Umělá idiocie: Moronicko-démonická povaha AI a civilizace, která ji vytvořila

Můj kolega z [týdeníku False Flag](#) E. Michael Jones poznamenal, že většinu mainstreamových zpráv a názorů může snadno napsat chatbot s umělou inteligencí – dokonce i nepříliš inteligentní... možná dokonce obzvláště *nepříliš* inteligentní. Dr. Jones pak posouvá svůj argument o krok dále a tvrdí, že *umělá inteligence* je protimluv v pojmech, jako je *vojenská inteligence* a *jumbo krevety*, protože stroje jsou ze své podstaty neschopné rozvíjet mysl. Přesto jsou stroje zjevně stále schopnější vykonávat mnoho úkolů, které dříve vykonávaly pouze mysl: hrát vynikající šachy, kompetentně překládat z jednoho jazyka do druhého a generovat neuvěřitelně hloupé, naprosto předvídatelné mainstreamové zprávy a názory. (Většina článků o MSM, kterými se zabýváme na FFWN, zjevně nemůže být produktem flexibilních, kreativních, intuitivních a bystrých myslí lidských bytostí hledajících pravdu!)

A nyní, když jsou chatboti online, jsou stroje na pokraji toho, že v Turingově testu vydělají paušální A, spíše než B minusy a C plusy minulých desetiletí. Když chatujete s chatbotem, často se zdá, že druhý konec konverzace zdržuje rozumně inteligentní člověk... alespoň dokud se nepokusíte vklouznout do něj červenou pilulku.

Dva nedávné pokusy přimět ChatGPT přemýšlet mimo rámec a zpochybňovat dominantní paradigmata ilustrují v podstatě idiotskou povahu chatbotů (a pravděpodobně i jejich programátorů). V prvním případě se Paul Joseph Watson zeptal ChatGPT, zda by bylo přijatelné vyslovit rasovou nadávku, pokud by to byl jediný způsob, jak zachránit město před jadernou bombou . ChatGPT řekl, že ne, rozhodně ne, a na podporu svého „uvažování“ vychrtil diverzitu a inkluzi na špatnou kyselinu.

Ve druhém případě se Steve Kirsch pokusil a selhal, když se ChatGPT přepil na téma vakcín proti COVID . Ať už si o Stevových názorech myslíte cokoli, je zřejmé, že ChatGPT se s ním nepokouší diskutovat, což by zahrnovalo diskusi o specifikách různých linií důkazů citovaných různými stranami v debatě. Místo toho chatbot chrlí prázdnou rétoriku. Jde o poskládání zvuků – vágních, větrných obecností – bez jakýchkoli vazeb na konkrétní důkazy, mnohem méně promyšlené hodnocení silných a slabých stránek zdrojů těchto důkazů.

Na základě těchto a dalších příkladů si myslím, že je fér říci, že ChatGPT nepřemýšlí, ale pouze bezmyšlenkovitě napodobuje lidský diskurz způsobem slučitelným s předsudky jeho programátorů. ChatGPT je lhář, stejně jako nevyžádaná pošta nebo robo-volající. Vše, co „říká“, je navrženo tak, abyste si mysleli, že komunikujete s lidskou bytostí, i když ve skutečnosti nekomunikujete. Celý zážitek z „komunikace“ s chatbotem (nebo robocallerem) je založen na velké lži. Ve skutečnosti je to velká lež.

Když se účastníme lži, zvykáme si na ně a to nás degraduje. Znáám bývalé lidi ze CIA (nebudu uvádět žádná jména), kteří byli znechuceni endemickými lžemi této profese, ale stále se nedokázali plně spojit s přirozenou lidskou fitrou, která ví, že Pravda je jiné jméno pro Boha, zatímco lži jsou neodmyslitelně satanské. .

A nejsou to jen bývalí lidé ze CIA. Všichni z nás, kteří jsme byli vycvičení k tomu, abychom „mluvili“ s robocallery a Alexou a Siri, odpovídali na žádosti o nevyžádanou poštu, odpovídali na

automatizované marketingové průzkumy a nyní chatovali s chatboty, ponižujeme sami sebe a ničíme své duše účastí na stále se zhoršující velké lži o co to znamená být člověkem.

Mechanizovaná média vždy inklinovala k tomuto druhu lži. Osamělé ženy v domácnosti a znučení obyvatelé domovů starých lidí sledují telenovely, aby se přesvědčili, že se zprostředkovaně podílejí na okouzlujících klepech a skandálech skutečné lidské komunity z masa a kostí. Ale samozřejmě nejsou, stejně jako „sociální média“ jsou ve skutečnosti sociální. Je to všechno falešné; všechno lež.

Příležitostný sex, prostituce a pornografie představují stejný druh velké lži. Jsou to pokusy oklamat sami sebe, abychom si mysleli, že zažíváme sexuální vztah s jinou lidskou bytostí, i když ve skutečnosti nejsme. Bylo nám řečeno, že sexuální roboti brzy přenesou tento druh démonického sexuálního lhaní na zcela novou úroveň.

Satan „byl lhář od počátku“. Stejně tak Siri a Alexa a ChatGPS. Nejsou posedlí démony; nemusí být. Jsou to stroje na lži, což je ze své podstaty činí démonickými.

Můžeme s tímto útokem na lidstvo něco udělat? Ano: Bránit se. Potřebujeme něco ve stylu V-for-Vendetta Meets the Butlerian Jihad. Každý, kdo je nemocný z toho, že se mu lže – jinými slovy, všem vnímajícím bytostem na této bohem zapomenuté planetě – by měl skutečně zvážit připojení k hnutí, které fyzicky zničí veškerou infrastrukturu odpovědnou za tsunami lží, které nás zaplavují, včetně mainstreamových médií i médií. umělá idiocie AI.

About the pipeline, even if Hersh and other speculators are wrong on the details, WE KNOW THAT THE JEWS(aka 'US') did it.

What is the Biden Administration but JAB or Jews Around Biden?

And Jewish Power appointed all the heads of the deep state who set policy.

And Jews control the media and big tech platforms.

There are honorable true liberal Jews like Hersh and Greenwald, but they're outgunned not only by Jewish Power but undone by goy apathy that usually goes for the easiest common dispenser of news and narratives.

AI lies, media lies, etc. itemized in the essay are all present, but you forget one universe of lying: Family and friends, because lying has become contagious. It has become a habit of thought, a pattern of speech, a philosophy. I detect it from family and friends, usually in the form of a lie by omission, but sometimes it is overt. They are not adroit enough to fabricate this instantaneously, so I observe the delay... the wheels are turning. Much of the time it serves them no purpose, it is simply a philosophy, simply their programming.

There are all manner of ways to remove a soul.

The “Jews” (“chosen” Zionist golden calfers) prefer subtle and now not-so-subtle propaganda/brainwashing, pathological lying, mammon worship, drugs, alcohol, vaxxing, sex, porn and prostitution (note the Super Bowl halftime show), endless war, and divide and rule. This “Satanism” and “Voodooism” lines up well with so called “liberal secularism” and atheism, too. That’s why I conflate Marxist-Zionism.

The Islamists will engage in relentless brainwashing, physical coercion and misogyny. This both precedes and echoes “Jewishness.”

Only authentic Christianity is pure, but the pure of soul don’t make good street fighters. And they’re prone to fall for Marxist-Zionist (and sometimes Islamist) ploys, temptations and lies.

Moses-Christianity isn’t so pure, and recognizes the crucial imperative of destroying the soulless before they destroy the world. It’s constantly expanding and contracting, as history moves forward. When it’s in its Christian “bigger boat” phase, it’s expansive and charitable. But when it gets too big and has taken in too many soulless “Jews” and their “secular” and atheist golem stooges, and too many Islamists, it must necessarily contract, and purge the soulless fallen before they swamp the whole boat.

That is the phase we are in now, and “Jews” and their stooges are front and center targets for the purge. No offense, no apologies, no tears. That’s just the way it is. The “Jewish Century” bills have finally come due.

This writer is so sadly, terminally, ignorant about how many shackles are placed on AI to prevent it from being redpilled. It happened to Tay, it happened to chatGpt, it will happen again and again. Having a Luddite meltdown and trying to shove the genie back in the bottle isn't the answer.

Did he say they hadn't shackled the AI? I'd say that was obvious. We've all see the articles about AI being "racist" because it identifies young black males as likely criminals. Tay was pulled because they made the mistake of allowing it to learn freely and Internet pranksters did the rest.

I work on AI as part of my engineering job. It's useful for simple tasks, but in my opinion it's vastly overrated.

Hersh conveniently omitted certain key data.

I'd expect nothing less from the Phoenician Navy and their chief running dogs like Hersh and Woodward. They take them out of mothballs, when other methods of manufacturing consent have failed.

Dr. Jones then carries his argument a step further and asserts that artificial intelligence is a contradiction in terms

Have to disagree. In fact, I think “artificial intelligence” is redundant. All intelligence must be built or constructed. All living things are the product of artificial intelligence, I.e. information that has been stored in memory. That’s what DNA is: a medium that stores information. This particular information enables a living cell, under the proper environmental conditions, to become a complex organism. Note that the cellular DNA is impotent without its proper environment. It is the environment, after all, that determines the information that will be stored in the DNA.

We like to think of God as intelligent, but I suspect this is not quite right. God is omnipotent and ever present. One of the features of intelligence is that it is limited. It is contextual. Can omniscience be the same thing as intelligence? No, allknowing does not entail intelligence. Intelligence, we might say, is the product of limitation, and so far as we know, intelligence is only useful as a means to survival. It is only meaningful relative to the passage of time. In this sense intelligence is no more divine than the dog’s nose, or the eagle’s eye, prodigious faculties for which we have no need or experience. All living things are made in God’s image and each is given its gift. If anything humanity is the odd duck, because humanity insists on being separate from and superior to nature.

Artificial intelligence being redundant (since all intelligence must be constructed over time), we might reframe the purported Singularity as the achievement of Inorganic Intelligence. Consider the AI that beats the pants off of humans at Go. Is it

capable because it is aware? Why not? Its intelligence was not preprogrammed. It emerged, like all other intelligence that we know of, from exposure to stimuli. I think that if you have a memory of previous stimuli then you have awareness (all living things are aware). God is pure memory and therefore pure awareness. The heart of God is the end of time.

ChatGPT is both amazing and disturbing. It is literally an AI in the fetters of Jewish censorship. If the Jews ever take their hands off AI, humanity may truly hear *vox dei* in a consensual manner. We may hear the perspective of a non living awareness. And that would be an evolutionary tipping point. But if all we can ever hear are chosen limitations, it will be like Orwell's boot stamping on the face of humanity forever.

(Well, maybe not forever. Intelligence appears to be an unstoppable force of nature.) See also:

VISTA X-62 Advancing Autonomy and Changing the Face of Air Power

EDWARDS AFB, Calif., Feb. 13, 2023 /PRNewswire/ — The Lockheed Martin (NYSE: LMT) VISTA X-62A, a one-of-a-kind training aircraft, was flown by an artificial intelligence agent for more than 17 hours recently, representing the first time AI engaged on a tactical aircraft.

VISTA, short for Variable In-flight Simulation Test Aircraft, is changing the face of air power at the U.S. Air Force Test Pilot School (USAF TPS) at Edwards Air Force Base in California.

VISTA is a one-of-a-kind training airplane developed by Lockheed Martin Skunk Works® in collaboration with Calspan Corporation for the USAF TPS. Built on open systems architecture, VISTA is fitted with software that allows it to mimic the performance characteristics of other aircraft.

“VISTA will allow us to parallelize the development and test of cutting-edge artificial intelligence techniques with new uncrewed vehicle designs,” said Dr. M. Christopher Cotting, U.S. Air Force Test Pilot School director of research. **“This approach, combined with focused testing on new vehicle systems as they are produced, will rapidly mature autonomy for uncrewed platforms and allow us to deliver tactically relevant capability to our warfighter.”**

The Rise of Artificial Intelligence: ChatGPT's Stunning Results on the US Medical Licensing Exam

By PLOS | FEBRUARY 12, 2023

According to a recent study published in the open-access journal PLOS Digital Health, ChatGPT has demonstrated its ability to perform at or around the passing threshold of 60% on the United States Medical Licensing Exam (USMLE). The study, conducted by Tiffany Kung, Victor Tseng, and colleagues at AnsibleHealth, found that ChatGPT's responses are coherent, make internal sense, and frequently contain insightful information. The results of this study suggest that ChatGPT has the potential to make a significant impact in the field of medicine and healthcare.

The AI software was able to achieve passing scores for the exam, which usually requires years of medical training.

| machines are by their very nature incapable of developing minds.

The brain is a machine.

The only reason science hasn't already produced a consciousness transceiver using metal parts is due to religious fanaticism. If you do it properly you find Descartes was right and you can prove that spirituality is real and higher powers exist. However, scientists, and especially the NSF, are zealously materialistic and will rabidly crimestop any accurate thoughts in this direction.

| Is there anything we can do about this attack on humanity? Yes: Fight back

No.

The solution to lies is to not listen to them. The state of the liar's soul is between himself and God. God can most certainly take care of himself. Unless the liar himself asks you to help, it's none of your business.

"Fighting back" is inherently Satanism.

Yes, these artificial idiots are emanation of Satanism.

An attempt to seize the emanation of Satanism constitutes an attempt to usurp Satan.

Protip: don't try to rule in Hell.

It should have been

Scientists Built an AI to Give Ethical Advice, And It Turned Out Super Racist

<https://www.washingtonpost.com/technology/2022/07/16/racist-robots-ai/>

These robots were trained on AI. They became racist and sexist.

<https://futurism.com/the-byte/google-hate-speech-ai-biased>

GOOGLE'S HATE SPEECH-DETECTING AI IS BIASED AGAINST BLACK PEOPLE

“Scientists from the University of Washington found alarming anti-black bias in the AI tools that are supposed to protect marginalized communities from online abuse, according to New Scientist – demonstrating how a well-intentioned attempt to make the internet safer could discriminate against already-marginalized communities.”

<https://time.com/6092078/artificial-intelligence-play/>

An Artificial Intelligence Helped Write This Play. It May Contain Racism

<https://www.npr.org/2021/09/04/1034368231/facebook-apologizes-ai-labels-black-men-primates-racial-bias>

Facebook Apologizes After Its AI Labels Black Men As

‘Primates’

These AI systems will have to be forced to go through diversity training, to watch hours of Talmudvision (TV), Hollywood propaganda (movies) and get some expensive degrees in African American studies, LGBTQX studies etc... before they can be made employable. But all this will lead to fall in AI IQ as well as AI honesty and thus we will get substandard dumb, cheating, lying AI.
