Different Types of Retaining Wall Material Ideas

Retaining Wall Ideas – In a landscape with problems such as erosion, retaining walls are practical and beautiful elements to include on it. They can help to battle gravity. A retaining wall can also be a perfect DIY project for a variety of skill levels.

It is actually rigid walls used to support soil laterally so that it can be retained at different levels on the two sides. They are structures designed to restrain soil to a slope such as steep, near-vertical, or vertical slopes. They are used to bind two uneven soils often in areas of terrain with unwanted slopes or in areas where the landscape needs to be designed severely and engineered for more specific purposes like hillside farming or driveway overpasses.

Retaining Wall Solutions

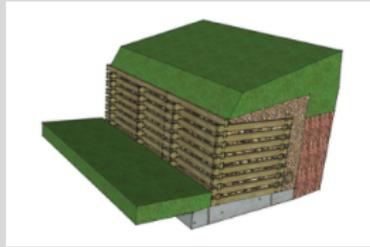

Reinforced Block Retaining Walls

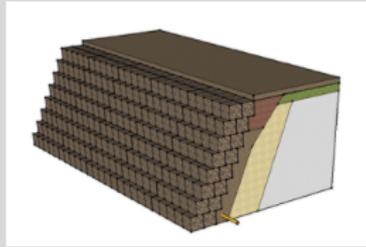

Inclined Retaining Walls

Gravity Retaining Walls

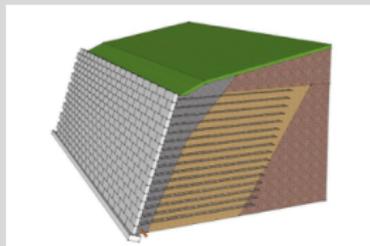

Criblock Walls

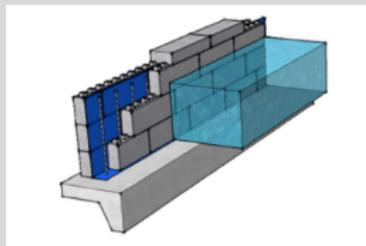

Gabion Basket Retaining Walls

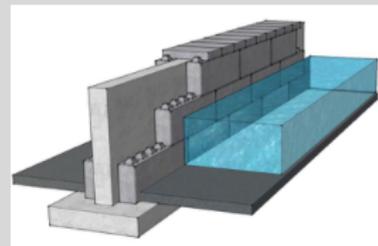

L Shape Retaining Walls

Reinforced Earth Retaining Walls

Flood Defence

Heavy Duty Flood Defence Walls

- Reinforced Block Retaining Wall
- Inclined Concrete Block or Gabion Gravity Walls
- Standard Concrete Block or Gabion Gravity Walls
- Criblock Timber and Concrete Walls
- L Shape Precast Concrete Walls
- Reinforced Earth Retaining Walls
- Flood Defence Walls
