production and double their profit, either USA, China or others. Definitely an adrenaline shot into the almighty dollar to keep it floating another 5 years. Post covid bottom line....dig a little deeper in your wallet and keep working the treadmill until you either die from pandemic or exhaustion. This playbook gets old after awhile. The govt used to do this every 20 years, then every 10 and now every 5. I feel the govt has finally run out of other peoples money as recent \$trillion printing has shown. Most won't realize it till the POTUS election in 2024, and this one will be a doozy. No cheating this time, instead outright tyranny and theft. We won't know who POTUS is for a very long time, if ever, as they delay vote counting. They install a group or committee to act as the executive branch in the interim. No one will know who's in charge of the USA or ever will again. It's called a silent coup. A nation within a nation comes to mind.

Trump was our last duly elected president 2016. Biden was the cheat 2020. There will be not be a POTUS 2024.

According to Unz: “Alex Jones’ conspiratorial InfoWars website, hugely popular but hardly reliable.” Well, actually InfoWars has proved to be much more reliable than the Unz Review. Actually, most of the criticism currently appearing in the Unz Review appeared in InfoWars many years ago.

I’m afraid I have a pretty negative opinion of Alex Jones and his work, and explained why in an article a few months ago:
